

STATE OF NORTH CAROLINA
WORKFORCE INVESTMENT ACT
2003 ANNUAL REPORT

STATEMENT OF BUSINESS

North Carolina's ability to attract and retain high growth industries and existing businesses increasingly depends on our capacity to supply a skilled labor force. The North Carolina Department of Commerce supports programs that upgrade the skills of our existing workers, prepare youth and other emerging workers to enter the labor force, and reconnect dislocated workers and economically disadvantaged persons to the workforce.

Executive Messages

Michael F. Easley
Governor
State of North Carolina

North Carolina's economic health depends on the knowledge, talent and skills of its workforce to attract and retain business in our state. A well-trained workforce complements our top-rated business climate to provide for the state's long-term economic growth. Moreover, to remain competitive in the global marketplace, our workers must have those skills that are in demand by employers.

This 2003 Annual Report documents the activities made possible through funding from the Workforce Investment Act. As a result of these educational and job training programs, the lives of thousands of our citizens across the state have been improved. Our investment in a skilled workforce is ensuring our citizens reach their full potential and keep pace with the world's rapidly changing economy.

The programs offered through the Workforce Investment Act provide vital employment and training services to our state's workforce. These activities are geared toward preparing workers to meet the job demands of employers in both new and existing businesses.

The information in this Annual Report provides many facts and figures, but behind the numbers are real people who have benefited from these workforce services, through new educational and occupational skills. This workforce preparation is crucial to the success of the state's economy for today and for the future.

James T. Fain, III
Secretary of Commerce
State of North Carolina

Executive Summary

Program Year 2003 (PY03, July 1, 2003 to June 30, 2004) produced significant accomplishments for the State of North Carolina, and realized State and local performance levels above the standard. The volatile national and international economic climate presented North Carolina with a complex mix of challenges and opportunities. Our customers and our staff responded with increased levels of achievement and service that produced, once again, outcomes beyond expectations.

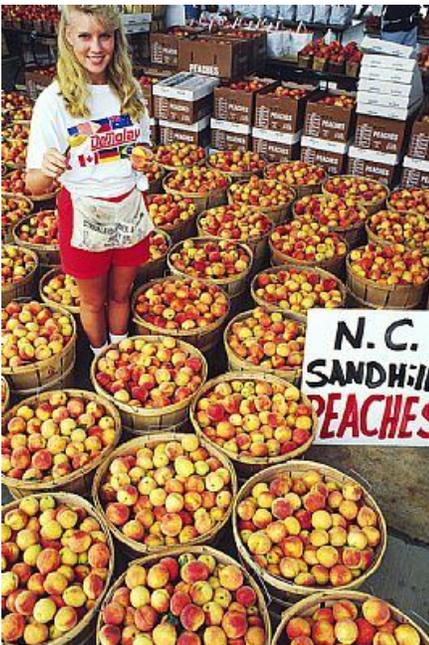

Notable highlights of our PY03 service delivery include the following:

- ◆ Enhanced capacity to assist our customers - the delivery of employer services including funding for Incumbent Workforce Development Training and on-the-job training, Rapid Response and disaster response assistance, as well as services for individuals including core, intensive, training, and youth-specific activities.
- ◆ Increased customer base for all programs.
- ◆ Success stories from businesses, communities, and individuals in all areas of North Carolina.
- ◆ High levels of meeting and/or exceeding expected performance measure outcomes, including continued high levels of customer satisfaction.
- ◆ Successful re-chartering for JobLink Career Centers across the state.
- ◆ Increased Local Area funding to finance staff support to increase accountability for participant data and performance.
- ◆ Enhanced capacity to assist our customers and offer services of proven, lasting value.

We have before us the opportunity for an even stronger alignment of services, and we will continue to work for a very positive, very successful impact on workforce development, on services, on policies, and on community and economic development.

North Carolina appreciates the opportunity to showcase our programs, our accomplishments, and our customers. We will continue to provide even more effective, efficient use of federal resources as we strengthen our skilled workforce, and as we assist in enhancing the productivity and competitiveness of the nation. We look forward to PY04 and beyond.

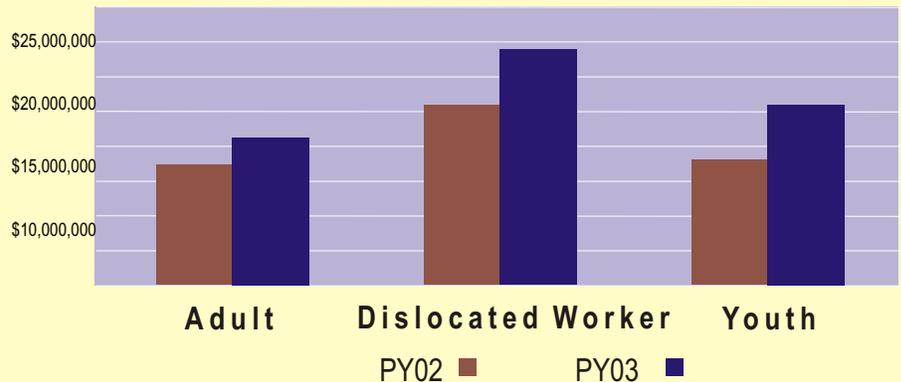

“As WIA 'comes of age', we will continue to focus more and more on our customers in planning, facilitating, and offering assistance services to individuals, businesses, and communities (Local Areas and other partnerships) across the state. The expectations of our JobLink Career Center System, WIA programs, and Workforce Boards are at a higher level now and will continue to grow as we build visibility and value around what we offer to our customers, our service delivery partners, and our other stakeholders.”

