Annotated Sample FOA

Introduction to the Tool

The U.S. Department of Labor’s (DOL) Employment and Training Administration (ETA) is responsible for awarding competitive grant funding to organizations to support a variety of priorities in employment and training programming and services. This tool is designed to help organizations that are “new” to the grant-making process become more familiar with Funding Opportunity Announcements (FOA) and with how their applications will be evaluated. This tool will enhance your ability to respond to FOAs and be better positioned for funding consideration.

The annotated FOA is an actual FOA that ETA published in the winter of 2015. Annotations throughout the document include advice on how to respond to particular sections, hints on areas of FOAs that can be particularly challenging, suggestions for avoiding common pitfalls, and links to direct you to helpful Web sites and additional outside resources used by successful applicants. Following these tips will help you to deliver a more competitive application.

You should note that FOAs reflect the goals and priorities of ETA and the Administration at the time of development and publication. Each FOA is customized to the needs of the respective program office within the agency. The FOA featured in this tool was issued in the winter of 2015 and may not necessarily reflect the focus or content of future solicitations. In addition, requirements and specific areas, such as types and delivery of training, targeted populations to be served, and performance outcomes, will vary across each FOA. All references provided in this tool are for informational purposes and do not guarantee funding.

Using the FOA tool is simple.

Annotations

Annotations to FOA text are noted by yellow comment note icons on the left side of your screen. Links to the text of each comment note on the page are provided on the right side of your screen. To print the FOA text and the comments annotation text on side-by-side pages, please follow these instructions:

1. Click File on the main document menu;
2. Click Print;
3. Select your desired Printer Name from the list;
4. Choose the Pages you wish to print, or select All to print all FOA and comments text pages; and
5. Click OK.
U.S. DEPARTMENT OF LABOR
Employment and Training Administration

Notice of Availability of Funds and Funding Opportunity Announcement for the American Apprenticeship Initiative

Announcement Type: Initial
Funding Opportunity Number: FOA-ETA-15-02
Catalog of Federal Domestic Assistance (CFDA) Number: 17.268

Key Dates: The closing date for receipt of applications under this announcement is April 30, 2015. Applications must be received no later than 4:00:00 p.m. Eastern Time.

Addresses: Mailed applications must be addressed to the U.S. Department of Labor, Employment and Training Administration, Office of Grants Management, Attention: Sara Gallagher Williams, Grant Officer, Reference FOA-ETA-15-02, 200 Constitution Avenue, NW, Room N4716, Washington, DC 20210. For complete application and submission information, including online application instructions, please refer to Section IV.

Executive Summary: The Employment and Training Administration (ETA), U.S. Department of Labor (DOL, or the department, or we), announces the availability of approximately $100 million in grant funds authorized by Section 414(c) of the American Competitiveness and Workforce Improvement Act of 1998 (ACWIA), as amended (codified at 29 USC 2916a), for the American Apprenticeship Initiative.

These grants are financed by a user fee paid by employers to hire foreign workers into the United States under the H-1B nonimmigrant visa program. This initiative is intended to provide a catalyst in supporting a uniquely American Apprenticeship system that meets our country’s particular economic, industry and workforce needs. American Apprenticeships (also referred to as Registered Apprenticeships) are innovative work-based learning and post-secondary earn-and-learn models that meet national standards for registration with the U.S. Department of Labor (or federally recognized State Apprenticeship Agencies). Grants funded by this initiative will support dynamic and sustainable public-private partnerships that:

- Support the expansion of quality and innovative American Apprenticeship programs into high-growth occupation(s) and industry(s), particularly those for which employers are using H-1B visas to hire foreign workers, and the related activities necessary to support such programs (see Appendix A or visit the Foreign Labor Certification Data Center);
- Create career pathways that encompass American Apprenticeship and align with other post-secondary educational offerings;
- Use strategies to significantly increase apprenticeship opportunities for job seekers and workers (particularly for women and other underrepresented populations in apprenticeship, including young

1 See Appendix B for Elements of Innovation
Note 1

**FOA Deadlines:** One of the most common pitfalls in grant application is failing to meet the deadlines in the FOA. Applicants will generally be given 30 to 60 days to respond to an FOA once it is published. Applicants should immediately make note of the FOA closing date and time as these are not flexible. If applicants begin working on a FOA a few days before it is due, they will most likely not have time to meet the deadline with a strong application.

Note 2

**Where to Find Open FOAs:** Applicants can find a list of all ETA FOAs in ETA’s Grants and Contracts page at http://www.doleta.gov/grants/find_grants.cfm. Applicants should also register for http://www.Grants.gov, which is a resource for researching open FOAs and applying for grants electronically. Links to these pages, along with summaries of open FOAs as they are announced, can be found in the Federal Register, which can be accessed online at http://www.gpoaccess.gov/fr/.

Note 3

**General FOA Information:** Applicants’ first and most critical step is to read the FOA thoroughly and to become very familiar with its requirements. Outlining the contents helps to gain an understanding of how all the parts fit together. Failing to meet even one of the instructions may lead an application to be deemed “non-responsive,” and it will not be reviewed.

Note 3b

Pay careful attention to every detail of the FOA and use it as the framework for preparing the application. The Executive Summary will provide a rationale for and overview of the funding opportunity. Applicants should also note the application screening criteria on pages 14-15 that serves as a checklist of required elements. (This checklist is an aid for applicants and should not be included in the application package.)

Note 4

**Source for Announcement of American Apprenticeship Initiative:** See ETA’s website at http://www.doleta.gov/oa/aag.cfm for information on the Presidential announcement of this initiative and grant opportunity.
men and women of color, people with disabilities; low-skilled populations; and veterans, including transitioning service members); and

- Leverage and develop public policies that increase demand for American Apprenticeship and support sustainability.

Approximately 25 grants will be awarded to the lead applicant of a public and private partnership. Selection of grantees will be determined on the strength of the proposal, partnership, and commitments of leveraged resources, along with other factors, such as the geographic distribution of funds, mix of industries and occupations, partnership structures, scope of innovation, level of expansion (i.e., new apprentice goals), and/or other factors. Applicants must present a comprehensive strategy that is responsive to the Project Narrative requirements in Section IV.

Applicants should commit, on behalf of the partnership, to (1) work with DOL (or DOL-recognized State Apprenticeship Agencies) to register new apprenticeship programs in H-1B related industries and occupations such as, Information Technology, and/or other high-growth industries including but not limited to Advanced Manufacturing, Business Services, and Healthcare; and the types of high-demand skill sets (e.g., digital and information technology skills) now required across most industries; and (2) transform and adapt alternative work-based learning programs or rigorous educationally-based internship models into American Apprenticeship programs; or (3) significantly expand existing and successful registered programs.

Applications must include significant employer engagement, including a minimum of three employer partners with demonstrated engagement, and must describe any regional or national industry associations that are actively participating in the project. In states in which they exist, State Apprenticeship Agencies will play an important leadership and supporting role in the regional and state infrastructure to promote, develop, register, and expand apprenticeship programs.

Additionally, there are a set of requirements listed in Appendix C, which will become part of the grant award to ensure planning and implementation that support an environment for American Apprenticeship expansion and sustainability. Applicants should familiarize themselves with these requirements prior to submission of an application. Finally, the department is committed to producing strong evidence on the effectiveness of the grantee programs, and full participation (by grantee and sub-grantees) in any evaluation initiated by the department is a condition of all grant awards.

I. Funding Opportunity Description

A. Program Purpose

This Funding Opportunity Announcement (FOA) solicits applications for the American Apprenticeship Initiative. This initiative is intended to serve as a catalyst in supporting a uniquely American Apprenticeship system that meets our particular economic, industry and workforce needs. American Apprenticeships are innovative work-based learning and post-secondary earn-and-learn models that meet national standards for registration with the U.S. Department of Labor, or with a DOL-recognized State Apprenticeship Agency. Please see Registered Apprenticeship 101.
Note 5a

Sections of the FOA (1): Applicants should become familiar with the various Sections of the FOA and how they combine to constitute the whole application. Section I, Funding Opportunity, provides an overview of ETA’s purpose, goals, and objectives. Section II, Award Information, describes the type and amount of the awards and the period of performance. Section III, Eligibility Information, describes the combination of entities that are eligible to apply and describes the required partnerships, lead entities, optional partners, etc.

Note 5b

Sections of the FOA (3): Section VI, Award Administration Information, describes how award recipients will be notified and sets forth the administrative standards and requirements for grant recipients. Section VII provides an ETA contact for further information about this grant. Section VIII, Other Information, discusses transparency requirements and describes several web-based resources to help with grant application. Finally, Section IX provides the OMB information collection estimates.

Note 5c

Sections of the FOA (2): Section IV, Application and Submission Information, describes the necessary steps to submit an application, contains the core components of the submission, and provides helpful information on how to apply. Section V, Application Review Information, describes and quantifies through points how the application will be evaluated. (Earlier announcements included the project narrative structure in this section, but this has now been moved to Section IV.)

Note 6

Section I, Funding Opportunity Description: This section informs the applicant of the Department of Labor’s (DOL) purpose in issuing this FOA, outlines the goals and elements, allowable activities under the grant, and targeted industries and occupations. Applicants should understand the purpose and goals of the FOA comprehensively and should craft their applications in response to these.
American Apprenticeship (also referred to as Registered Apprenticeship) programs combine job-related technical instruction with structured on-the-job learning experiences. 21st century apprenticeship approaches are flexible and can be easily customized to meet the needs of the employer and apprentice. Apprentices are hired and earn a wage upon registration, and receive progressive wages commensurate with their skill attainment throughout the training program. Upon successful completion of all phases of on-the-job learning and related instruction components, registered apprentices receive nationally recognized certificates of completion leading to long-term career opportunities. For more information, please see our Quick Start Toolkit and Federal Resources Playbook for Registered Apprenticeship.

Currently, there are approximately 410,000 Registered Apprenticeships in the United States, which represents a relatively small proportion of the labor force compared with other industrialized nations. To put this number in a global context, the United States would need more than six times as many new apprentices to be on the same per capita level as Great Britain. It would take a sixteen-fold increase for the U.S. to be on par with the number of apprentices in Germany. Underutilization of apprenticeship also is evidenced when one considers that by comparison there over 19 million students in 2- and 4-year American colleges and universities. This underutilization of apprenticeship represents a significant lost opportunity to efficiently train American workers with 21st century skills and create a stronger American economy.

By launching the American Apprenticeship Initiative, the department is taking a critical first step in charting a new path forward for innovation in apprenticeship and raising the visibility of apprenticeship as a post-secondary education and training pathway.

Grants under this program must focus on helping more employers and workers participate in American Apprenticeships within industries and occupations for which employers are using H-1B visas to hire foreign workers such as, Information Technology, and/or other high-growth industries including but not limited to Advanced Manufacturing, Business Services, and Healthcare; and the types of high-demand skill sets (e.g., digital and information technology skills) now required across most industries. The American Apprenticeship Initiative is intended to raise the technical skill levels of American workers so they can obtain or upgrade employment. While the occupations at H-1B skill levels are generally defined as commensurate with a bachelor's degree or comparable experience, education, and training, American Apprenticeship is not limited to 4-year degree skill levels and can include the preparation of workers at various points along a career pathway.

