

[illegible]

Overview

County-to-county worker flows examine interconnections between the state's counties. This publication provides estimates for the commuting destination of county residents, the origin of county workers, and the typical travel times of county residents. Each page represents one of Wisconsin's 72 counties.

Please contact the Office of Economic Advisor's economist in your region (see below) for more information about county-to-county workflows or for workforce information in general.