Roger J. Shackleford
Executive Director
Commission on Workforce Development

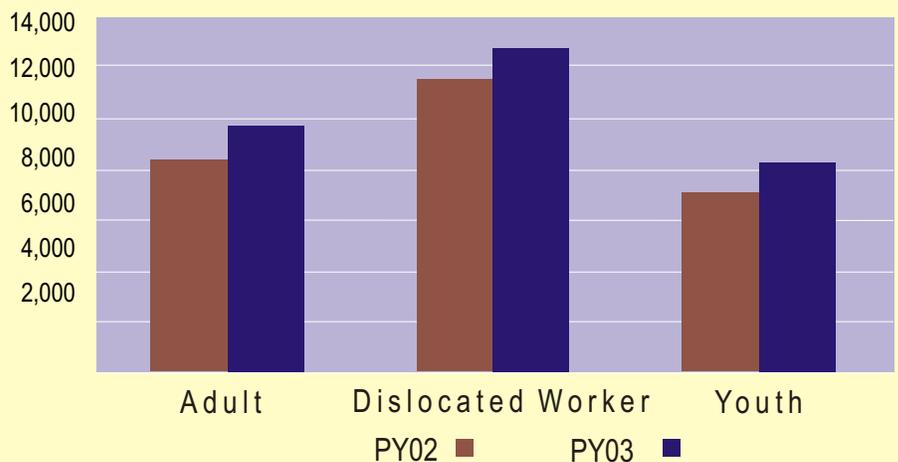

Once again, the level of WIA expenditures increased over prior years. The Dislocated Worker program expenditures (including Rapid Response activities) increased to \$24.3 million. The Adult program expenditures also showed an increase at \$18.3 million for the year. The Youth program expenditures jumped to over \$20 million for PY03. These increases in expenditures reflect the increasing demand for workforce activities across the state.

WIA Program Expenditures

Along with the increased expenditures, North Carolina also experienced a correlating increase in the number of participants served. At 12,736 served, the Dislocated Worker program continued the trend of serving the greatest number of participants (when compared to 9,871 and 8,069 for the Adult and Youth programs, respectively).

Participants Served

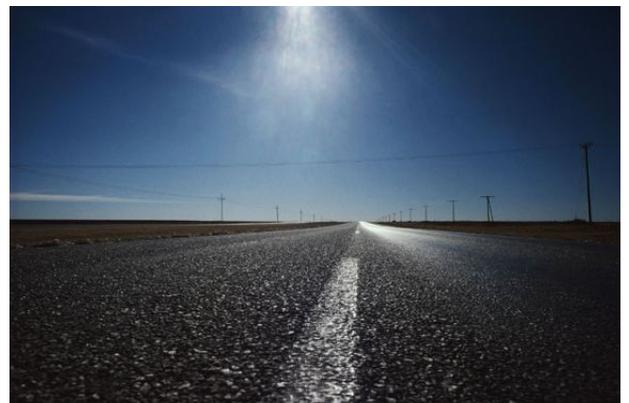

Focus on the Future, Program Year 2004

As our State continues to assist customers in a recovering economy, North Carolina will strive to maintain and to grow the capacity of state and local service deliverers to assist and to offer programs of proven value. For existing business and industry, that means a continued focus on programs and services designed to strengthen their capacity to grow and expand. For new business and industry, that means the provision of programs and services designed to strengthen their capacity to be viable contributors to our economy. For our citizens, that means continued provision of opportunities and activities designed to increase their educational levels and portable skills.

A vital part of our focus on the future will center on WIA partnerships, on building and enhancing WIA services, and on expanding our service alignments. With dedicated and talented human resources, and short-term and long-term strategies in place, North Carolina will work toward even more effective, more efficient use of WIA resources.

The following are highlights of our PY04 focus on the future:

- ◆ Continued enhancement of demand-driven programs, with emphasis on academic training, technical training, and career pathways.
- ◆ Continued provision of WIA programs designed to match international, national, state, and local economic trends.
- ◆ Continued enhancement of our partnerships. More important than ever are our links with ESC (Employment Security Commission), VR (Vocational Rehabilitation), North Carolina Community Colleges, and other education, training, and career-centered resources across the state.
- ◆ Continued planning for WIA re-authorization efforts by continuing to research and prepare for the federal re-authorization initiative.
- ◆ Emphasis on statewide accountability. North Carolina will work with Local Areas to sharpen an across-the-board emphasis on data validation and the associated processes of error analysis and correction.
- ◆ Continued assistance for businesses in programs such as Incumbent Workforce Development, on-the-job training, customized training, and other customer-based, production-boosting services.
- ◆ Continued strengthening of a growth-oriented business environment. We will continue to provide enhanced support and partnerships with state and local economic planners and developers.
- ◆ Continued opportunities for all segments of our workforce - emerging workers, workers in transition, incumbent workers, and current workers.

