Purpose of Grant
The purpose of the grant is to develop core labor market information (LMI) and career information products and services in support of the state’s overall plan for workforce development.

Performance Period
July 1, 2004 – June 30, 2005

Plan Narrative
This plan narrative includes a description of each core product, service and other activity, a description of customer support for the deliverable, a description of how the deliverable supports the goals of Minnesota’s WIA/Wagner-Peyser Five-Year Strategic Plan, principle customers for each deliverable, outcomes and system impacts for each deliverable, planned milestones for each deliverable, and total estimated costs for each deliverable including a description of any other funds available or any other funds that have been requested to meet the costs of the deliverable. This narrative also includes a description of Minnesota’s strategy for; consulting with major audiences, delivering LMI through Minnesota’s One-Stop service delivery system, and our customer consultation and satisfaction assessment method and continuous improvement strategy.
Strategy for consulting with key stakeholders

DEED/Labor Market Information Office employs a continuous outreach-and-feedback strategy for consulting with its key stakeholders:

Most importantly, office managers and lead analysts contribute to State Workforce Board (SWIB) quarterly meetings and sub-committee meetings, serve on standing committees, and maintain regular contact with SWIB staff. LMI managers have begun intensive conversations with SWIB members and staff this summer in the process of setting priorities for this grant. Conversations will continue throughout the year. At this time it is unclear if the governor’s strategic vision is the same as the strategic vision of the SWIB since the SWIB proposals have just been submitted to the governor. The LMI Office is prepared to ensure that One-Stop deliverables are consistent with the resulting strategic vision. The SWIB will participate in the final assessment of the performance of the LMI Office through approval of the One-Stop LMI Annual Report.

Beyond the State and Local WIBs, the customers of LMI are broad and diverse. The Office’s Career Information Unit and Regional Analysis Unit conduct focus group discussions with jobseekers and workforce development professionals. At the annual Spring Institute of the state WIB, DEED’s LMI Office organizes regional breakout sessions for discussion and feedback. Throughout the year, analysts deliver presentations, briefings, seminars and training to both external audiences (professional and trade associations, regional groups, conferences and “economic summits”) and internal audiences (local WIBs and partner agency staff). The office uses these in-person engagements to collect feedback on the packaging, content, usability and usefulness of LMI products and services.

Audience consultations and the monitoring of feedback guide adjustments to the office’s research agenda, business plan, and marketing activities. Over the last few years, these adjustments have included improved data download access and the addition of new research products. When major adjustments are proposed, these are vetted with SWIB members, Workforce Service Area directors, and/or WFC managers at regularly scheduled meetings.

Support of WIA/Wagner-Peyser

Minnesota’s WIA/Wagner-Peyser Five-Year Strategic Plan for state and local workforce development guides the work outlined in this One-Stop LMI grant. The Five-Year Strategic Plan is designed to:

- Prepare Minnesota's workforce to be the most competitive in the world.
- Eliminate obsolete, and consolidate redundant programs.
- Identify and promote well-paying jobs and skills of the future.
- Provide workforce development services in the most cost-effective manner possible
- Align products and services with customer needs.

Minnesota’s LMI system supports the WIA Strategic Plan by:
• Providing information for career and business planning to students, job seekers, workforce system professionals and businesses;

• Providing information on the economy, including the current and projected job market, so that workforce development professionals, educational planners and policy makers can make better strategic decisions, including the elimination of obsolete and redundant programs

DEED’s LMI Office has five Regional Analysts stationed at WorkForce Centers across the state. DEED’s Regional Analysts provide a vital connection between local WIBs and the LMI Office and are able to address local information and research requests by accessing central office data and resources. They also serve as outreach agents, trainers and experts on Minnesota’s employment statistics system. Since passage of the Workforce Investment Act, the Regional Analysts have worked with local WIBs to promote market-responsive service planning. The LMI Research Director is a frequent presenter to the state WIB providing LMI to address analytic, research design, and fact-finding requests.

**Strategy for workforce information delivery**

DEED’s LMI Office has an outreach strategy to extend awareness, access, and use of LMI. As a result, stakeholders are aware of our competitive advantage; i.e., we produce the official numbers and have access to microdata.

