<b>Amount:</b>	\$4,826,073
<b>Key Partnerships:</b>	Community colleges; Joint Apprenticeship Training Committees (JATCs); regional Workforce Investment system; Ohio electrical contractors (NECA) and labor (IBEW); Helmets to Hardhats program
<b>Project Description:</b>	The Ohio Green Renewable Opportunities for Workers (GROWs) project utilizes 19 existing industry training centers to provide green skills training to dislocated and incumbent workers in Ohio, including 44 counties impacted by automotive-related restructuring. The project focuses on a registered apprenticeship model and will work in concert with local Jobs and Family Services offices to transition participants who are dislocated from jobs in the auto industry to explore green careers.
<b>Proposed Outcomes:</b>	The Ohio GROWs project will provide training for 1,288 participants who will earn nationally recognized certificates from the National Joint Apprenticeship Training Committee (NJATC), as well as college credit through the University System of Ohio. The project will develop an operational manual to provide a step-by-step implementation model of the scope of work encompassed by the project.