These grants are available for the creation and/or expansion of innovative and sustainable public-private partnerships and project designs that align with regional and state economies to address the following goals:

1. Support the expansion of quality and innovative American Apprenticeship training programs into high-growth occupations and industries for which employers are using H-1B visas to hire foreign

---

4 National Center for Education Statistics, Projections of Education Statistics through 2021, Table. 20.
Note 7a

*FOA Program Purpose (1):* This subsection provides the applicant with context about the purpose of grants to be funded. This statement sets forth the “why” of this grant. The application should show clearly that the applicant understands this purpose and will be able to use the grant funds to achieve this purpose.

Note 7b

*FOA Program Purpose (2):* The application must show that the applicant has the capacity and the skill to meet the goals set forth in this subsection and that the proposed partnership can deliver the kinds of projects described. FOAs contain many technical terms that have specific meanings. For example, this FOA uses the term “sector strategies.” It is important for the application to reflect a clear understanding of these terms and their application to the project.

Note 8

*Application Assistance:* FOAs typically include links to background information and resources to provide more context. For example, ETA has provided FAQs for this FOA that provide a good resource to understand terms. ETA often hosts virtual prospective applicant conferences or offers pre-recorded Webinars about grant competitions. If the applicant is new to ETA’s grant process, these conferences are a great opportunity to hear more about the application requirements and the overall grant-making process. Although described in more detail later, applicants should note the specific funding amounts and number of grants funded listed in the Award Information section of the FOA.
workers, and the related activities necessary to support such training (see Appendix A or Foreign Labor Certification Data Center);

2. Create career pathways that encompass American Apprenticeship programs and align American Apprenticeship with post-secondary education through innovative partnerships that leverage high-quality training and classroom-education opportunities;

3. Utilize strategies that offer innovative approaches to significantly increase apprenticeship opportunities for all American workers, particularly underrepresented populations in apprenticeship (including women and minorities); low-skilled populations; and veterans, including transitioning service members, to prepare for and successfully enter careers that provide long-term employment and family-sustaining wages in high-skill, high-growth industries;

4. Implement new and innovative public policies (at the regional, state, and local level) or public-private partnerships that increase demand for American Apprenticeship; and

5. Ensure that innovations form the basis for broader change and sustainability that encourages employers to adopt and offer American Apprenticeship opportunities.

Based on these goals, we are interested in funding innovative public-private partnerships and projects that will incorporate elements which will lead to sustainable and impactful apprenticeship programs. These elements include:

- **Promoting Apprenticeship to Employers, Workers, and Other Key Stakeholders**: Increasing awareness of the value and benefits of American Apprenticeships for both employers and workers as well as educators through increased education, marketing and outreach (impact documentation);

- **Increasing Apprenticeship Opportunities for All Americans**: Developing strategies that increase opportunities for underrepresented (including women and minorities), low-skilled populations, and veterans into skilled occupations and industries while also addressing the barriers, income and support needs, and preparatory training unique to targeted populations; this would include quality pre-apprenticeships and other strategies that can serve as on-ramps to American Apprenticeship opportunities;

- **Promoting Career Pathways and Aligning Apprenticeships with Institutions of Higher Education (IHEs) and Workforce Investment Systems**: Engaging states, regions, and local areas to align, at a minimum, education and training systems (e.g., Workforce Investment Boards/State Workforce Agencies; and career technical education, community college, and university systems) behind apprenticeship as an area for cooperation and co-investment and linking apprenticeship to credit and industry-recognized credentials that allow for further advancement (e.g., college credit, portable industry-recognized credentials; also see the Registered Apprenticeship College Consortium);

- **Sector Focus and Employer Commitments**: It is critical that applications: (1) demonstrate clear sector strategies and must include significant employer engagement, including a minimum of three distinct employer partners to work with DOL (or federally-recognized State Apprenticeship

---

6 Please see Training and Employment Notice 13-12, Defining a Quality Pre-Apprenticeship Program and Related Tools and Resources.
Goals of the Grant (2): Careful reading of these goals shows that this FOA is intended to expand Apprenticeship training programs both in quantity and in kind. Note words such as “support,” “align,” “innovate,” “increase,” “ensure,” etc., that provide clues to the FOA’s intent. Innovation and partnership are encouraged, and sustained and growing use of apprenticeship opportunities by employers is desired.

Goals of the Grant (1): The applicant should pay careful attention to any goals set forth in the FOA. The goals address the “what” of the project, the anticipated and desired results. Be sure to note any special conditions in the goals. For example, this FOA will support Apprenticeship programs in industries that use H-1B visas to hire foreign workers.
Agencies) to register new apprenticeship programs and hire apprentices, and (2) display a commitment to transform and adapt alternative work-based learning programs or rigorous education-based internship models into American Apprenticeship programs, and/or (3) significantly expand existing and successful registered programs (e.g., scaling industry models to a national, multi-state, regional, or statewide level through an industry association with multiple employer partners, a national employer with multiple sites and other employers that are part of its supply chain, or state-led initiatives that imbed apprenticeship strategies in support of state and regional labor market needs;

- **Innovative Public Policies and Public-Private Partnership Models**: Implementing new and innovative public polices (e.g., tax credits, apprenticeship utilization requirements for publicly-funded state or local projects, expansion of eligibility for educational benefits or funding, leveraging workforce or other funding streams, or other policies) at the regional, state, and local level or public-private partnerships that increase demand for American Apprenticeship and support long-term sustainability (see Elements and Strategies of Innovation in Appendix B.);

- **Planning for a Sustainable Expansion**: Demonstrating thoughtful plans and policies for sustainably expanding the apprenticeship models and documenting the evidence for continued investment;

- **Program Evaluation**: Ensuring full participation (by grantee and sub-grantees) in any evaluation initiated by the department as a condition of all grant awards (see details of program evaluation requirements in Section IV.E Funding Restrictions); and providing a strong plan to report the achievement of the project’s goals and milestones and effectively measure its outputs and outcomes.

**B. Allowable Activities**

Applicants must identify key innovations that they are seeking to implement and demonstrate the ability and commitment to train significant numbers of new apprentices and scale programs at a statewide, multi-state, regional, or national level. Grant funds are intended to offset initial startup and implementation costs and to play a catalytic role in American Apprenticeship expansion. Projects under this FOA are required to leverage a wide range of other private and public sector resources to ensure significant scaling of apprenticeship in terms of the number of new programs and numbers of new apprentices served.

Allowable activities under this grant must help employers grow a more productive workforce and assist workers in gaining the skills and competencies needed to obtain or upgrade employment in high-growth industries and occupations, or along career pathways for such industries and occupations. A career pathway may generally be defined as a system of career options which allows opportunities for professional growth and upward mobility.

DOL will fund American Apprenticeship training and supporting activities to ensure that the program(s) meet the needs of employers and apprentices. American Apprenticeship training is distinguished from other types of workplace training by several factors: (1) participants who are newly hired (or already employed) earn wages from employers during training; (2) programs must meet national standards for registration with the U.S. Department of Labor (or federally recognized State Apprenticeship Agencies; (3) programs provide on-the-job learning and job related technical instruction; (4) on-the-job learning is conducted in the work setting under the direction of one or more of the employer’s supervisory personnel; and 5) training results in an industry recognized credential.
Note 10

Public-Private Partnerships: Whenever an FOA requires partnerships, applicants must be sure to build partnerships that include eligible partners and that are responsive to partnership language in the FOA. For example, the nature and potential effectiveness of the partnerships envisioned in this project are critical.

Note 11a

Being Consistent with Allowable Activities and Costs (2): A common pitfall for applicants is proposing activities that are outside the realm of the allowable activities articulated in the FOA. The applicant must also review information about OMB Cost Principles in Section VI and costs that are not allowable in Section IV.E.

Note 11b

Being Consistent with Allowable Activities and Costs (1): Applicants should be sure that all activities and costs in the proposal are consistent with and directly aligned with allowable activities and costs presented in the FOA. This is a key element as it will control the various kinds of programs and items that can be funded with the grant. For example, this section of this FOA provides information about activities and costs that are allowable under the grant.
Below are some examples of allowable activities that may be funded by AAI grant funds:

1. On-the-Job Learning (OJL)
OJL combined with job related technical instruction comprise the core training components of any apprenticeship. Grant funds may be used to support the OJL to reimburse employers for extraordinary costs of training not to exceed $10,000 per apprentice over the period of training. This reimbursement can help offset overhead associated with providing the training, shadowing, mentoring and additional supervision that are part of a quality on-the-job learning. The majority of these training costs are typically borne by the employer.

2. Job Related Technical Instruction (RTI)
Grant funds may be used to support the RTI (sometimes referred to as classroom training) of an American Apprenticeship. RTI allows apprentices to learn the theoretical aspects of the job. Allowable costs may include (1) the development of courses at the post-secondary level that are integrated into the apprenticeship program; (2) apprentice tuition or other educational fees; (3) and the delivery of instruction requirements (e.g., virtual learning technology, classroom instructors, etc.); and (4) costs for training facilities.

3. Pre-Apprenticeship Training
Grant funds may be used to support quality pre-apprenticeships (as defined in Training and Employment Notice 13-12 and other strategies that can serve as on-ramps to American Apprenticeship opportunities. Pre-Apprenticeship services and programs are designed to prepare a diverse pool of individuals to enter and succeed in American Apprenticeship by providing career specific training and readiness skills needed on the job. In addition to providing preparatory skills for future apprentices, pre-apprenticeship training can be an effective vehicle to streamline the recruitment process and help move job-ready apprentices into apprenticeship. The most effective pre-apprenticeship programs are those which utilize employers or other program sponsors to articulate eligibility requirements and qualifications that lead to hiring into an apprenticeship. DOL is interested in funding pre-apprenticeship services that demonstrate clear pathways for underrepresented populations to American Apprenticeship placements. Please note that YouthBuild programs that receive funding from the U.S. Department of Labor meet the quality pre-apprenticeship requirements outlined in ETA’s definition within Training and Employment Notice 13-12. For more information, please see the YouthBuild programs.