Pursuant to this strategy, new workforce information products and services are communicated to the general public through proactive contact with news media; to workforce development professionals through electronic communications, training sessions, presentations, and published materials distribution; to the business community through presentations, briefings, and seminars offered throughout the year; and to all audiences through referral to the LMI and ISEEK websites and the LMI Analyst HelpLine (888/234-1114).

</table>

In PY 2004-5, the LMI Analyst HelpLine and Regional Analysts responded to 2,450 questions and requests for information. The Regional Analysts delivered 39 half-day LMI trainings and
200 other presentations, briefings and seminars. The majority of presentations were delivered to external audiences (professional and trade associations, regional groups, conferences and “economic summits”).

Minnesota’s labor market information collection is available online and through the DEED intranet. Most of the statistical products and reports can be found at [www.deed.state.mn.us/lmi/](http://www.deed.state.mn.us/lmi/). LMI packaged for career decision-making can also be found at the Minnesota Careers site ([www.MNCareers.org](http://www.MNCareers.org)) and the interagency ISEEK site ([www.ISEEK.org](http://www.ISEEK.org)). In PY 2004-5, DEED’s LMI website handled 2,137,540 visits (or user sessions).

**LMI Delivery through State One-Stop System**

Minnesota WorkForce Center staff are notified of new online tools and resources through electronic communications and presentations from DEED’s Regional Analysts. Printed reports and resources from Minnesota’s LMI collection are required materials in the career resource areas of Minnesota WorkForce Centers. Centers may replenish materials as needed. Materials are also distributed, on request, to other employment service providers that are external from the WorkForce Center System.

Since 2002, DEED’s LMI Office charges for bulk orders of publications. The pricing of LMI materials was implemented to rationalize demand for these materials. WorkForce Centers, however, are given preferred treatment: the LMI Office establishes an annual allocation for each Center to draw-down during the year. Purchase prices reflect production costs thereby ensuring an efficient allocation of resources. The amount of the allocation is proportional to local area population.

In October of each year, annual allocations available for all WorkForce Centers, affiliate sites, and local WIBs are reset. From July 2004 through June 2005, more than $68,644.95 in products was ordered using these allocations.

Customized analysis and internal consulting services are also available to WorkForce Center staff through the Regional Analysts. Regional Analysts collaborate with local stakeholders and other researchers to develop new research and information resources. Recent projects include local labor market assessments and economic impact analyses requested by Dislocated Worker projects and economic development agencies.

Finally, DEED provides workforce development and economic development professionals with training on access and use of LMI resources. The half-day “Labor Market Intelligence for Decision-Making” and “LMI for Employer Services” trainings have been offered for seven years by DEED’s Regional Analysts; 36 sessions of these trainings were offered in PY 2004/5. In addition, “Work the Numbers: Data Analysis for Economic Developers” was offered once.
**ALMIS Database**

Continue to populate the ALMIS Database with Minnesota data.

**Focus**
System maintenance and development for One-Stop service delivery.

**Results of consultation with customers**
Data access was discussed at the state WIB’s Spring Institute. WIB members, WSA directors and partner agency representatives support DEED/LMI’s development of query-driven data access through the LMI website. Proposed enhancements included providing access to data that is scalable – regional statistics as well as small-area detail - where the data source allows.

**Support of WIA/Wagner-Peyser**
This product supports the Five-Year Strategic Plan’s goals by making information accessible in the most efficient way possible. It provides the core for web-based data-access tools as well as the base for labor market data analysis.

**Specifics**
Population and ongoing maintenance of core ALMIS Database data tables according to the structure and rules defined by the ALMIS Database Consortium. Updates to selected data tables will reflect changes in the original source data. Upgrade the Database in accordance with guidelines issued by the ALMIS Database Maintenance Consortium. Build capacity of LMI analysts to use the ALMIS Database as source research data.

**Principal customers**
This database will be used by LMI analysts and other interested parties; disclosable components of the ALMIS Database are available online for economic research analysts and government analysts. The database provides a foundation for new data access tools available for use by job seekers, students, employers, state and local WIBs, educational institutions, career counselors, DEED program managers, WorkForce Center System partners, ISEEK, and the general public. Microdata can be accessed by LMI Office analysts to address special requests.