North Carolina Successes ... A Closer Look

The success stories highlighted in this 2003 Annual Report, while impressive, are but a small sample of the successes enjoyed by our workforce development customers all across North Carolina. These success stories are selected because they help illustrate the range and depth of available WIA services and the range and depth of our statewide workforce development network. We salute these men, women, and businesses, individually and collectively, and the many others like them in the 24 Local Areas and 100 counties of North Carolina, for their hard work, their perseverance, and their vision. We congratulate them for achieving their goals, for adding to their accomplishments, and for exemplifying effective, efficient use of WIA resources.

Two Northwest Piedmont Job Training Consortium projects receive awards for innovation from NADO¹

Project Fresh Start

This award-winning program offers convicted felons, ages 17 to 25, a chance for a “fresh start” with an intense, 12 week job-readiness and job-retention training program. A collaborative effort between a number of community resources including the Winston Salem State University Center on Community Safety, the Winston Salem Urban League, the Winston Salem Police Department, the North Carolina Attorney General's Office and Court System, and various other Local Area resource groups, this project was selected for its innovative, in-depth, zero-tolerance approach to assisting recently-released felons in their quest for re-entry into the workforce. Project Fresh Start was initially funded with a grant received by the Center for Community Safety; subsequent funding comes from WIA as well as other collaborating agencies.

Mount Airy Youth Resource Center

Since its opening, this Resource Center has provided one-stop employment and support services for over 150 Surry County youth and their parents. Located in a renovated school, the Mount Airy Youth Resource Center features a touch-screen kiosk that advertises Local Area information and referral resources as well as GED (general equivalency diploma) and ESL (English as a second language) programs, both of which are conducted on-site, with childcare. Funding for this project is provided by WIA and several other community agencies.

Visit www.AccessPiedmont.com for more information.

¹In August of 2004, the National Association of Development Organizations (NADO) announced that these two Northwest Piedmont Local Area projects had won Innovation Awards. “Since 1986, the Innovation Awards Program at NADO has recognized organizations that have demonstrated innovative approaches to economic and community development. Each year the selected projects are highlighted in a special issue of the Economic Development Digest, which is published in July and distributed to NADO members, federal and state officials, the media, and members of Congress.” NADO, founded in 1967 as a public interest group, is “... the leading advocate for a regional approach to community and economic development ...”. For additional information, please visit www.nado.org.

Perdue Farms enjoys the benefits of Incumbent Workforce funding at its Concord location...

According to Beth Wanke, Human Resources Manager at the Perdue Farms Concord location, the Incumbent Workforce funds that her company received “enabled us to do some additional training we would not have been able to do without that grant. This was especially critical to us this year because we expanded. Even with all the extra hiring we did this year, we were able to improve our efficiency. We added over 100 associates at this 7-day-a-week facility, and we have several very specialized, very specific jobs that we were able to add training for. These jobs are potentially life-threatening as they involve an ammonia refrigeration system.”

Perdue used the funds to conduct specialty training for 10 Refrigerator Mechanics and to send an additional 25 employees to the Rowan-Cabarrus Community College for supervisory training.

Ms. Wanke attributed the efficiency at the Concord location in part to the WIA Incumbent Workforce funding, “We could have gotten by without the training but we would not have excelled the way we did without it. In combination with the many improvements and our record at this location, we have gotten approval to expand and install an additional line that will add 100 to 150 jobs this year. This expansion could have gone to [our locations] in Tennessee, Virginia, or Georgia but we were chosen because of everything that happened here so efficiently.”

In August 2003, the WIA Incumbent Workforce funding was approved by the Centralina Workforce Development Board and the Centralina Workforce Development Consortium. The training began in October 2003 and ended in May 2004. Staff at the Rowan-Cabarrus Community College and the Centralina Workforce Development Consortium assisted in this project.

*From Layoff to Law Enforcement,
Davidson County Local Area...*

After graduating from high school, Ms. Taylor sought employment in manufacturing positions - the primary type of employment for local citizens in Thomasville, NC. Ms. Taylor was able to support herself and her daughter without child support or public assistance. In addition to her responsibilities as a single parent, Ms. Taylor felt that it was

important to provide care to needy children through the foster care program. At age 29, Ms. Taylor was a single parent caring for an eight year old daughter and two foster children. However, Ms. Taylor’s financial status changed with her layoff as an inspector at \$12.55 per hour from a local furniture manufacturer. Due to limited options in the manufacturing field, Ms. Taylor visited the local JobLink Career Center for help. Through much self-reflection, she decided to pursue a career in law enforcement. Ms. Taylor had a strong desire to give back to her community and she felt this was the best way she could do that. By early 2003, Ms. Taylor had attained the scores necessary to enter the Basic Law Enforcement Training program at Davidson County Community College. The WIA Dislocated Worker fund paid for the training and associated costs of the class. On December 26, 2003, almost one year to the day of being laid off from the furniture plant, Ms. Taylor was sworn in as the newest officer of the local police department. She is currently earning \$27,000 per year, nearly an \$8,000 increase from her prior employment as an inspector at the furniture plant.