4. Other Activities that Support American Apprenticeship
In implementing American Apprenticeship, applicants may propose to use grant funds for a wide range of activities that create an environment for American Apprenticeship expansion and training opportunities including but not limited to the following:

- Sector strategy and career pathway development activities;
- Partnership building activities, such as:
  - Development and/or implementation of system alignment activities, including the development of articulation agreements with universities and other educational partners that allow for recognition of apprenticeship training toward college credit and other activities to support the Registered Apprenticeship College Consortium;
  - Meetings, training, briefings of consortia members;
This page contains no comments
• Development of outreach and promotion to support increased awareness of American Apprenticeship for employers, potential participants (particularly underrepresented populations), educators, the general public, etc.;
• Career awareness models for underrepresented populations;
• Recruitment of eligible participants;
• American Apprenticeship program design and implementation costs, such as:
  o The development of curricula and standards of apprenticeship;
  o Costs associated with the development of competency based apprenticeship training or other accelerated learning models;
  o Hiring/developing qualified instructors and subject matter experts (including the costs of salaries and benefits) to assist in the delivery of new curricula;
  o Use of subject matter experts from industry, apprenticeship, education, or other areas to assist in updating, replicating or customizing existing industry-recognized curricula to support RTI;
  o Enhancing the information technology infrastructure used to provide American Apprenticeship education and training and related activities;
• Conducting prior learning assessments to determine the number of college credits that can be awarded for apprentices who receive their American Apprenticeship certificate of completion;
• Conducting assessments to determine skill levels, aptitudes, abilities, and competencies of participants;
• Supportive services to support on-going participation of apprentices while in training (e.g., materials needed on the job including uniforms, tools, and supplies);
• Costs related to awarding of Certificates of Training and/or Certificates of Completion of Apprenticeship credentials;
• System/infrastructure capacity to organize, and/or analyze program data for continuous improvement and program evaluation;
• Program oversight and management, grant reporting, and other administrative functions.

Grant funds cannot be used to pay participant wages (see Section IV.E of the FOA). Applicants should also refer to Section VI of the FOA for a list of relevant OMB Circulars related to cost principles, administrative and other requirements that apply to this funding opportunity and to Section IV.E for a discussion of costs that are not allowable under this Solicitation.

C. Targeted Industries and Occupations

American Apprenticeship grants will fund projects across a diversity of industries and occupations for which employers are using H-1B visas to hire foreign workers. These are high-job-growth industries and occupations that: 1) are projected to hire substantial numbers of new workers; 2) are being transformed by technology and innovation requiring new skill sets for workers; 3) are new and emerging businesses that are projected to grow; or 4) have a significant impact on the economy overall or on the growth of other industries and occupations. According to recent data, a wide range of industries may meet these criteria in local and regional areas around the country.

To position American workers for highly skilled positions, and to reduce the need for foreign workers under the H-1B visa program, we are interested in funding innovative program designs that focus on industries and occupations for which employers are using H-1B visas to hire foreign workers, such as Information Technology, and/or other high-growth industries including but not limited to Advanced Manufacturing, Business Services, and Healthcare; and the types of high-demand skill sets (e.g., digital and information technology skills) now required across most industries.
Identifying Targeted Industries and Populations: Many FOAs have targeted industries and occupations. This grant targets industries and occupations for which employers are using H-1B visas. This is so important that the FOA provides an appendix listing some, but not all, of these industries. Many FOAs will also focus on targeted populations, such as individuals with disabilities or ex-offenders. Applicants should recognize these and respond accordingly. Applicants should use these and all other resources mentioned in the FOA to be sure that their proposals align with the targeted populations.
Applicants should review the attached list of industries and occupations that are using H–1B visas to hire foreign workers to assist your program alignment (see Appendix A). This list is not exhaustive and applicants are advised to also refer to the Foreign Labor Certification Data Center.

D. Program Authority

This program is authorized under Section 414(c) of the American Competitiveness and Workforce Improvement Act of 1998 (ACWIA), as amended (codified at 29 U.S.C. 2916a), and subject to the requirements of Section 104, Division H, of the Consolidated Appropriations Act, 2014, P.L. 113-76, Jan.17, 2014, 128 Stat 5).

II. Award Information

A. Award Type and Amount

Funding will be provided in the form of a grant. Approximately $100 million is expected to be available to fund approximately 25 grants. You may apply for a grant amount ranging from $2.5 - 5 million. We will not fund any project for less than $2.5 million or above the ceiling amount of $5 million.

Projects must clearly demonstrate the ability and commitment to train significant numbers of new apprentices and scale programs at a statewide, multi-state, regional, or national level commensurate with the grant request. This could include, but is not limited to, scaling industry models through an industry association with multiple employer partners, through a national employer looking to expand an apprenticeship program to additional facilities/locations and with other employers that are part of the supply chain, or through a State-led, regionally-led, or locally-led apprenticeship initiative that will implement apprenticeship in support of state and regional labor market needs.

To ensure that grant funds result in services to significant numbers of apprentices, we have established goals for the minimum numbers of apprentices to be served during the period of performance based on the amount of funds requested by the applicant (see table below). The number of apprentices served should reflect those individuals who receive grant funded services in support of their apprenticeship training (in a program that meets national standards for registration with the U.S. Department of Labor or a federally recognized State Apprenticeship Agency). Therefore, this goal does not include individuals served through pre-apprenticeship or other grant activities that are outside of the registered program. The table below represents the minimum levels of apprentices to be served based on the funding request. Project goals, including estimated numbers of apprentices to be served, must be included in the project narrative (described in more detail in Expected Outcomes and Outputs under Section IV.B.3 Project Narrative).

DOL recognizes that underrepresented or harder-to-serve populations may require more expensive service delivery strategies to create greater access to quality apprenticeships. In addition, apprenticeship training strategies frequently have higher upfront costs compared to less intensive training options. This grant investment is intended to offset costs of training and to play a catalytic role in American Apprenticeship expansion, but it will be essential that applicants acquire adequate leveraged resources to accomplish the project’s overall goals and milestones. Public and private leveraged resources must be sufficient to allow all apprentices to successfully complete training.
**Know the Statutory Authority:** Applicants should be familiar with all statutes related to the FOA for which they are applying.

**Section II, Award Information:** This section of the FOA informs the applicant of the amount of funds included in the grant, the period of performance, certain performance goals, and other vital information. Applicants should become very familiar with information about the scope of FOAs.

**Understanding Anticipated Award Amounts:** Applicants should be fully familiar with DOL’s expectations regarding the number of grants anticipated to be awarded and the anticipated grant amount range. If the application requests less than the minimum or more than the maximum funding levels, it will be considered non-responsive and will not be reviewed. As important, the funding level requested should be appropriate to the level of effort of the proposed project. This factor has been addressed in the table below that sets minimum levels for the number of apprentices for certain levels of funding.

**Watching for National Standards, Accreditations or Other Requirements:** Applicants should watch for standards, requirements, or levels of accreditation set forth in the FOA. In this FOA, for example, the apprenticeship training requested must meet national standards for registration with the U.S. Department of Labor or a federally recognized State Apprenticeship Agency.
Minimum Goals for Apprentices Served during the Grant Period Based on Funding Request

<table>

<td>1000</td>
</tr>
</tbody>
</table>

Awards made under this announcement are subject to the availability of Federal funds. In the event that additional funds become available, we reserve the right to use such funds to select additional grantees from applications submitted in response to this announcement.

B. Period of Performance

The period of performance is 60 months. This performance period includes all necessary implementation and start-up activities. The process for program development and registration should begin immediately and apprenticeship enrollments should be expedited, with the expectation of apprentice enrollments to begin in the first 12 months of the grant.

III. Eligibility Information

A. Primary Partnership Composition

In keeping with the authority provided by Congress under ACWIA, grants under this program will be awarded to a partnership of private and public sector entities. ETA seeks a diversity of partners and partnership structures to support innovation and seed diverse approaches. The primary partnership must include at least one public and one private sector entity. To be eligible for consideration, applications must include at least one from the following:

**Private Sector:** A business, a consortium of businesses, business-related nonprofit organization, or a private organization functioning as a workforce intermediary for the express purpose of serving the needs of businesses (see Section III.A.1); **and**

**Public Sector:** At least one representative from one of the following three types of entities: 1) the workforce investment system; 2) public education or training provider; or 3) DOL-recognized State Apprenticeship Agency (note: State Apprenticeship Agencies are in 25 states, the District of Columbia, and Guam7). (See Section III.A.2).

Eligible private sector and public sector entities are further described below in Sections III.A.1 and III.A.2 of the FOA. The partnership between the private entity (i.e., business or business-related entity) described above in Section III.A.1. and a public entity described in Section III.A.2 will be considered

---

Grant Period of Performance: Every FOA will identify the period of performance for the grants awarded. Here, DOL specifies that the grant will be five years from the date of execution of the grant documents, and that the agency expects program development and registration to begin immediately and apprenticeship enrollments to begin in the first 12 months of the grant. In these projects, it will be important for grantees to be able to leverage existing models and partnerships to implement grant activities quickly.

Section III, Eligibility Information (1): This section of the FOA describes the types of entities who are eligible to apply. The application must show a clear understanding of applicant eligibility requirements, because if the application does not conform to the requirements in this section, it will not be considered for funding.

Section III, Eligibility Information (2): Applicants should read eligibility requirements closely to confirm that they are indeed eligible to apply for funding under the FOA. For example, this FOA requires a strong working relationship between private and public sector partners that will form the primary partnership. The public or nonprofit partner must be the lead agency. The relationship of the partners is set forth in Section III. The overall proposal must include at least 3 employers. It is important for applicants to understand the partnership requirements and expectations of FOAs.

Importance of Comprehensive Partnerships: Robust strategic partnerships are essential to most applications for ETA grant funding. This FOA requires a primary partnership and suggests other partners. One of the most common weaknesses in grant applications is a failure throughout the application to describe partnerships meaningfully and in detail. Funders may look for demonstrated evidence of existing partnerships that can be brought to bear upon the proposed grant project and/or of emerging partnerships that can do the same. Merely “listing” potential partners may not be sufficient to receive full points under the scoring criteria.
the “primary partnership.” An eligible entity cannot serve as more than one type of entity for the purpose of meeting the minimum requirements of the primary partnership.

1. Eligible Private Sector Entity for the Primary Partnership

Business, Consortium of Businesses, Business-related Nonprofit Organizations, Private Organizations Functioning as Workforce Intermediaries for the Expressed Purpose of Serving the Needs of Businesses

The primary partnership must include one or more of the following: a business (one of or in addition to the three required participating employers), a consortium of businesses, business-related nonprofit organization, or private organization functioning as a workforce intermediary for the express purpose of serving the needs of businesses. Business-related nonprofit organizations include trade or industry associations such as local Chambers of Commerce, small business federations, and labor-management organizations. Organizations functioning as workforce intermediaries for the express purpose of serving the needs of businesses include labor unions, labor-management organizations, industry associations, community-based organizations, private non-profit service providers. As discussed in Section III.A, a business-related non-profit organization or a non-profit organization functioning as a workforce intermediary for the express purpose of serving the needs of businesses may act as the lead applicant. Note: while a for-profit private business or for-profit consortium of businesses can be an entity included in the primary partnership, they may not be the lead applicant.