**Customer outcomes projected**
- ALMIS-format databases with OES, LAUS, CES and QCEW statistics are available for download from DEED’s LMI website. In PY 2004-5, the site’s downloads directory handled 30,000 visits, compared to 6,800 visits in CY 2003.
- Of employers and jobseekers who have used DEED’s LMI website in CY 2004, 55 percent gave it a very favorable rating for meeting their needs – down slightly from CY 2003.

**Estimated cost:**
$80,144

Employment Projections

Focus
Data and economic analysis as well as career information.

Results of consultation with customers
The state WIB and local WIBs are supportive of projections as one approach to identifying market needs and gaps. State Colleges and Universities System institutions and other audiences are using long-term projections as supporting evidence in service planning, and education and training program planning. However, there is awareness of limitations of the projections and these audiences have appreciated DEED’s presentation of additional supporting evidence; for example, Minnesota’s Job Vacancy Survey findings.

Support of WIA/Wagner-Peyser
This product supports the Five-Year Strategic Plan’s goals by developing key data and economic analysis needed to identify high paying and rapidly growing occupations of the future. High quality employment projections support efforts to keep Minnesota businesses competitive. This is accomplished by accurately identifying shortage occupations, requisite skills, and emerging competencies. Additionally, employment projections provide information to:

- Identify and support critical occupations and industries.
- Promote career awareness and facilitate informed choices.
- Improve awareness of what services and support are needed by Minnesotans for long-term employment success.

Specifics

Principal customers
Job seekers, students, employers, state and local WIBs, educational institutions, career counselors, economic research analysts, DEED program managers, WorkForce Center System partners, economic developers, government analysts, policymakers, and the general public.

Customer outcomes projected
- Long-term projections are available on DEED’s LMI website. In PY 2004-5, the site’s projections directory handled 9,110, up about 20% from CY 2003.
- Of employers and jobseekers who used DEED’s projections reports in CY 2004, 33 percent gave the collection a very favorable rating meeting their needs; 58 percent gave a very favorable rating for overall satisfaction. This is somewhat down from last year.
**Estimated cost to LMI One-Stop:**

$160,289

Develop Occupational Analysis and Career Information Products

Continue to produce the Job Vacancy Survey and other occupational information products and incorporate such information and data into new analyses, DEED LMI’s career information website, the Internet System for Education and Employment Knowledge (ISEEK), and the annual career information publication, MnCareers.

Focus
Mitigate data gaps in occupational information and produce career information.

Results of consultation with customers
Each year, DEED conducts a user survey of counselors, teachers and program staff who oversee use of MnCareers in schools and WorkForce Centers. The survey reveals that MnCareers is a mature and well-refined product. The publication receives high-marks for organization, ease of use, graphic design, comprehensiveness of content, as well as currency and relevancy. When asked to compare this product to their “ideal”, 82 percent strongly agreed that it came close to the “ideal;” only 1 percent disagreed that it came close.

MnCareers is so popular in Minnesota that funding was contributed by three other state agencies and the National Guard. Revenue is also generated through the commercial sale of the publication. If current funding levels cannot be maintained in the future due to state budget deficits, schools, libraries, and correctional facilities will be charged for copies to close the funding gap.

Support of WIA/Wagner-Peyser
These products support the Five-Year Strategic Plan’s goals by developing key data and economic analysis needed to identify high paying and rapidly growing occupations of the future. High quality occupational and career information supports efforts to keep Minnesota businesses competitive. This is accomplished by accurately identifying shortage occupations, requisite skills, and emerging competencies. Additionally, occupational and career information products provide information to:

- Identify and support critical occupations and industries.
- Promote career awareness and facilitate informed choices.
- Improve awareness of what services and support are needed by Minnesotans for long-term employment success.

Specifics
- Implement two planned rounds of the Job Vacancy Survey. Produce statewide summary and regional highlights for publication on web and in printed brochures. Incorporate findings into other products and services, including ISEEK.
- Continue to use the EDS system to produce and update regional OES wage estimates for Minnesota’s LMI web site and Regional Salary Survey Brochures.
- Produce MnCareers 2006 and MnCareers.org. Production, printing and distribution for this product was jointly funded out of the LMI One-Stop, Minnesota State Colleges and
Universities, Minnesota Department of Corrections, Minnesota Department of Education and the Minnesota National Guard.