Lumber River Council of Governments' WIA funds assist Robeson County man in career change...

Married with two children ages 15 and 9, Mr. Locklear was working as a teacher assistant with the Robeson County Public Schools. He had formerly worked as a scale technician at \$9.65 per hour - a scale technician calibrates, installs, repairs, and programs different kinds of weighing scales but in recent years found that there was no demand for a scale technician in the Lumber River vicinity.

Mr. Locklear came to the JobLink Career Center hopeful that he could find an opportunity to work for a stable company that offered good pay, good benefits, and room for advancement. He entered the Adult WIA program and, after researching the job market, decided to try CSX training at the University of Northern Florida. CSX Corporation is the parent company of a number of subsidiaries that provide freight transportation services across America and around the world.

Honoring its commitment to customer choice, the Lumber River Council of Governments gave its approval for the JobLink Career Center to assist Mr. Locklear in the 5 week, intensive training program. As a condition of acceptance for the training program, a trainee is guaranteed a job interview and must be willing to live within 30 minutes of the city limits of the job. CSX employment opportunities in North Carolina are in Hamlet, Charlotte, Rocky Mount, and Wilmington, and in the

southeastern United States, in Florida, Alabama, Maryland, South Carolina, Louisiana, and Virginia.

Immediately upon completing the training in May of 2004, Mr. Locklear was offered a job as a Freight Conductor with CSX in Hamlet. A Freight Conductor is a key member of a train crew, responsible for all aspects of train yard safety and for overseeing road operations for freight trains. A Conductor gives directions and signals to the engineer and other members of the train crew. Being a Freight Conductor requires expertise in teamwork, in problem solving, in communications, and in agility - a Freight Conductor must handle the controlled track switches that change engine and train car routes, must set and release hand brakes by hanging on grab irons or car ladders, and must, in the same manner, perform industrial, station, and yard switching movements.

Mr. Locklear reports that he is happy to be working at his job and is excited about the future. CSX Freight Conductors average a starting wage of more than \$15 per hour and earn excellent benefits.

Youth Getting Back on Track...

From the age of 12, Mr. Bryant bounced between his divorced parents' homes, moving often and working to support himself. He left high school 4 times, but always returned, determined to complete his education. In May of 1998 at the tender age of 14, Mr. Bryant found himself homeless and without a high school education. For the next several years, he moved about, working odd jobs, and making several unsuccessful attempts to get back on track in school. In the spring of 2001, Mr. Bryant eventually reconnected with his mother and decided to change his life around. He enrolled as a WIA Youth participant with the Scotland High School's Out-of-School Program and obtained his GED at Richmond Community College's Scotland Center. Mr. Bryant became a cadet in the NC Guard Tarheel Challenge Academy and received several awards and recognitions. Mr. Bryant has enlisted in the United States Army and is awaiting certification to Basic Training.

Our Service to Employers

In transition with an economy that continued to show hopeful signs of recovery and growth, North Carolina employers worked to strengthen and expand their businesses in PY03. North Carolina workforce development providers focused their WIA programs on benefiting employers with services such as training, staffing, labor market analysis, and Rapid Response assistance. These WIA program and service options are administered and provided through local Workforce Development Boards, JobLink Career Center systems, and other collaborating agencies across the state. These are some of the employer-directed WIA services and programs available in North Carolina:

- ◆ JobLink Career Center services - With this one-stop service delivery system, employers can recruit qualified job candidates, post job listings, and obtain current labor market information.
- ◆ Rapid Response services - As soon as the Dislocated Worker Unit of the Division of Employment and Training receives notice of any substantial layoff or plant closure as required by the Worker Adjustment Retraining Notification (WARN), or when North Carolina becomes aware of such an event through other sources, the Governor's Rapid Response Team, a function of the Dislocated Worker Unit, can provide Rapid Response services regardless of the reason (e.g., Trade; NAFTA-TAA; downsizing and/or restructuring; federal action impacting defense, timber or fishing industries; natural disaster; plant relocation; bankruptcy; etc.) for the dislocation. In PY03, the Dislocated Worker Unit received 129 WARN notices².

- ◆ On-the-job training (OJT) program - In the OJT program, participants can “learn and earn” while they are working. This is an employer-structured service, with WIA funding available in PY03 for up to 50% of an individual's wages for the period of training.
- ◆ Incumbent Workforce Development training program - This program is geared toward producing a versatile, more highly skilled workforce that will help create an environment conducive

to business expansion and growth. Incumbent Workforce funding is available only to established North Carolina businesses, and offers training funds for current workers to establish and/or upgrade occupational and educational skills. In PY03, North Carolina provided \$4 million in statewide Incumbent Workforce funding. Businesses apply through the Local Area Workforce Development Boards for grants (up to \$50,000 per training initiative in PY03). A grant is first approved locally by the Board and then at the state level.