Any of these organizations can provide expertise on the skill needs of the workplace. Businesses and business associations lend their expertise on skills development by: 1) defining the program goals and activities; 2) identifying necessary skills and competencies; 3) providing resources to support education/training (such as equipment, instructors, on-the-job learning and other work-based learning activities); 4) providing assistance with American Apprenticeship program design and implementation; 5) hiring qualified apprentices; and 6) helping to solicit employer feedback on the skills and competencies of workers completing training. Organizations functioning as workforce intermediaries for the express purpose of serving the needs of businesses may lend their expertise by: 1) having credibility with employers and workers; 2) serving as a partner, coordinator, and management services organization; and 3) bringing together project partners to plan, govern, manage, and track performance of customized services to program participants and employers.
This page contains no comments
2. Eligible Public Sector Entity for the Primary Partnership

At least one public sector entity from the following list must be included in the primary partnership. Any of the following types of public workforce system entities are eligible lead applicants and eligible entities to be part of the primary partnership:

i. The Workforce Investment System

Organizations involved in administering the workforce investment system established under Title I of the Workforce Investment Act (WIA), (including state and local Workforce Investment Boards and American Job Center Operators (as discussed under Section 121 of WIA of 1998 (29 U.S.C. 2841) and Section 121 of the Workforce Innovation and Opportunity Act of 2015 (WIOA) (29 U.S.C. 3151) and Indian and Native American entities as discussed under Section 166 of WIA (29 U.S.C. 2911) and Section 166 of WIOA (29 U.S.C. 3221). These organizations have expertise in workforce development and may provide leadership in implementing the following types of activities: 1) understanding and analyzing the need for education and training in the local labor market and regional economy; 2) identifying targeted industries, occupations, regional clusters, hiring needs, and populations to be served; 3) providing relevant sources of data, including labor market information and other tools or reports; 4) assessing potential participants for the grant program; 5) identifying and referring candidates for education and training in the grant program; 6) providing additional supportive services; 7) connecting and placing participants with employers that have Registered Apprenticeships; and 8) collecting, tracking, and reporting participant data to ETA.

ii. Education and Training Providers

For the purposes of this FOA, eligible education and training institutions include state college coordinating entities such as a community college system office or a single state educational board; institutions of higher education (IHEs), as defined in Section 102 of the Higher Education Act of 1965 (20 U.S.C. 1002); joint labor-management training partnerships, non-profit and community-based organizations that offer job training; and organizations that have been approved as Eligible Training Providers under Section 122 of WIA (29 U.S.C. 2842) or Section 122 of WIOA (29 U.S.C. 3152). Note: for-profit education/training providers cannot be the lead applicant (see Section III.B) and also do not count as a “public” entity.

IHEs include public or other non-profit educational institutions. Eligible institutions must be accredited, by the closing date of this FOA, by a nationally recognized accrediting agency or association that has been recognized by the U.S. Department of Education. Please see the database of institutions that are accredited by bodies recognized by the U.S. Department of Education. Generally, institutions of higher education include 2-year and 4-year colleges and universities, and institutions that serve minorities (including Historically Black Colleges and Universities, Tribal Colleges and Universities, and Hispanic-Serving Institutions, and/or Asian American and Native American Pacific Islander Serving Institutions, such as those designated by the U.S. Department of Education.

The training providers described above provide a range of customizable and short-term, as well as longer-term, training and education programs that may result in industry-recognized credentials and may include basic skills training, technical skills training, supportive services, and workforce development services.
Note 20a
Connecting to the Public Workforce System (2): Local Workforce Investment Boards (LWIBs) are
the entities responsible for providing strategic direction and oversight of the investment of
public funding related to workforce development activities in a local area. State Workforce
Investment Boards (SWIBs) are responsible for the overall guidance of workforce development
activities in a state. Information about SWIBs and LWIBs can be found at http://
www.servicelocator.org/wibcontacts/.

Note 20b
Connecting to the Public Workforce System (1): It is recommended that applicants become
familiar with and connected to the public workforce system, which includes American Job
Centers and Workforce Investment Boards. Described simply, American Job Centers are the local
entities charged with delivering actual workforce development services to workers, job seekers,
and employers. Information about local American Job Centers can be found at http://
www.servicelocator.org/.
iii. State Apprenticeship Agency (only for projects occurring in the 25 states and the District of Columbia and Guam that utilize such agencies and have been recognized by USDOL)

The department anticipates that State Apprenticeship Agencies will play a leadership role in any state-wide application and that state leadership will ensure that there is sufficient infrastructure, including staffing, in place to manage and support the American Apprenticeship expansion strategies identified in the application.

The Fitzgerald Act, also known as the National Apprenticeship Act, officially authorized and established the national apprenticeship system. This Act gave the U.S. Secretary of Labor authority over Registered Apprenticeship programs, established an Office of Apprenticeship within the U.S. Department of Labor, and provided for the recognition of State Apprenticeship Agencies to register and administer apprenticeship programs for federal purposes. (Find a complete list of DOL-recognized State Apprenticeship Agencies.)

Twenty-five states plus the District of Columbia and Guam have recognized State Apprenticeship Agencies (as defined in 29 CFR 29.2). These State Apprenticeship Agencies are defined as agencies of a state government that have responsibility and accountability for apprenticeship within the state for Federal purposes. Only a State Apprenticeship Agency which has been properly constituted under an acceptable law or Executive Order may be recognized by the Office of Apprenticeship and authorized to register and oversee apprenticeship programs and agreements for Federal purposes. These agencies may serve as the lead applicant or satisfy the public entity of the primary partnership.

State Apprenticeship Agencies can assist in the development and registering of apprenticeship programs that meet Federal and state standards. They also play a key role in: 1) protecting the safety and welfare of apprentices; 2) issuing nationally recognized and portable Certificates of Completion to apprentices; 3) promoting the development of new programs through marketing and technical assistance; 4) assuring that all programs provide high quality training; and 5) assuring that all programs produce skilled competent workers.

In the remaining 25 states, DOL administers apprenticeship programs and will work with American Apprenticeship grantees on the registering of programs developed as part of the project.

B. Eligible Lead Applicants

Grants will be awarded to a lead applicant within the primary partnership, which will serve as the grantee and have overall fiscal and administrative responsibility for the grant. A lead applicant must be a public or non-profit organization that meets the definition of one of the types of eligible entities in Eligible Public Sector and Private Sector Entities described above (see Sections III.A.1 and III.A.2).

There are two exceptions where an entity is eligible to be a part of the primary partnership but not eligible to apply as a lead applicant:

1. For-profit private business or for-profit consortium of businesses or for-profit business organizations cannot be the lead applicant.
2. For-profit education/training providers cannot be the lead applicant.
Role of State Apprenticeship Agencies: In this FOA, the Department anticipates that State Apprenticeship Agencies will play a leadership role in those states and jurisdictions where they exist. Applicants should watch for special situations such as this that may require special considerations. For example, applicants for this grant should consult the referenced web site to be sure that they understand the role and functions of State Apprenticeship Agencies and respond accordingly.

Role of the Lead Agency: Applicants should watch for any special requirements in the FOA related to partnerships. For example, this FOA specifies a special role for the lead agency and qualifies which agency that may be. The lead agency will be the grantee with overall fiscal and administrative responsibility for the grant. Note the kinds of entities that cannot be the lead agency.
An eligible entity cannot serve as more than one type of entity for the purpose of meeting the minimum requirements of the primary partnership.

The lead applicant must be the organization specified in Section 8 of the SF-424 Application Form, and will be: 1) the point of contact with the department to receive and respond to all inquiries or communications under this FOA and any subsequent grant award; 2) the entity with authority to withdraw or draw down funds through the Department of Health and Human Services - Payment Management System (HHS-PMS); 3) the entity responsible for submitting to the department all deliverables under the grant, including all technical and financial reports related to the project, regardless of which partnership member performed the work; 4) the entity that may request or agree to a revision or amendment of the grant agreement or statement of work; 5) the entity with overall responsibility for carrying out the programmatic functions of the grant, as well as for the stewardship of all expenditures under the grant; 6) the entity responsible for coordinating with the national evaluator, including participating in a random assignment evaluation and other studies, if selected by DOL; and 7) the entity responsible for working with DOL to close out the grant.

C. Other Optional Partners

In addition to the primary partnership, we strongly encourage applicants to collaborate with other public and private sector partners (which may be appropriate sub-grantees depending on the project design). These partners may include:

- Businesses (above and beyond the 3 required employer partners);
- Business intermediaries (for example, the role of the Manufacturing Extension Partnership\(^8\) for the manufacturing industry);
- Workforce intermediaries;\(^9\)
- Intergovernmental organizations;
- Economic development agencies;
- State and local governments;
- Foundations and philanthropic organizations;
- Partnering with and leveraging resources from other Federally-funded programs, where allowed by the law that authorizes the grant; such grants may include other DOL grants, Adult Basic Education, Vocational Rehabilitation State Grants, Temporary Assistance for Needy Families, Social Security disability benefits, Small Business Development Centers, federal financial aid such as Pell Grants and Federal Work Study, GI Bill Benefits for veterans, as well as other programs administered by Departments of Education, Health and Human Services, Housing and Urban Development, Commerce, Transportation, Energy, etc.
- Community-based, faith-based, or advocacy organizations with proven capacity to reach and engage individuals from under-served populations (including women, young men and women of color, persons with disabilities, veterans, including transitioning service members, among others), as they are key providers of basic skills training, technical skills training, supportive services, and workforce development services in communities across the country. Examples include national disability

---

\(^8\) The U.S. Department of Commerce, National Institute of Standards and Technology leads Hollings Manufacturing Extension Partnership (MEP). Find [more information about MEP](https://www.umbc.edu/mep) online.

\(^9\) Workforce intermediaries can help broker local, regional and national workforce solutions. Often they help job seekers find jobs and employers find workers, convene employers and community partners to determine workforce trends, and may assist in blending and braiding funding and services to create more impactful workforce solutions.
Note 23

Including Optional Partners: Obviously, this FOA anticipates a rich array of private and public sector partners in addition to the primary partners. FOAs may provide such “optional” opportunities. While addition of these non-primary partners is optional, the inclusion of additional partners may strengthen an application by incorporating additional expertise and capabilities that the primary partnership may not already have.
organizations, Lesbian, Gay, Bisexual, and Transgender (LGBT) organizations, organizations dedicated to supporting people of color, etc.

- Other providers of supportive and specialized services, such as financial counseling and behavioral health.

D. Cost Sharing or Matching
Cost sharing or matching funds are not required for this program. Cost sharing or match is not one of the application screening criteria. Please note that any other resources contributed to the project are considered leveraged resources and do not constitute cost sharing or matching funds. Applicants will be scored based on the strength of leveraged resources and these leveraged resources should be considered a critical component of the Project Design. More information on leveraged resources may be found in Section IV.B.2 Project Budget.

E. Other Information
1. Application Screening Criteria

You should use the checklist below as a guide when preparing your application package to ensure that the application has met all of the screening criteria. Note that this checklist is only an aid for applicants and should not be included in the application package. We urge you to use this checklist to ensure that your application contains all required items. If your application does not meet all of the screening criteria, it will not move forward through the merit review process and will not be considered for funding.