- Develop informational materials and support the incorporation of O*NET into Minnesota applications, products and information systems.
- Continue to maintain general career information on DEED’s web site and link users to ISEEK, MnCareers and other state career information resources.
- Make LMI data and information available to support development of ISEEK.
- Share new query system components with our interagency partner, ISEEK. Ensure contractual agreements are met when enhancing electronic delivery mechanisms of the database.

Principal customers
Education and curriculum planners, training program developers or managers, job seekers, students, employers, media, state and local WIBs, educational institutions, career counselors, economic research analysts, DEED program managers, WorkForce Center System partners, employers, economic developers, government analysts, policymakers, and the general public.

Customer outcomes projected
- Of counselors and teachers who have used MnCareers in PY 2003, 87 percent gave it a very favorable rating for meeting their needs; 91 percent gave a very favorable rating for overall satisfaction. The analysis for PY 2004-5 is not yet complete.
- Of employers and jobseekers who have used the Job Vacancy Survey in CY 2004, 55 percent gave a very favorable rating for it meeting their needs; 77 percent gave it a very favorable rating for overall satisfaction. Both ratings are slightly up from CY 2003.

Estimated cost:
$179,615

Provide Information and Support to WIBs and Produce Other State Information Products and Services

Consult with local WIBs, the state WIB, education and training providers, the employer community and other key customer groups on their LMI needs and continue to produce and develop products and services in alignment with these needs. These products and services include *Minnesota Economic Trends*, *Minnesota Employment Review*, wage detail analysis and industry profiles.

**Focus**

Data and economic analysis and One-Stop service delivery

**Results of consultation with customers**

At the state WIB’s Spring Institute, regional breakout discussions considered how LMI impacts decisions or helps in strategic planning. Participants say they use LMI to identify market-specific needs, understand gaps, and provide a “reality check” on their own thinking. The main suggestions for improvement were: connections between all the reports, conclusions, and insight into “big picture” trends. Many participants suggested additions to the LMI research agenda; DEED’s LMI Office considers these as resources allow.

The local WIBs and agency leadership find the work of the Regional Labor Market Analysts important enough to allocate $350,000 out of WIA 10 percent set aside to maintain the current staffing levels and service.

**Support of WIA/Wagner-Peyser**

These services support the Five-Year Strategic Plan’s goals by informing the decision-making of workforce development and education planners and policy makers. This is accomplished by developing key data and economic analysis needed to identify high paying and rapidly growing occupations of the future. Providing information and support to the key planners supports the following Strategic Plan goals:

- Keep Minnesota businesses competitive by supporting a flexible, skilled workforce. This is accomplished by accurately identifying shortage occupations, requisite skills, and emerging competencies for planners and policy makers who are making critical workforce system decisions.

- Support efforts to increase personal income by helping planners and policy makers identify high-paying and fast growing occupations.

- Support planning efforts by focusing research on key economic issues facing the state.

**Specifics**

DEED’s Regional Analysts serve as outreach agents and experts on the state’s employment statistics system. Throughout the year, analysts deliver presentations, briefings, seminars, and trainings to both external audiences (professional and trade associations, regional groups, conferences and “economic summits”) and internal audiences (local WIBs and partner agency
Since passage of the Workforce Investment Act, DEED’s Regional Analysts have worked with local WIBs to promote market-responsive service planning. Regional Analysts attend regularly scheduled meetings of all 16 local WIBs and are available to provide analytic, research design, and fact-finding services.

Audience consultations and the monitoring of feedback guide adjustments, as necessary, to the office’s research agenda, business plan, and marketing communications activities. Over the last few years, these adjustments have included improved data download access and the addition of new research products. When major adjustments are proposed, these are vetted with Workforce Service Area directors or WorkForce Center managers at regularly scheduled meetings.

Following is a list of products and services that will be produced.