- ◆ Customized training program - This program is tailored to an employer's unique needs, and is applied for and negotiated through the JobLink Career Center system. In this program, the employer pays not less than 50% of the training costs.

²Of these 129 WARN notices, 48 were reported as permanent layoffs, 21 were reported as temporary layoffs, and 60 were reported as permanent closures.

Spotlight on the Incumbent Workforce Development Program

A program being offered through the Davidson County Workforce Development Board aims to help employers train and educate workers ...

"I think this is a great economic and workforce resource for our employers", said Pat Everhart, staff director to the Davidson County Workforce Development Board.

Ms. Everhart explained that occupational training can be specialized to a company's needs to better prepare employees for their jobs and that education and training can include literacy, basic skills, and English as a second language. Only one Davidson County company received funding last year, but Everhart anticipates an increase in applications this year.

"I think the program was very successful last year and I think it will continue. Everything we've heard statewide has been very positive. I think the State wants to have as many tools [as possible] out there to help companies be competitive in the new economy. It's all about helping the company and employees improve productivity", Everhart said.

Incumbent Workforce funding is available to any private or private non-profit business that has been in business in North Carolina for the 12-month period prior to the application date. Companies also must be current on state tax payments and training must occur at a facility in North Carolina.

Our Service Delivery System

[The Commission on Workforce Development](#) - The Commission is North Carolina's Workforce Development Board at the state level. The Commission is appointed by the Governor and is responsible for developing strategies to produce a skilled, competitive workforce that meets the needs of the state's changing economy; for advising the Governor, the General Assembly, and state and local government agencies on policies and programs to achieve this goal; and for coordinating the provision of workforce development services between academic, governmental, and business sectors of North Carolina. The 38-member Commission is comprised of state government officials and citizens appointed by the Governor as representatives of education, labor, community-based organizations, and business and industry.

The Commission staff provide support to the Commission and its committees, serve as advisors to the North Carolina Secretary of Commerce on workforce issues, and conduct workforce development research and analysis.

The Commission on Workforce Development's mission:

"To establish and guide a world class workforce development system for North Carolina. This system will be comprehensive, integrated, relevant, and effective. It will produce well-educated, highly skilled workers who perform at high levels and work in economically viable enterprises that provide good jobs at good wages".

[The Division of Employment and Training \(DET\)](#) - DET is the agency designated by the Governor as the state's administrative agency and grant recipient for Workforce Investment Act funds. With emphasis on results-oriented and customer-focused use of our financial and human resources, DET pilots our workforce development programs in the areas of Planning, Monitoring, Performance Analysis, Dislocated Worker Services (including Rapid Response assistance), Information Systems, and Financial and Administrative duties. In assisting the 24 Local Areas, the Commission, and other workforce partners across the state, DET emphasizes effective, efficient use of resources and service to citizens and businesses alike.

The Workforce Development Institute (WDI) - The WDI provides for the unmet staff development and training needs of staff and volunteers working within the North Carolina workforce development system, in order to enhance the provision of quality employment and training services to customers. The WDI strives to provide meaningful, interactive, quality training and to transfer learning to its customers. WDI offerings are based on job functions, major responsibilities or tasks as prioritized by "best practitioners", and determined by ongoing needs-assessments surveys, needs identified on training evaluations, or direct requests. Beyond development of contracted training, other projects of the Institute are leadership issue forums, coordination of interagency training for One-stop implementation sites, clearinghouse of core curriculum for workforce development direct-services staff, and certification of workforce development professionals. The WDI also hosts North Carolina's annual conference on workforce development. The 2003 North Carolina Workforce Development Partnership Conference emphasized the state's changing economy. The annual conference had over 900 attendees in 2003 with a theme of "Preparing North Carolina's Workforce For A New Economy".

The Local Areas - North Carolina's local delivery system for services under WIA is comprised of 24 Local Areas. Established in accordance with WIA requirements, the Local Areas receive their policy directives from their Workforce Development Boards. The Boards oversee the activities of the Local Areas.

Using continuous quality improvement techniques, North Carolina's Local Areas administer WIA Adult, Dislocated Worker, and Youth funds. In addition to coordinating community alignment of services with public service providers, non-profit, private service providers, and/or for-profit, private service providers, the Local Areas monitor local and regional employment trends and patterns. A vital function of the Local Areas is the development of plans and activities to address local workforce development conditions and future needs.

The Workforce Development Boards - In partnership with federal, state, and local governments, the local Workforce Development Boards are responsible for planning, overseeing, and coordinating workforce initiatives at the local level. Authorized by the Workforce Investment Act of 1998 and appointed by local elected officials, the Workforce Development Boards are comprised of volunteers from both the private sector and the public sector. By law, every board must have a majority of its members from the private sector. There are 24 Boards that serve North Carolina's 100 counties.

"I'm excited about the progress that North Carolina has made in workforce development. We've come through some real economic struggles and that has just encouraged us to work harder. We are spending our dollars wisely in areas where we need it most. We're prudently expending the public's funds."