<td></td>
<td></td>
</tr>
</tbody>
</table>
Note 24a

Importance of Leveraged Resources (1): Leveraged resources are non-Federal resources that support the project, including money, facilities, staff, and other resources. They constitute a critical component of this FOA. Applicants must demonstrate the degree to which their partners will commit either cash or non-cash resources to support the proposed grant effort and maximize potential Federal investment. As a general rule, it is recommended that an application demonstrate that the partners have committed to contributing resources to be leveraged in the proposed project.

Note 24b

Importance of Leveraged Resources (2): Demonstrating the ability to leverage outside resources to support the grant project shows that the project will be sustained after the Federal grant investment ends. Most reviewers will want to see that the proposal makes a good-faith effort to continue services after the grant period ends and that the grant investment will have a lasting impact on the community. In general, leveraged resources should be discussed in the Budget Narrative, but they should NOT be included on the Standard Forms 424 and 424A.

Note 25

Using the Application Screening Criteria: Note that the checklist included in this section provides application requirements that will be used in screening the application. FOAs will contain similar aids. They should be used to be sure the application contains all required items. Any application not containing all of these items will not be reviewed further and will not be funded. This checklist should not be included in the application package.

2. **Number of Applications To Be Submitted**

You may only submit one application as the lead applicant in response to this FOA. However, you may be included as a partner in one or more applications submitted where you are not the lead applicant. Applicants that submit more than one application as the lead applicant will be considered non-responsive, and none of their applications will be considered for funding.

3. **Eligible Participants**

   a) **Participants Eligible to Receive Training**

   Participants served through the project can be either: a) youth that are at least 16 years of age and not currently enrolled in school within a local secondary educational agency (i.e., high school) or, b) at least 18 years of age.

   Additionally, one of the key goals of the American Apprenticeship Initiative is to open up access to apprenticeship opportunities for underrepresented populations. Therefore, projects should demonstrate strategies to employ and train underserved populations in apprenticeship such as women, young men and women of color, persons with disabilities, low-skilled populations, veterans, including transitioning service members, and others (see Project Design requirements in Section IV.B.3 *Project Narrative*). Strategies should include the use of onramps to American Apprenticeship such as integrated/accelerated Pre-Apprenticeship strategies that reduce the barriers underrepresented populations face in pursuing careers in high growth industries and occupations.
Knowing Targeted Populations: Applicants must demonstrate an understanding of the eligible participants and indicate thorough knowledge of the population they intend to serve. For example, this FOA lists several underrepresented populations. It also states that the application should not only indicate an awareness of the eligible and targeted population but should also include strategies for reaching out to that population.
particularly in the Information Technology industry and occupations that use information technology skills, and other industries, including but not limited to Advanced Manufacturing; Businesses; Services; and Healthcare.

b) Veterans’ Priority for Participants

There is a legal requirement, found at 38 U.S.C. 4215, that grantees must provide priority of service for veterans and spouses of certain veterans for the receipt of employment, training, and placement services in any job training program directly funded, in whole or in part, by DOL. The regulations implementing this priority of service can be found at 20 CFR Part 1010. In circumstances where a grant recipient must choose between two qualified candidates for a service, one of whom is a veteran or eligible spouse, the veterans’ priority of service provisions require that the grant recipient give the veteran or eligible spouse priority of service by first providing him or her that service. To obtain priority of service, a veteran or spouse must meet the program’s eligibility requirements. Grantees must comply with DOL guidance on veterans’ priority. ETA’s Training and Employment Guidance Letter (TEGL) No. 10-09 (issued November 10, 2009) provides guidance on implementing priority of service for veterans and eligible spouses in all qualified job training programs funded in whole or in part by DOL.

IV. Application and Submission Information

A. How to Obtain an Application Package

This FOA, found at Grants.gov and the ETA grants website, contains all of the information and links to forms needed to apply for grant funding. Applicants should note that hyperlinks to portions of the FOA are included in various parts of the Announcement. Applicants are required to comply with all parts of the FOA, including those parts found at the hyperlinks.

B. Content and Form of Application Submission

Applications submitted in response to this FOA must consist of four separate and distinct parts: (1) the SF-424 “Application for Federal Assistance;” (2) Project Budget; (3) Project Narrative; and (4) attachments to the Project Narrative. It is your responsibility to ensure that the funding amount requested is consistent across all parts and sub-parts of the application.

1. SF-424, “Application for Federal Assistance”

You must complete the SF-424, “Application for Federal Assistance.” The SF-424 must clearly identify the applicant and must be signed by an individual with authority to enter into a grant agreement. Upon confirmation of an award, the individual signing the SF-424 on behalf of the applicant is considered the Authorized Representative of the applicant. As stated in block 21 of the SF-424 form, signature of the Authorized Representative on the SF-424 certifies that the organization is in compliance with the Assurances and Certifications form SF-424B. The SF-424B is not required to be submitted with the application.

Requirement for DUNS Number

All applicants for Federal grant and funding opportunities are required to have a DUNS number, and must supply their DUNS Number on the SF-424. The DUNS Number is a nine-digit identification number that uniquely identifies business entities. If you do not have a DUNS Number, you can get one for free through the D&B website. As authorized under 2 CFR 25, grant recipients authorized to make sub awards must be aware of the following requirements related to DUNS Numbers:
Including Veterans’ Priority: Applicants should know that veterans’ priority applies to all training grants funded by DOL. If a veteran is eligible for the service, they have priority for receiving that service and the application should indicate this.

Section IV, Application and Submission Information: This section of the FOA gets down to the nuts and bolts of the application process, how to apply and what to include in the application.

Description of the Grant Package (2): Just for starters, all applicants must be registered, must have a DUNS number, and must be registered with SAM. The following sections also address these and other requirements. The applicant may have already completed these steps; however, some may need to be renewed. If these steps have not been completed, note that the full process may take up to 4 weeks.

Description of the Grant Package (1): The grant package includes the grant announcement and various grant application forms, but not all required forms are guaranteed to be included in this package. All applicants should be thoroughly familiar with the web sites referenced here. For example, Grants.gov provides critical information that is essential in applying for any grant.

Completing SF-424: Standard Form 424, Application for Federal Assistance, is a requirement. Applications that do not contain this form will be considered non-responsive and will not be reviewed. This form requests substantial information about the project, and the applicant may not be able to complete it entirely until other parts of the package have been completed. For example, site locations may not be firmly established when the application process begins. Applicants should access the Grants 101 training module through http://www.doleta.gov/grants for information about completing forms and many other aspects of grant application.

Obtaining a D-U-N-S Number: If the applicant does not already have a Data Universal Number System (D-U-N-S) Number, one can be obtained easily and for free at the link noted here. A D-U-N-S Number should be obtained early in the application development process because not including a D-U-N-S Number on the Standard Form 424 is a common oversight that results in an application being deemed non-responsive.
• Grantees must notify potential sub-grantees that no entity may receive a sub-award from you unless the entity has provided its DUNS number to you.
• Grantees may not make a sub-award to an entity unless the entity has provided its DUNS number to you.

**Requirement for Registration with SAM**

Applicants must register with the System for Award Management (SAM) before submitting an application. [Instructions for registering with SAM](#) can be found online. An awardee must maintain an active SAM registration with current information at all times during which it has an active Federal award or an application under consideration. To remain registered in the SAM database after the initial registration, the applicant is required to review and update the registration at least every 12 months from the date of initial registration or subsequently update its information in the SAM database to ensure it is current, accurate and complete. For purposes of this paragraph, the applicant is the entity that meets the eligibility criteria and has the legal authority to apply and to receive the award.

2. **Project Budget**

You must complete the [SF-424A Budget Information Form](#). In preparing the Budget Information Form, you must provide a concise narrative explanation to support the budget request, explained in detail below.

**Budget Narrative:** The budget narrative must provide a description of costs associated with each line item on the SF-424A. It should also include a description of leveraged resources provided (as applicable) to support grant activities. Use the following guidance for preparing the budget narrative:

**Personnel** – List all staff positions by title (both current and proposed). Give the annual salary of each position, the percentage of each position’s time devoted to the project, the amount of each position’s salary funded by the grant and the total personnel cost for the period of performance.

**Fringe Benefits** – Provide a breakdown of the amounts and percentages that comprise fringe benefit costs such as health insurance, FICA, retirement, etc.

**Travel** – Specify the purpose, mileage, per diem, estimated number of in-state and out-of-state trips and other costs for each type of travel.

**Equipment** – Identify each item of equipment to be purchased which has an estimated acquisition cost of $5,000 or more per unit (or if your capitalization level is less than $5,000, use your capitalization level) and a useful lifetime of more than one year (see 2 CFR 200.33 for the definition of Equipment). List the quantity and unit cost per item. Items with a unit cost of less than $5,000 are supplies. In general, we do not permit the purchase of equipment during the last funded year of the grant.

**Supplies** – Supplies include all tangible personal property other than “equipment” (see 2 CFR 200.94 for the definition of Supplies). The detailed budget should identify categories of supplies (e.g. office supplies). List the quantity and unit cost per item.

**Contractual** – Identify each proposed contract and specify its purpose and estimated cost. If applicable, identify any sub-recipient agreements, including purpose and estimated costs. See Section VI.B.2.f. for more information on the distinction between sub-contractor (vendor) and sub-recipient.
Registering with the System for Award Management (SAM): Applicants must check to see if their organization has registered with SAM. SAM registrations must be renewed annually. Registration normally takes 3-5 business days. Grants.gov contains instructions for completing this important step.

Understanding Budget Requirements (1): As in most enterprises, the budget provides a project overview in financial terms. In completing the Project Budget, applicants should be sure that the Budget Narrative aligns with the SF-424A, Budget Information Form. The Budget Narrative should provide a clear, concise description of projected costs, in-kind and cash contributions (leveraged funds), and benefits in terms of costs. Items to be included in the Budget Narrative for this FOA are set forth in this subsection.

Understanding Budget Requirements (2): At several points, references to helpful information are provided. Applicants should access these sources, especially the Grants 101 training module through http://www.doleta.gov/grants, for information about completing forms and many other aspects of grant application, since the budget requirements are complex and relate to various statutes and regulations.
Construction – Construction costs are not allowed and this line must be left as zero. Minor alterations to adjust an existing space for grant activities (such as a classroom alteration) may be allowable. We do not consider this as construction and the costs must be shown on other appropriate lines such as Contractual.

Other – List each item in sufficient detail for us to determine whether the costs are reasonable or allowable. List any item, such as stipends or incentives, not covered elsewhere here.

Indirect Charges – If indirect costs are included in the budget, then include either, a) the approved indirect cost rate with a copy of the Negotiated Indirect Cost Rate Agreement (NICRA), a description of the base used to calculate indirect costs along with the amount of the base, and the total indirect costs requested, or b) if you meet the requirements to use the 10% de minimis rate as described in 2 CFR 200.414(f), then include a description of the modified total direct costs base (see 2 CFR 200.68 for definition) used in the calculation along with the amount of the base, and the total indirect costs requested based on the 10% de minimis rate. See Section IV.B.4 Attachments to the Project Narrative and Section IV.E.1 Indirect Costs for more information. Additionally, DOL-specific information is available online.