- Validate the 2003 wage detail records by comparing wage detail records with CEW records using a methodology developed by Minnesota. Use the 2003 wage detail quarters to develop estimates of new hires, worker exits, employee turnover, multiple job holding, churning (flows), and wage distribution. Incorporate results into other products and services.
- Purchase and use the new wage records system developed by North Carolina to produce these estimates. Compare and analyze for accuracy.
- Update regional labor market profiles
- Convert labor market profiles to navigable webpages integrated into the LMI website. This effort is partly funded out of WIA 10 percent set aside allocated to the Regional Analysts.
- Attend regularly scheduled WIB meetings to determine council needs, insure proper dissemination of available information, and fulfill requests originating from local WIB meetings. This effort is partly funded out of WIA 10 percent set aside allocated to the Regional Analysts.
- Conduct statewide LMI presentations.
- Continue to produce *Minnesota Economic Trends*, a three-times-a-year publication aimed at providing useful economic and labor market analysis in accessible, non-technical language.
- Continue to produce *Minnesota Employment Review*, a monthly publication disseminating core labor market information, and incorporate monthly supplements which focus on critical labor market information issues. Migrate this from a primarily print publication to a primarily web based publication. This effort is partly funded out of WIA 10 percent set aside allocated to the Regional Analysts.
- Continue to support State College & Universities (MNSCU) System to develop a regional planning software package. This effort has been funded jointly by DEED/LMI and MNSCU.

Principal customers

Job seekers, students, employers, state and local WIBs, educational institutions, career counselors, economic research analysts, DEED program managers, WorkForce Center System partners, economic developers, government analysts, policymakers, and the general public.
Customer outcomes projected

- Excluding LMI trainings, analysts delivered 136 other presentations, briefings and seminars in CY 2003. In PY 2004-5 LMI delivered 200 presentations. Most WIB members are directly exposed to LMI through these presentations.

- Of employers who have used LMI publications—including *Minnesota Economic Trends* and *Minnesota Employment Review*—in CY 2004, 97 percent gave the collection a very favorable rating for meeting their needs; 83 percent gave a very favorable rating for overall satisfaction. Both ratings are substantially up from CY 2003.

* We now make labor dynamics data from Census/LED available on our website at [http://www.deed.state.mn.us/lmi/tools/lehd.htm](http://www.deed.state.mn.us/lmi/tools/lehd.htm). The work that we do in-house is to verify the work that is done at Census. See Attachment A for a complete list of analysis completed on the wage records file.
Support the Development of State Information Delivery Systems

Expand access to labor market and career information through the continuation of successful methods of dissemination and development of electronic delivery mechanisms to enhance and facilitate self-service access to the information contained in the ALMIS Database as well as labor market and career information publications. Continue to provide and improve public access through websites and through better marketing of information.

Focus
One-Stop service delivery and system development

Results of consultation with customers
LMI delivery systems were discussed at the state WIB’s Spring Institute. Discussion focused on analysis services offered by Regional Analysts and on online LMI resources. WIB members, WSA directors and partner agency representatives support the LMI Office’s development of query-driven data access through the LMI website. They are also interested in connections between the statistical “silos” – that is, connections between the various reports and products. They expressed interest in access to data that’s scalable – regional statistics as well as small-area detail, where the data sources allow. The LMI Office to set priorities for website upgrade guided by these consultations.

Local WIBs and WorkForce Centers expressed appreciation for the availability of firm-level contact information that is publicly shareable – not subject to Minnesota data practices restrictions – from the Employer Database. They support the current measures for making the data available, through online query or through a special request for records from LMI Office analysts. They would like to have access through a more visible web location.

Support of WIA/Wagner-Peyser
These products and services support the Five-Year Plan by providing universal access to labor market and career information. By providing universal access to data and analysis we help in the effort to “review, improve, and expand accessibility to the Minnesota WorkForce Center System and the many high-quality services available to employers and job seekers through the system.” Moreover, the outreach plan and website help us to “improve customer awareness of, and access to services” and “increase the market share of job seekers and employers served.” Finally, disseminating key information on Minnesota businesses to the workforce system can help workforce development planners “devise methods to better match businesses and unemployed workers.