"Workforce Development Boards are pulling together all the various functional areas of workforce development into one group effort. We are not duplicating efforts, rather we are complimenting each other's efforts. I think we are seeing some good, positive results. For businesses and individuals, WIA is one of the best pieces of legislation ever passed."

Robert Barham
Current Chair, Capital Area Workforce Development Consortium
Vice-chair, PY03 and PY02
Retired, Personnel Relations Manager, CP&L (a Progress Energy subsidiary)

North Carolina

Career Planning, Training & Placement Services

North Carolina's JobLink Career Centers support a "One-stop" network - a cohesive system of workforce development that aligns partner services and programs with WIA services and programs at universally accessible, strategically located facilities across the state. Since partner service providers are co-located in the JobLink Career Centers, both citizens and employers can access a wide range of customer-oriented services in one location. The JobLink Career Centers provide the critical connection between employers and qualified workers and between workforce development staff and the communities we serve.

North Carolina's 110 JobLink Career Centers offer resources such as email access, fax services, skills and interest inventory assessments, testing to determine education levels, current labor market information, career training and counseling, job placement services, resume writing assistance, and access to skills upgrading and re-training. The JobLink Career Centers are staffed by workforce development professionals.

The JobLink Career Centers offer WIA programs that target particular segments of the population - Adults, Dislocated Workers, Older Youth, and Younger Youth. WIA services are available at core, intensive, training, and youth activity levels. Core activities are available at a self-service and/or staff service level and include items such as screened referrals (testing and background checks required by an employer) and follow-up services (including counseling). Intensive services include activities such as comprehensive and specialized assessment and job referral and placement. At the training level, services such as job readiness training and occupational skills training are offered. For youth, services such as leadership development and positive social behaviors are available. For all of these WIA services, the timing and variety of activities depends entirely on the circumstances of the individual WIA participant.

JobLink Career Center Vision

"To improve North Carolina's workforce and strengthen our state's economy by developing a system of JobLink Career Centers that offers labor market information, provides access to career training and job placement services, and serves as the connection between employers and qualified workers."

Dislocated Workers

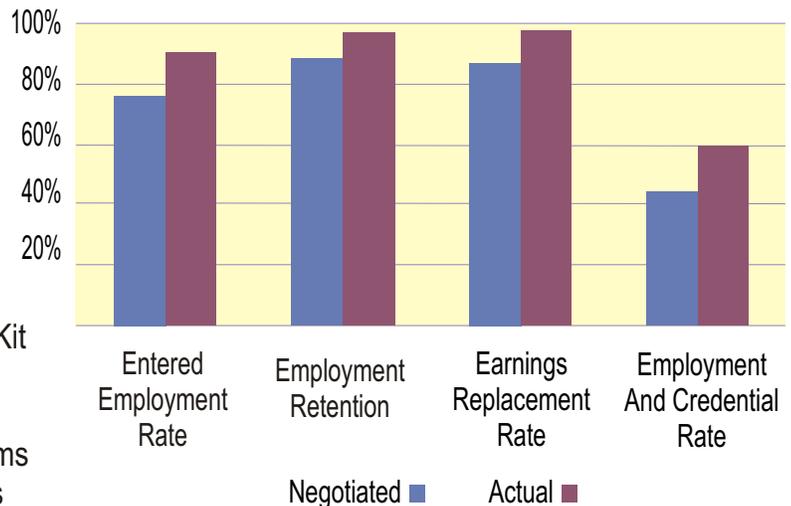

For the 4th consecutive year, North Carolina's Dislocated Worker program saw an increase in numbers of individuals served. The rate of increase slowed somewhat over previous years' rates of increase, however, as our jobs market paralleled signs of a slight economic upturn at both the national level and the state level.

The reasons for worker displacement are varied - a permanent layoff, a temporary layoff, a plant closure, a termination, an inability to return to a "usual" occupation or industry because of foreign competition and/or lack of demand for skills, the economy or a natural disaster has put an individual out of work, or a life situation has meant that a displaced homemaker must now re-enter the job market in order to support the household.

Working with displaced workers on an individual basis, North Carolina JobLink Career Centers continued to assist dislocated workers by providing a variety of services and programs. The services might include education and training assistance, career counseling, resume assistance, self-assessment tools, and current labor market information. In addition to these kinds of services and activities, central to the WIA experience for all participants, the Dislocated Worker program offers dislocated worker-targeted assistance services such as Rapid Response and the self-service Dislocated Worker Transitional Tool Kit (see inset).

In PY03, North Carolina's Dislocated Worker programs served 12,736 participants. In number of participants served, this represents a 10%³ increase over PY02. To assist in serving this increase in number of Dislocated Workers, North Carolina provided supplemental WIA funds in the amount of \$8,000,000 to Local Areas.

Dislocated Workers

³Dislocated Workers Served in PY03 = 12,736; Dislocated Workers Served in PY02 = 11,540; Dislocated Workers Served Increase = 1,196; Approximate Increase in Percentage Served = 10%.

The *Dislocated Worker Transitional Tool Kit* is an "a to z" of how to get a job in today's market. It is designed for workers who have experienced a layoff or who have been displaced because of divorce or death or other life circumstances.

