

Chapter 9

Participant Reporting

This chapter is currently reserved.

DOL and DHHS are in the process of developing a participant reporting and data collection strategy and interface. The draft basic WtW data collection format was published in the Federal Register in October 1998 as 45 CFR Part 276.

DOL and DHHS are working in collaboration to refine and finalize the reporting and data collection system. The proposed data collection system will build upon the format published in October 1998 and include additional data elements related to targeting, eligibility, and follow-up for formula grantees. In addition, the reporting requirements contained in 45 CFR Part 276 and the new data element requirements will be extended to competitive grantees.

A completed package has been submitted and is pending OMB approval. Upon approval from OMB, Chapter 9 will be written and issued separately for inclusion in this WtW Financial Management TAG.