Specifics
- Continue to enhance the regional page of the LMI website to provide easy access to a cross-section of LMI customized to Workforce Service Areas and other regional divisions using the ALMIS Database – see http://www.deed.state.mn.us/lmi/regional/. A portion of the funding for this is provided by the WIA 10 percent set aside allocated for the Regional Analysts.
- Continue to provide and enhance server-run charts and tables of key datasets to improve graphical interpretation of time-series datasets.
- Continue to upgrade the primary LMI website to provide improved appearance and increased ease of navigation for diverse customers including upgrades to the salary survey and CEW tools.
- Continue to produce the online version of *Minnesota Economic Trends*.
- Continue to produce the online version of *Minnesota Employment Review*.
- Continue the outreach campaign to increase awareness of electronic labor market information.
- Continue to provide customer feedback mechanisms on the website and analyze customer feedback data to guide website improvement planning.
- Enhance access to the ALMIS Employer Database through continued development and enhancement of the online query system.
- Provide technical and informational support via the LMI Analyst Helpline, and LMI email account.

**Principal customers**

Job seekers, students, businesses, state and local WIBs, educational institutions, career counselors, economic research analysts, DEED program managers, WorkForce Center System partners, economic developers, government analysts, policymakers, and the general public.

**Customer outcomes projected**

- Between CY 2003 and PY 2004-5, the number of visits to the LMI Website increased almost 200 percent.
- Of employers and jobseekers who have used DEED’s LMI website in CY 2004, 55 percent gave it a very favorable rating for meeting their needs. This is substantially down from CY 2003. Results for 2005 should allow us to determine if satisfaction is down only because the design is new and unfamiliar or because the new design is not as useful as the old design.
- The number of LMI Helpline requests handled dropped by 40 percent between CY 2003 and PY 2004-5. This is due to the fact that more and better information is available on the LMI website, thus streamlining the process of getting information to our customers.

**Estimated cost:**

$119,744

Maintenance/analysis of current web presence
Continue to enhance LMI website and data access tools

*Both of these projects got put on the back burner because other projects took priority. Our webside developer is currently working on these but it is still too soon to have a realistic idea of a completion date.
Support State Workforce and Career Information Training Activities

Increase customer knowledge and use of labor market and career information by updating, marketing and providing training in LMI and the use of career information products.

Focus
System development and One-Stop service delivery

Results of consultation with customers
LMI training of front-line workforce development professionals has been discussed in credentialing workgroup meetings convened by the WorkForce Center System. Discussions have focused on the value of the information: as a tool for jobseeker client guidance, as “reality check” evidence for advising employers, as content for seminars and Creative Job Search workshops, and as supporting evidence in preparing grant proposals. Two recommendations resulted from the discussions: First, DEED/LMI should continue offering at least 30 LMI training sessions per year; demand is strong and growing. Second, LMI content should be a larger component of the career development facilitator certification curriculum now used in Minnesota.

In Support of WIA/Wagner-Peyser
These services support the goals for the Five-Year Strategic Plan by “improving customer awareness of and access to services” and “increasing the market share of job seekers and employers served.” They also help to ensure that our analysts are effective and efficient developers and deliverers of labor market and career information.

Specifics
Update curriculum for new-analyst training with information on new wage records analysis. Hold Creative Conversation Forums for LMI staff on program changes and new analysis, products and services.

Make special training available to build analyst skills in the following areas: production of industry and occupation projections and wage records analysis, GIS, Content Management System, SAS, Access and other software and content areas as needed. Support the LMI Institute so that it continues to perform the function of organizing trainings for our staff and the staff of other states.

Provide 30 classes of “Labor Market Intelligence for Decision-making” and “LMI for Employer Services” for job counselors and other WorkForce Center staff and partners. Hold “LMI for Employer Services” and “Data Analysis for Economic Developers” as demand requires. These workshops are very popular.

Distribute training materials related to the use of career information products. This includes O*NET and Career One-Stop as well as state career information products.
**Principal customers**
State and local WIBs, educational institutions, career counselors, economic research analysts, DEED program managers, WorkForce Center System partners, economic developers, government analysts, policymakers and the general public.

**Customer outcomes projected**
- In 2003, DEED’s Regional Analysts delivered 46 half-day LMI trainings. In the first half of 2004, DEED Regional Analysts delivered 12 trainings and 96 other presentations, briefings, seminars. Training satisfaction averaged 8.1 (on a scale of 1 to 10). In PY 2004-5 Regional Analysts delivered 37 half-day trainings to 562 participants.
- LMI staff have the training and skills necessary to effectively do their work.