Note that the entire Federal grant amount requested (not just one year) must be included on the SF-424, SF-424A, and budget narrative.

No leveraged resources should be shown on the SF-424 and SF-424A. Leveraged resources should be described in the budget narrative. The requested Federal grant amount listed on the SF-424, SF-424A, and budget narrative must be the same. The funding amount included on the SF-424 will be considered the official funding amount requested if any inconsistencies are found.

3. Project Narrative
The Project Narrative must demonstrate your capability to implement the grant project in accordance with the provisions of this announcement. It provides a comprehensive framework and description of all aspects of the proposed project. It must be succinct, self-explanatory, and well organized so that reviewers can understand the proposed project.

The Project Narrative is limited to 30 double-spaced single-sided 8.5 x 11 inch pages with Times New Roman 12 point text font and 1 inch margins. Any materials beyond the specified page limit will not be read or considered in the application review process. You must number the Project Narrative beginning with page number 1.

The following instructions provide all of the information needed to complete the Project Narrative. You should carefully read and consider each section, and include all required information in your Project Narrative. The Project Narrative will be evaluated using the evaluation criteria identified in Section V.A. You must use the same section headers identified below for each section of the Project Narrative:
Note 34

**Knowing Indirect Cost Rates:** Applicants should consult the referenced web site for additional information on indirect cost rates.

Note 35

**Showing Leveraged Resources:** This is a critical distinction for this FOA. Leveraged resources are expected to be acquired and referenced in the Budget Narrative; however, they may not be included in the SF 424 or 424A. These forms will contain only Federal resources, and leveraged resources are non-Federal by definition. Note also that the SF 424 and 424A must include the entire grant request for all 5 years of the project. Applicants must exercise extreme care in responding to these kinds of requirements as failure to complete these forms correctly could result in the application being considered non responsive. Leveraged resources are not always required by FOAs.

Note 36

**Importance of the Project Narrative:** In a sense, this subsection is the ballgame. The Project Narrative communicates to DOL whether the application is responsive to the FOA and whether the applicant has the capability to implement the project. These are the segments on which the proposal is evaluated. Note that Section V, Application Review Information, contains the scoring criteria for this FOA. Applicants should be sure that the Project Narrative addresses adequately the scoring criteria set forth in the announcement.

Note 37

**Page Limits:** Applicants must watch carefully for page limits. For example, this FOA has established a 30 page limit for the Project Narrative. Some requirements for the Project Narrative may not count against this page limit, such as the Abstract or the Work Plan for this FOA. Pages in excess of the limit will not be read during the review process. Applicants must adhere precisely to the other submission requirements such as spacing, font type and size, margins, etc.

Note 38

**Using Section Headings for the Project Narrative:** Applicants should read the FOA very carefully for all requirements. For example, the applicant must use the section headers identified in this subsection for the Project Narrative for this FOA. These are: Statement of Need; Expected Outcomes and Outputs; Project Design; Organizational, Administrative and Fiscal Capacity; Budget and Budget Justification. These are also the elements on which points will be awarded as set forth in Section V.A. The applicant should note that in some FOAs, some required items are not counted against the total page count of the Project Narrative, such as the Work Plan.
a. Statement of Need

In this section you must describe your labor market issues and the need for the expanded use of American Apprenticeship to prepare American workers for careers in H-1B industries and occupations projected for growth.

i. American Apprenticeship Needs Assessment

- Provide evidence of the skill gaps in the workforce in the selected region(s), the gaps in the training available to address these skill gaps, and how American Apprenticeship is a viable solution.
- Provide an inventory of innovations (see Appendix B) and training needed to develop and bring to scale quality American Apprenticeship programs for the selected industry(s) and region(s).

ii. Industry and Labor Market Information to Support Job-Driven Projects

- Identify and describe the high growth industry(s) and/or occupations targeted for American Apprenticeship employment and training opportunities and cite evidence that demonstrates that the selected industry(s) and/or occupation(s) is one for which employers currently seek H-1B visas (refer to Appendix A for H-1B Visa Information or the Foreign Labor Certification Data Center at http://www.foreignlaborcert.doleta.gov/performancedata.cfm).
- Identify and describe the skills and competencies necessary for entry into or retention in the selected high-growth H-1B industry(s) and/or occupation(s) and identify and describe the education and training required to attain the skills, competencies, and degrees/credentials required for the selected high-growth H-1B industry(s) and/or occupation(s). If applicable, please describe how the project will be scaled to support skill needs across multiple employers.
- Cite evidence of middle-skill jobs by identifying the average wages offered for the selected high-growth H-1B industry(s) and/or occupation(s), based on national, state, or local data.
- Provide demographic data that assesses the potential participation of underrepresented groups in your Registered Apprenticeship project.

b. Expected Outcomes and Outputs

In this section, you must describe the overall goals as well as the outcomes and outputs the project will achieve. Outcomes and outputs must be an outgrowth of the strategic approach described in the Project Design section. A quarterly progress report will be required of all grantees to demonstrate progress on key metrics as well as an accompanying narrative to describe activities and successes achieved during the quarter.
Demonstrating the Need (2): Keep in mind the stated goal (see Project Design) of the American Apprenticeship Grants: “...to create and scale innovative apprenticeship models in the H-1B occupations and industries.” Applicants will need to access the resources mentioned in this subsection for such items as an inventory of innovations, H-1B visa information, skills and competencies needed in H-1B industries, and other data. Valuable labor market information may be found at http://www.bls.gov and http://factfinder.census.gov/home/saff/main.html?_lang=en, as well as state LMI data, industry associations, employer associations, economic develop entities, research firms, etc.

Demonstrating the Need (1): Demonstrating a need for Federal investment involves multiple factors and must be data and evidence driven. Requirements in the Statement of Need for the FOA are very specific, and the response must be precise and aligned with the requirements. General statements, or anecdotal stories, are not as likely to be competitive. The applicant must provide specific information supported by data that establishes the need across all the requirements. The application must credibly document the true need in all the required areas. Failure to do so is a common weakness in applications that are not funded.

Establishing Goals and Reporting Requirements (2): Note that the FOA contains specific required measures and projections as well as a menu of optional measures. The application must include the required items and should include some of the optional measures as appropriate. Secondly, all grants require reporting. This FOA is no exception. It requires the applicant to affirm that they will meet the department’s reporting requirements. The application must also show how reporting requirements will be met, including how the applicant will work with all partners and how the data will be used to assess progress throughout the grant period.

Establishing Goals and Reporting Requirements (1): Goal setting and progress reporting are essential elements of all grant programs. They constitute the metrics by which the Department assesses the success of the grant. Both factors are described in this section of the FOA - what the project will do and how progress will be reported. First the application must indicate what will be accomplished by the Project Design. What will the project do? What are its goals, milestones, outputs and outcomes (terms that are defined in the FOA)? These are the metrics through which the project will be evaluated, so the applicant should be sure that they are realistic and attainable.
Applicants must include the following:

i. **Project goals, milestones, outputs and outcomes**
You must provide a table and narrative that clearly identifies the overall goals, milestones, outputs and outcome(s) that will result from your American Apprenticeship project. The performance table does not count against the page limit of the Project Narrative (see Section IV.B.4 Requested Attachments, as well as Appendix E Suggested Performance Table).

The narrative description must demonstrate that milestones, outputs and outcomes are reasonable based on the project design. Applicants must explain how the numerical targets were derived and how the targets fit into the overall timeline of grant implementation. While all American Apprenticeship investments must ultimately result in improved employment and training outcomes for jobseekers and businesses, we recognize the results of certain types of innovation – particularly systemic reforms, new policies, capacity building, etc. – may not be captured through traditional outcome measures over the course of a 60-month period of performance. To that end, you must describe short term, intermediate term, and long term milestones, outputs, and outcomes that capture results of both capacity building and employment/training activities.

- **Project goals** are the overarching achievements that you will pursue.
- **Milestones** are key markers of grant progress – these are typically expressed in the form of an action or event marking a significant change or stage in development.
- **Outputs** measure production resulting from grant activities such as the number of apprentices served and number of new programs developed.
- **Outcomes** focus on the desired result – examples could include apprenticeship penetration in a new occupation, increase in apprenticeships in a certain occupation, benefits to employers, increase in average earnings or employment retention rates, or a measurable change in a social indicator (e.g. increased diversity in apprenticeship programs).

**Required Measures and Projections:** In addition to the milestones, outputs, and outcomes of your own choosing described above, in your table, you should provide projections for each of the metrics below: If a metric is not applicable to your project design, please provide the reason(s) why it is not.

**Capacity Building & Employer Metrics**
- Total number of employers to benefit from this grant program;
- Total number of promotional/outreach activities to employers;
- Total number of newly registered American Apprenticeship programs; and
- Total number of existing registered apprenticeship programs to be expanded (e.g., adding occupations or increasing the number of apprentices registered).

**Employment & Training Metrics**
- Total number of participants to receive services under this grant (e.g., includes participants served in pre-apprenticeship, apprenticeship, and by other grant activities);
- Total number of **new apprentices** registered (please see Section II.A. for service levels goals based on funding request);
Note 41

Include All Aspects of Performance Measures: Applicants should be very careful when crafting performance measures to include all aspects required in the FOA. For example, this FOA requires short term, intermediate term, and long term milestones, outputs, and outcomes.

Note 42a

Importance of Required Measures and Projections (2): The applicant should be appropriately but realistically ambitious in proposing outcomes that will maximize return on the Federal investment. A pitfall to avoid is proposing outcomes that are clearly unattainable or that are unreasonable given the proposed project activities and budget.

Note 42b

Importance of Required Measures and Projections (1): Many FOAs contain required measures and projections. In this FOA, they are very specific. The applicant must demonstrate the capacity to deliver positive outcomes relevant to these measures and projections and to collect and report comprehensive participant-level data for them. It is important to note that outcomes projected in the application will be set as concrete goals for the grant, if it is funded, and outcomes cannot be renegotiated.
• Percentage of total participants served who would be identified as a targeted/underrepresented population for purposes of this grant (see Section III.E.3 for a description of targeted/underrepresented populations);
• Percent of apprentices served who complete their apprenticeship program (Completion Rate);
• Average cost per apprentice (calculated as grant funds used for direct training, plus leveraged funds for direct training divided by number of apprentices to be enrolled during the life of the grant).

**Menu of Optional Measures:** To assist applicants in thinking about the types of measures that may be appropriate based on the project designs we anticipate seeing, below are a list of optional measures that may be included in your performance table. This is not meant to be a complete list and you are encouraged to develop other measures critical for your project success.

- Employer revenue growth & return-on-investment;
- Employer turnover reduction;
- Percent of employers who indicate that they are satisfied with services received;
- Dollars/percentage saved on new hires (e.g., advertising, marketing, recruitment, onboarding);
- Other areas of cost reduction (connected to improved training);
- Performance improvements (compared against employer’s business plan);
- Number/type of improved workplace processes;
- Total number of pre-apprenticeship programs supported by the grant;
- Total number of incumbent workers served (*required if an employer is upskilling its existing workforce);
- The average wage of apprentices at completion of apprenticeship program;
- Employment retention rate (as defined in TEGL 17-05); and
- Entered employment rate (as defined in TEGL 17-05) (e.g., to measure participants entering job or receiving an apprenticeship placement).