New in PY03, the Dislocated Worker Transitional Tool Kit offers an online compilation of job search materials. It features a wealth of information including links and/or website addresses for JobLink Career Centers, the Department of Labor (DOL), the Employment Security Commission (ESC), credit counseling organizations, and self-assessment inventories, as well as links to free email accounts, job listings and vacancies, and resume services. It also gives information on obtaining Internet access, steps to take in looking for a job, resume instructions and samples, tips on interviewing, and information about how to explore the hidden job market through networking sources.

The Dislocated Worker Transitional Tool Kit was developed and is maintained by the Dislocated Worker Unit at the Division of Employment and Training. Visit www.dwtoolkit.com for additional details.

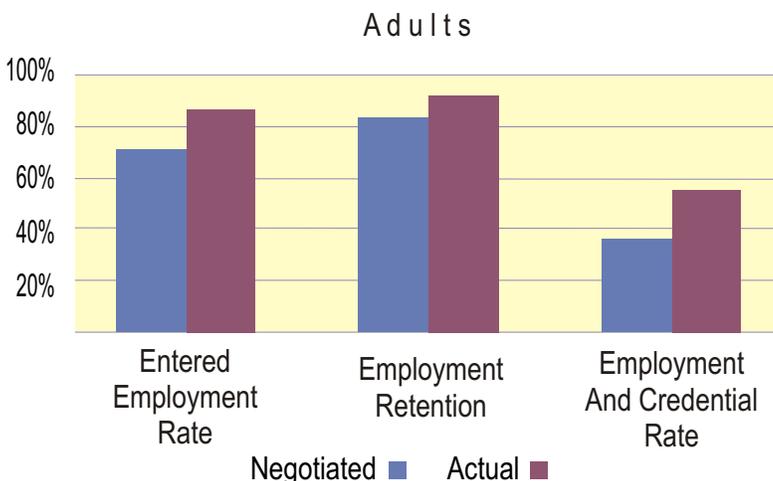

Adults

With the economic climates of North Carolina and the nation both exhibiting hopeful signs of recovery, the Adult WIA program in PY03 continued to experience an increase in its customer base. The JobLink Career Centers, working to deliver a variety of services aimed at adult and economically disadvantaged customers, provided an array of services ranging from education and training assistance to individual career counseling to job referrals and placements. Services such as resume writing, assessment tools, group counseling, current labor market information, and entrepreneurial training are also available. These Adult programs and services, like all WIA programs and services, are designed to boost the educational, vocational, and technical achievements and abilities of North Carolina's workforce, to make it more skilled, more productive, and more competitive in today's global economy.

During PY03, North Carolina determined that financial resources should be made available specifically to sharpen the Local Area focus on accountability in the areas of participant data and performance. To strengthen that effort, North Carolina committed \$50,000 per Local Area for two years. These funds are for staff dedicated to this effort, with the expectation that the investment will enhance the overall quality of our (statewide) data and performance.

In PY03, North Carolina's WIA programs for Adults served 9,871 participants. In number of participants served, this represents a 15%⁴ increase over PY02. To meet this growing demand and need for services, North Carolina provided \$3,000,000 in supplemental WIA funds to Local Area providers of Adult services.

⁴Adults Served in PY03 = 9,871; Adults Served in PY02 = 8,579; Adults Served Increase = 1,292; Approximate Increase in Percentage Served = 15%.

Youth

Education, graduation, work experience, on-the-job training (OJT) - these elements and many more are available to youth as part of North Carolina's WIA service delivery. Our Youth programs provide options such as year-round employment and training services for both in-school and out-of-school youth. Local Areas across North Carolina provide academic and career-related opportunities, both of which are designed to expose youth to the world of education and work. These programs are designed to assist youth in acquiring the skills and knowledge necessary for getting and keeping a job and for advancing in employment. North Carolina is committed to providing youth participants with well organized, market-driven activities and services that will enable them to expand and improve their life skills, employment skills, and employability levels.

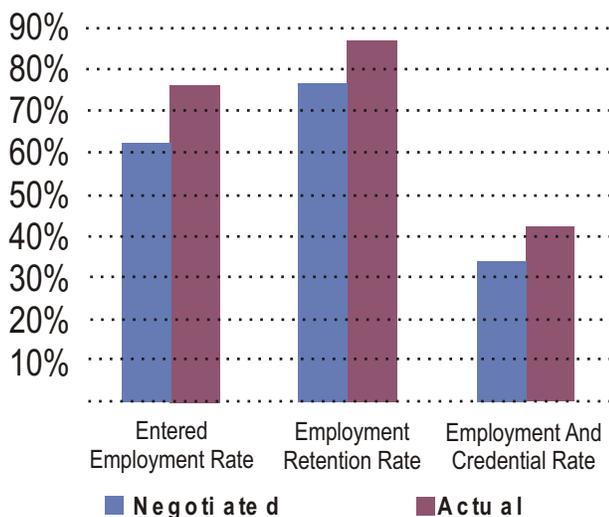

North Carolina commends the efforts of the Local Area Workforce Development Boards to design and develop the initial components of a Local Youth Service Delivery System. To support this on-going effort of improving the System, North Carolina committed \$700,000 in PY03 (this commitment was in addition to Youth formula funds committed for that program year).