**Estimated cost to LMI One-Stop:**
$50,000

</table>
Approach to Customer Satisfaction Assessment

Survey-based assessments of market penetration and customer satisfaction are being undertaken to improve understanding of LMI uses and usefulness. During PY 2002, DEED/LMI launched an on-going customer feedback system, designed to measure the reception and satisfaction of the Office’s two largest customer segments. These segments include employers and job seekers. (See Table 2)

The customer feedback system involves several modes of data collection: telephone surveys of these key segments, mail-in surveys of publications readers, as well as an online survey form. Importantly, all surveys utilize a common set of customer satisfaction elements.

How Well Does DEED LMI Meet Your Needs (CY 2004)?

PPM’s surveys include four questions for businesses and jobseekers about their satisfaction with LMI products and services:

- What is your overall satisfaction with the services provided?
- To what extent have the services met your expectations?
- How well do you think the services you received compare to the ideal set of services?
- How well did the information meet your needs?

While businesses tended to respond more favorably than jobseekers, the majority of all customers gave positive responses. Almost 90 percent of the respondents said they were satisfied overall with the services they received. Almost the same percentage said the services met their expectations. More than 92 percent felt that the information they received from LMI met their needs. Business and jobseeker customers reported the greatest need for improvement in the area of how well LMI products and services compared to their ideal.

The business segment answered three additional questions about LMI products and services:

- What was the purpose of obtaining this information?
- How easy was it to find the LMI data you needed?
• How satisfied were you that the LMI data was presented in a clear, understandable manner?

The main reason given for obtaining an LMI product was to make decisions about wages and salaries (55 percent). Another 27 percent said they used the data for preparing a report. The remaining responses were evenly distributed between obtaining the product for business planning, determining worker availability, or some other purpose (i.e., to have general labor market information on hand).

The responses to the other two questions are shown in Figures 5 and 6. Again, the majority of responses were positive. Only 4 percent of respondents felt that it was not easy to find the information, and 2 percent felt that the information was not clear.

Based on this PPM survey, businesses and jobseekers rated LMI products and services satisfactory or better for accessibility, clarity, and meeting their needs.

For further information on Minnesota’s LMI customers, please go to our annual report *Who Are You?: An Overview of the Customers of Labor Market Information* which can be found on-line at [http://www.deed.state.mn.us/lmi/publications/review/0105/supp.htm](http://www.deed.state.mn.us/lmi/publications/review/0105/supp.htm)

Work Completed on the Unemployment Insurance Wage Records during 2004 - 2005

October 2004
Results on new hires and hiring establishments for first quarter of 2003 by 2-digit NAICS code, establishment size, and wage level.

November and December 2004
Results on the relationship between wages and jobs creation/destruction from 1998 to 2003.

January 2005
Results on new hires and hiring establishments for each quarter of 2003 by WSA, 2-digit NAICS code, establishment size, and wage level.

February 2005
Results on minimum wage jobs and workers from 1998 to 2003.

March 2005
Results on full-time and part-time jobs in retail trade industry by reporting pattern to the Unemployment Insurance Wage Records.

April 2005
Develop methodology to estimate the wage distribution of workers for 2003.
Develop methodology to impute hours for establishments with missing data on hours.

May 2005
Results on new hires and hiring establishments for first and second quarters of 2004 by WSA, 2-digit NAICS code, and establishment size.

June 2005
Results on the effect of job experience on wage growth.

July 2005
Develop methodology to build predecessor/successor relationships available in the ES-202 program into the Unemployment Insurance Wage Records.

August 2005
Results on new hires and hiring establishments for each quarter of 2004 by WSA, 2-digit NAICS code, and establishment size.

September 2005
Results on quarterly turnover measures for social services industries from 2000 to 2004.
Results on quarterly turnover measures from 1995 to 2004 by job and establishment.

Fall 2005
Results to be developed on the relationship between wages and multiple job holding for 2003 and 2004.
Other work during 2004 - 2005

Job Vacancy Survey
September 2004  Design and selection of sample for fourth quarter 2004