**ii. Capacity to Report and Evaluate Outcomes**

You must agree to meet DOL reporting requirements and provide individual record-level data that would be made available for evaluation and national reporting purposes.

1. Applicants must affirm that they will report as required by the department once guidance is released, and that rigorous performance reporting will be taken into account in staffing and budgeting plans. If known, applicants must identify a person/position for data coordination and describe any experience with performance tracking systems.

2. Applicants must describe how they will work with program partners, including programs registered as part of the grant to collect and report on key milestones and participant data, including processes and procedures for collecting outcomes after participants have completed the program.

3. Applicants must provide an explanation about how data reported will be assessed to ensure continuous progress throughout the grant period.

---

10 **TEGL 17-05 Common Measures Policy for the Employment and Training Administration’s (ETA) Performance Accountability System and Related Performance Issues** is available online.
Demonstrating Reporting Capacity: Simply stating that the applicant will meet the Department's reporting requirements is probably not enough information to score highly in this area. Instead, the application should demonstrate how the entity will establish reporting and how the applicant will secure reporting from all partners. Prior reporting experience should be noted.
c. **Project Design**

This section describes the project’s plan for an enhanced 21st century American Apprenticeship system and infrastructure through innovations such as those described in Appendix B. The goal of the American Apprenticeship Grants is to create and scale innovative apprenticeship models in H-1B occupations and industries. In many cases, successfully seeding or scaling these models will require incorporating innovative elements into the apprenticeship model or in the supporting infrastructure.

Applicants must present a comprehensive and feasible project approach to innovate and expand apprenticeship; address their identified goals, milestones, outputs, and outcomes (as described above); and include reasonable timelines for completion of work. Applicants must describe the primary partnership and the type of entity leading the effort. To that end, applicants must address the following:

**Expand and Innovate 21st Century American Apprenticeships**

i. **Expanding American Apprenticeships in H-1B industries and occupations:**

Projects must clearly demonstrate the ability to scale programs at a statewide, multi-state, regional, or national level.

1. Describe your American Apprenticeship expansion strategies. Include activities that will allow you to achieve greater scale for existing apprenticeship programs or for new programs to lay the foundations for future scale at a statewide, multi-state, regional, or national level and general timelines. (e.g., signing up additional employers, launching additional sites, etc.). Describe how these expansion strategies will address the workforce skills and training issues identified in the statement of need as well as how these strategies align with the goals, milestones, outputs and outcomes of the project.

2. Describe efforts to promote apprenticeship with employers and increase awareness of the value and benefits of American Apprenticeships as an effective approach to address the skill needs of industry.

3. If applicable, describe how you will expand American Apprenticeship opportunities in IT occupations in fields such as computer systems and software design; or other occupations (applicable across a number of industries) that require IT skills in computer programming, informatics, data processing and digital skills (for example, health care informatics or computer numerical control (CNC) machining, etc.).

ii. **Innovations to Increase the Return on Investment in Apprenticeship:**

American Apprenticeships have a significant return on investment for employers today – 95% of employers participating in apprenticeships testify to this return. However, expanding apprenticeship to new industries and scaling existing models will require a continued focus on sustaining and increasing this return on investment. Projects should be designed to maximize returns/outputs/outcomes (including new programs and significant numbers of new apprentices). Goals for numbers of apprentices served based on the funding level requested by the applicant can be found in Section II.A Award Type and Amount.

---

11 The Benefits and Challenges of Registered Apprenticeship: The Sponsors’ Perspective. by Karin Martinson, Robert Lerman, Lauren Eyster, Kate Chambers (2009).
Overview of Project Design: Project Design is important to all FOAs. Applicants should note that Project Design in this FOA accounts for 56 of the 100 points used to score the application in Section VI. Obviously, it is of critical importance to the application. It includes 7 subsections that include the word “must” throughout. For this FOA, these subsections make up the core of the proposal. The amount of innovation included in this proposal is sufficiently important that the Department has provided an Appendix listing some kinds of innovations that may be used.

Note the Importance of Bringing the Project to Scale: Part of the rationale for many Federal grants is to ensure continuation and growth of the project after Federal funding ends. Applicants should always pay careful attention to requirements to bring an investment to scale. Scaling must not be left to chance. The application for this FOA must describe specifically how existing and new apprenticeship programs will be brought to scale.

Describing Return on Investment (1): Many FOAs will require the applicant to demonstrate the cost of the innovations that are proposed and how these will lead to sustaining and increasing a return on investment (ROI). Attachment B to this FOA provides some suggestions for increasing ROI.

Describing Return on Investment (2): The language of the FOA also contains ROI suggestions such as accelerating the amount of time invested to attain full proficiency in a skill. And the application must show how employer benefits of using apprenticeship training will be demonstrated. The language in this section is clear; the activities described are difficult. The application language must be clear. While there are multiple avenues to attain the required results, each subsection contains the word “must.”
(1) Applicants must provide a description for how their project design takes into account all major costs necessary to achieve key outcomes/milestone. DOL understands that costs will vary balanced with the level of innovation, service needs of targeted population, occupations and associated wages targeted through the project, the duration of training and education/training cost disparity based on location of grant activities. Applicants must describe their plan to cover all costs in order to implement a comprehensive project design. As mentioned above, grant funds are intended to help offset high costs of training and catalyze American Apprenticeship expansion; applicants must describe available leveraged resources to successfully implement their project.

(2) You must describe your strategies (1) to cover the upfront investment to create or scale an apprenticeship program, such as consortia based approaches to developing curriculum, leveraging existing industry standards or curriculum (such as TAACCCT curriculum), or creating online and remote platforms for distributing training content; and (2) to accelerate the amount of time an employer or apprentice must invest before reaching full proficiency in a skill – such as flexible/accelerated learning models, competency based progression strategies that accelerate the amount of time an employer or apprentice must invest before reaching full proficiency in a skill.

(3) You must describe mechanisms to quantify benefits of apprenticeship training to employer sponsors and externally to new employer partners interested in scaling the model. These mechanisms can include industry-specific measures of value for employers such as decreased material wastage in manufacturing or improved patient outcomes in healthcare, etc.

iii. **Innovations to Expand Access to Underrepresented Populations:**

To ensure a sustained, rich supply of talent for apprenticeship programs over the long-term, additional efforts are needed to expand the pool of workers that see American Apprenticeships as a well-respected training opportunity that is available to them.

(1) You must provide a participant outreach and recruitment plan to ensure underrepresented populations have access to apprenticeship opportunities (i.e., women, young men and women of color, persons with disabilities, veterans, including transitioning service members and others).

(2) You must describe your proposed innovations and strategies for how the partnership will break down barriers and increase opportunities for members of underrepresented populations to use apprenticeship as a pathway into skilled occupations and industries. For example, the applicant may describe access to quality pre-apprenticeships and other innovative models that serve as on-ramps to American Apprenticeship opportunities. Please see Appendix B for more models.

(3) You must identify strategies to ensure underrepresented workers persist in the apprenticeship program:

- Describe how you will provide supportive services to ensure persistence in training for workers served through the project. This includes identifying the specific service providers or specifying a plan to procure specific types of services. Supportive services may include WIA/WIOA supportive services, specialized participant services, case management services, dependent care assistance, transportation assistance, mentoring, and other types of services that might be needed for a participant to succeed in training and employment.
- Include other innovative retention strategies such as effective mentorship matching, frequent monitoring, pre-testing for required skills, etc.
Recruiting Underrepresented Populations: Many FOAs will target specific populations. Where that is the case, applicants must demonstrate a recruitment plan that addresses barriers, attracts underrepresented populations, and encourages success through provision of supportive services. Applicants should connect with the public workforce system to examine supportive services. (Refer to Section I.B. for a discussion of allowable costs and activities.)
iv. **Partnership and Policy Innovations that Create a Supportive Ecosystem for Apprenticeship:**

Successful American Apprenticeship projects will expand partnerships, leverage funding, and develop policies for sustainably expanding the apprenticeship models after grant funding ends.

1. You must describe plans to engage and collaborate with a broad range of partners, including optional partners (described in Section III.C) to create the conditions that support significant expansion of American Apprenticeship opportunities.
   - Describe specific plans to align apprenticeship with the public workforce (i.e., agency/entity that administers WIA/WIOA Title I at the State and/or local WIB level);
   - Describe plans to collaborate with educational institutions and training providers (i.e., adult education agencies, career and technical education agencies, vocational rehabilitation agencies, state workforce education coordinating boards, and/or other post-secondary education agencies). The applicant also provides commitments of educational institutions to join the Registered Apprenticeship College Consortium.
   - In those states where they exist, applicants must include plans to collaborate with the State Apprenticeship Agency and State Apprenticeship Councils.

2. You must describe partner commitments, contributions, and leveraged resources, as well as their roles in the project, for example:
   - Developing or scaling an American Apprenticeship program;
   - Promotion and outreach;
   - Providing assistance with program design, curriculum and/or training;
   - Providing facilities and/or personnel to provide related technical instruction and on-the-job learning;
   - Identifying, recruiting, and/or serving potential program participants, including participants from underrepresented populations (such as, women, young men and women of color, persons with disabilities, veterans, including transition service members, among others);
   - Carrying out administrative functions; and
   - Other roles, as applicable.

3. In addition, you must document the commitments of the public partner to the project’s sustainability.
   - This may include policy driven efforts to sustain apprenticeship, sector-focused training strategies, and system alignment efforts. If applicable, applicants should also describe the establishment, modification or pursuit of state, local, or institutional policies and/or other mechanisms to support employer demand for apprenticeship (e.g., tax credits, training vouchers/grants, utilization requirements, leveraging of existing systems or resources, or others).
   - Describe strategies to align long-term funding streams behind your apprenticeship model including federal funds from a diverse array of partners (e.g., Pell/Title IV financial aid, federal work study, GI Bill benefits, Supplemental Nutrition Assistance Program (SNAP) education & training funds, WIA and WIOA, etc.), state and local funding, (e.g., on-the-job training funds, state workforce dollars, funding for participating community colleges, etc.) and private sector investment funds (e.g., training investment funds, social impact bonds, industry association or labor organization funds, etc.).
Collaborating with the State Apprenticeship Agency and State Apprenticeship Councils: Where these exist, collaboration with them is another “must” of this FOA. Applicants must be careful to note such requirements in any FOA. A good idea is to scan the FOA and identify any such “must” factors.

Describing the Public Partner’s Commitments: Often special requirements for partners are stated in the FOA. In this example, the applicant must demonstrate that the public partner is committed to the goals of American Apprenticeship, especially leveraging resources and delivering training strategies.
v. **21st Century American Apprenticeship Sector Focus and Employer Commitments:**

A key goal of the American Apprenticeship Initiative is to develop sector focused projects with strong employer engagement.