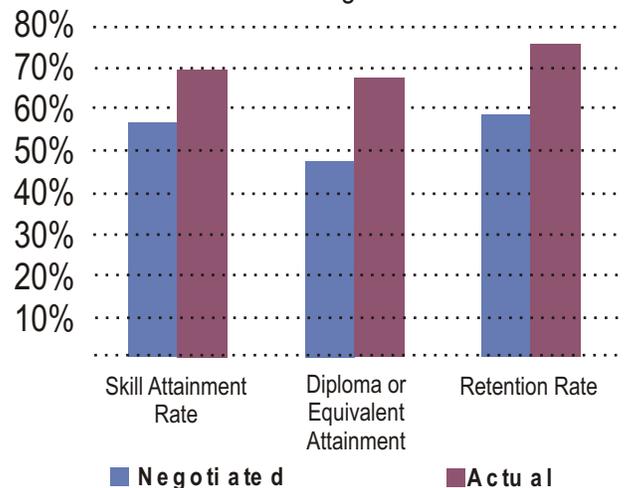

In PY03, North Carolina's WIA programs for Youth served 8,069 participants. In number of participants served, this represents a 14%⁵ increase over PY02.

⁵Youth Served in PY03 = 8,069; Youth Served in PY02 = 7,070; Youth Served Increase = 999; Approximate Increase in Percentage Served = 14%.

Background

Since the 1930s, national and state governments have been involved in workforce development. Within the past decade, North Carolina's workforce development has centered more and more on service delivery coordination and alignment of our resources and programs toward the delivery of market-driven services for our citizens, businesses, and communities. These services are specifically designed to strengthen our workforce, to make it responsive, adaptable, capable ...ready to meet the challenges of an increasingly competitive, increasingly global economy. The following paragraphs chronicle our recent workforce development efforts.

1993 - North Carolina established the Commission on Workforce Development. The Commission was charged with strengthening connections and improving coordination between workforce programs (for dislocated workers, adults, and youth), adult education and literacy programs, vocational rehabilitation programs, and vocational education programs.

Subtitle B - Statewide and Local Workforce Investment Systems.
SEC. 106. Purpose. 29 USC 2811.
"The purpose of this subtitle is to provide workforce investment activities, through statewide and local workforce investment systems, that increase the employment, retention, and earnings of participants, and increase occupational skill attainment by participants, and as a result, improve the quality of the workforce, reduce welfare dependency, and enhance the productivity and competitiveness of the Nation".
PUBLIC LAW 105-220 - AUG 7, 1998.
112 STAT.945.

1995 - With the receipt of a US Department of Labor One-Stop implementation grant, North Carolina funded a state-wide initiative to establish a One-Stop service delivery system to provide workforce development service at strategically located centers across the state. North Carolina named its One-Stop system "JobLink Career Centers". Workforce Development Boards at the Local Area level, (formerly local, private-industry councils), became responsible for governance of the JobLink Career Centers.

1998 - The Workforce Investment Act is signed into law - see inset.

2000 - Under the guidance of Workforce Development Boards at the Local Area level, North Carolina implemented Title I of the Workforce Investment Act of 1998. The Division of Employment and Training (DET), a branch of the State Department of Commerce, became the administrative agency for WIA Title I

funds. North Carolina implemented *WorkforcePlus*, the management information system that supports WIA, and the North Carolina State Training Accountability and Reporting System (STARS), an internet-based, Eligible Training Provider (ETP) system. With almost \$29 million in federal expenditures, the WIA program in North Carolina served 5,500 Dislocated Workers (1,200 were exited), 4,100 Adults (1,200 were exited), and 3,500 Youth (500 were exited)⁶.

2001 - The United States experienced terrorist attacks that left thousands dead, hundreds wounded, and businesses blown apart.

These attacks left our Nation in emotional turmoil. The economy entered a period of widespread layoffs, uncertainty, and financial turbulence. With an unemployment rate of 6th highest in the country, North Carolina WIA expenditures rose to \$41.2 million - with those funds we served increasing numbers of program participants. In the Dislocated Worker program, 9,000 were served (2,400 were

exited); in the Adult program, 6,600 were served (1,900 were exited); in the Youth program, 5,600 were served (1,300 were exited)⁶.

2002 - North Carolina continued to serve increasing numbers of program participants. In the Dislocated Worker program, 11,500 were served (2,800 exited); in the Adult program, 8,500 were served (2,500 exited); in the Youth program, 7,000 were served (1,900 exited). WIA expenditures rose to \$53.4 million and our unemployment rate stood at 5th highest, nationally⁶.

⁶For reference purposes, these figures are rounded (down) to the nearest hundred. See the Performance Measure Outcome section of the appropriate Annual Report for the exact figures. The Youth figures combine statistics for Older Youth and Younger Youth but are categorized separately in the Performance Measure Outcome sections of the Annual Reports.