(1) You must describe significant employer engagement and demonstrate their commitment to work with DOL (or federally-recognized State Apprenticeship Agencies) to register new apprenticeship programs and hire apprentices. Applicants must identify at least 3 employers (required) who are actively engaged in the project and describe their role. Applicants must provide letters of commitment from employers to further document their commitments and contributions to the project.

(2) Applicants must identify regional or national industry representation and coordination through industry associations or through other evidence such as designation as a “Manufacturing Community” through the Investing in Manufacturing Communities Partnership (IMCP).

vi. **Innovations in American Apprenticeship Training:**

(1) Applicants must describe the American Apprenticeship programs to be developed. Specifically, you must describe how you will transform and adapt alternative work-based learning programs or rigorous education-based internship models into American Apprenticeship programs, and/or to significantly expand existing and successful registered programs. You must describe the process to be used to develop any new standards of apprenticeship. Include program innovations (see examples in Appendix B), and key characteristics of the program including the estimated time for apprentices to complete the program.

(2) Applicants must describe strategies to employ and train apprentices. Each applicant must provide a plan for selecting apprentices in order to meet their enrollment projections within the 60 month period of performance. Out of the projected number of apprentices to be served, the applicant must estimate the numbers who will be new hires versus those who will are incumbent workers. To the extent the incumbent/existing workforce will be served, you must include a clear description of a human capital development plan for significantly upskilling these workers (e.g., taking workers with entry/low skills and moving them into middle-skill jobs with higher wages such as moving an assembly line worker into a technical field like mechatronics). Note: DOL is less interested in proposals that seek to utilize apprenticeship models that make modest improvements in the skills of current workforce.

(3) You must explain how education and training activities will be provided including both the on-the-job learning and classroom-instruction portions of the American Apprenticeship program(s).

(4) The plan should describe how the American Apprenticeship program will lead to job advancement, college credit, and/or industry-recognized credentials for newly hired (and as applicable, incumbent/existing workers).
**Demonstrating Employer Commitment:** Note that the FOA requires at least 3 employers who are actively engaged in the project and who are committed to work with DOL or a State Apprenticeship Agency. Also, the application must include regional or national industry representation. These are further examples of special considerations for this FOA. Applicants should read all FOAs carefully to identify similar requirements. Again, note use of the word “must.”

**Showing How the Project Will Be Developed:** The applicant should note the importance of consistency throughout the application and that all aspects of the application are mutually supportive. Complex interrelationships must be made clear. In this section, for example, the applicant must describe the apprenticeship program that is being designed. The section includes many features that are required, such as a plan for selecting apprentices in order to meet enrollment projections within 60 months (the grant performance period) or the requirement that the application explain how education and training will be provided.
vii. Work Plan:

Applicants must provide a detailed work plan and project management approach that demonstrates their experience implementing a project of the proposed scope. A suggested format can be found in Appendix D. The work plan does not count against the page limit of the Project Narrative. The applicant must:

1. Provide a detailed description of how the proposed work will be accomplished. The work plan must account for all functions or activities identified in the application.
2. Describe the activities, timeframes, deliverables, and key partners required to implement the training and service strategies described in the Project Design section within the grant period of performance.
3. Include timeframes for accomplishing all start-up activities immediately following the start of the grant period of performance including identifying timelines for when new programs are expected to start and when participants will enroll in these programs, in order to ensure significant apprenticeship enrollments within the first 12 months after the grant start date.
4. Discuss factors that might accelerate the work, identify any potential barriers to timely completion of work, and describe how the project will overcome those barriers.
5. Explain how the project milestones, outputs, and outcomes are appropriate for the program design and how the targets fit into the overall timeline of grant implementation.

d. Organizational, Administrative, and Fiscal Capacity

The applicant must provide information on its current mission, structure, staffing, and relevant experience. Describe how these factors contribute to the ability of the organization to conduct the program requirements and meet program expectations. Include information about any organization(s) under contract with the applicant that will have a significant role in implementing the project. Specifically, applicants must:

- Submit an organizational chart describing the composition of the partnership (see Section IV.B.4 below). The organizational chart will not count against the page limit for the Project Narrative.
- Provide an overall staffing plan that describes the professional experience and qualifications that will be required of the project manager, executive and administrative staff, as well as other personnel such as board members, advisors and consultants to fulfill the needs and requirements of the proposed project, including the ability to manage a strategic partnership, fiscal and administrative management, outreach and promotion, and other key areas of the project management. If the project manager or other key personnel are already on staff, provide his/her resume. The resumes will not count against the page limit for the Project Narrative.
- Describe administrative controls and systems to properly manage, monitor and report Federal funds and performance. Describe how the proposed project will use accounting and performance systems and processes that enable timely and accurate financial and performance reporting, and allow for expeditious procurement procedures that comply with Federal, state (if applicable), and other relevant laws and requirements, including across partners, as applicable.
- Provide a process, plan and timeframe for hiring the project manager and key staff (e.g., fiscal, administrative, performance reporting/case management, etc.) to ensure the project can begin immediately.
- Describe how the lead organization will facilitate communications among all levels of the project across partnership members.
- Describe strong experience working with multi-partner programs, including the management process used that led to measurable results for workers and employers.
**Avoiding Work Plan Pitfalls:** The applicant should avoid the following common pitfalls in the Work Plan for the project: a lack of detail describing activities in each project phase; proposed timelines that are either not expeditious enough, or that are overly-ambitious and unreasonable; and proposed costs for project phases that are not justified or are ill-aligned with proposed efforts and activities. The applicant should review the suggested format provided in Appendix D which will provide additional guidance on what to include in the Work Plan. Note that the Work Plan does not count against the Project Narrative page limitation in this FOA.

**Demonstrating Applicant Capacity (1):** The application must demonstrate project management expertise, as well as the capacity to implement and manage a Federal grant successfully. Applicants do not need previous experience managing Federal funding and grant projects, but they must speak persuasively about their ability to leverage other previous experience and bring it to scale in support of a large Federal investment. Responses should demonstrate the ability to ramp-up training, credential achievement, and participant follow-up within a relatively compressed timeframe.

**Demonstrating Applicant Capacity (2):** Federal funding often comes with specific fiscal, administrative, and performance management requirements related to detailed tracking and accountability reporting. Applicants should demonstrate that they have the capacity to meet those requirements, including detail related to how they propose to collect, manage, and report data. It is recommended that applications describe previous successes and demonstrated results with other grant programs, as this may help reviewers feel more confident about their ability to skillfully manage a large Federal investment.

**Demonstrating Applicant Capacity (3):** Note that this section requires an organization chart describing the partnership (not counted against the Project Narrative page limit), and a staffing plan describing professional experience and qualifications of key staff. Resumes (also not counted against the page limit) may be used for key personnel already on staff.
e. **Budget and Budget Justification**

Applicants must provide a budget narrative (see Section IV.B.2) based on the activities outlined in the project narrative. At a minimum, applicants must:

- Demonstrate how proposed expenditures will support the expansion of apprenticeship opportunities for both employers and individuals;
- Describe costs associated with each line item on the SF-424A;
- Include a description of which costs will be paid by the grant and those that will be covered by leveraged resources. This includes cash or in-kind support (e.g., Pell/Title IV financial aid, federal work study, GI Bill benefits, Supplemental Nutrition Assistance Program (SNAP) education & training funds, WIA and WIOA, etc.), state and local funding, (e.g., on-the-job training funds, state workforce dollars, funding for participating community colleges, etc.), and private sector investment funds (e.g., training investment funds, social impact bonds, industry association or labor organization funds, etc.).

Please see Section IV.B.2. for information on requirements related to the budget and budget justification.

4. **Attachments to the Project Narrative**

In addition to the Project Narrative, you must submit attachments. All attachments must be clearly labeled as Attachments. Only those Required and Requested attachments listed below will be excluded from the page limit. You must submit your application in one package because documents received separately will be tracked separately and will not be attached to the application for review. Save all files with descriptive file names of 50 characters or less and be sure to only use standard characters in file names: A-Z, a-z, 0-9, and underscore (_). File names may not include special characters (e.g. &, –, *, %, /, #), periods (.), blank spaces or accent marks, and must be unique (i.e., no other attachment may have the same file name). An underscore (example: my_Attached_File.pdf) may be used to separate a file name.

**Required Attachment**

The following attachment must be included with the application package and the failure to do so will cause the application package to be screened out. The Required Attachment will not count against the 30-page limit for the Project Narrative.

**Abstract:** You must submit an abstract summarizing the proposed project, including, but not limited to, the scope of the project and proposed outcomes. The proposed project must include the following (also see Appendix F):

I. Lead Applicant Name:

II. Lead Applicant City/State:

III. Primary Partnership Entities:
   a. Legal Name and Type of Private Sector Entity (see Section III Eligibility Information)
   b. Legal Name and Type of Public Sector Entity (see Section III Eligibility Information)

IV. Additional Key Partner(s):
**Note 54**

*Completing the Budget Information:* Note that the budget is contained in two parts, the Budget Information Form, or SF-424A, and the Budget Narrative, which must provide a description of costs for each line item on the 424A. Section IV.B.2. describes the requirements for the project budget.

**Note 55a**

*Developing Required and Requested Attachments to the Project Narrative (2):* The FOA also lists some requested, but not required, attachments. As noted, some of the requested attachments will count toward scoring. Any item that can count toward scoring should be included in the application package. For this FOA, none of the required and requested attachments will count against the 30-page Project Narrative limit.

**Note 55b**

*Developing Required and Requested Attachments to the Project Narrative (1):* The applicant must be sure that any required attachments are included in the application package and meet the specifications indicated in the FOA. Anything received separately from the application package will not be attached to the application package for review. For example, this FOA requires an Abstract, employer commitment letters, and, in some cases, documentation of IHE accreditation status.

**Note 56**

*Project Abstract Guidance:* The Abstract is a critical component of the Attachments to the FOA. Applicants should keep in mind that the Abstract is often a reviewer’s first impression of the application. Therefore, the Abstract should be a clear, succinct, and polished summary of the grant request. Page limitations for the Abstract will be provided in each FOA. The applicant should use any guidance provided when completing the Abstract.
V. Areas Served by Grant (by city, county, and state):

VI. Total Funding Level Requested:

VII. Project Name:

VIII. Summary of Program Activities:

IX. Numbers of Individuals to be Served:

X. Populations to be Served:

XI. Targeted H-1B Industry(s)/Occupations:

XII. Contact Information for each partner: Provide for each the name of the partner, the contact person’s name, and his/her position title, business phone, and business email.

The Abstract is limited to two-page double-spaced single sided 8.5x11 inch pages with 12 point text font and 1 inch margins. When submitting in grants.gov, this document must be uploaded as an attachment to the application package and specifically labeled “Abstract.”

Requested Attachments

The following attachments are requested, but their omission will not cause the application to be screened out and not reviewed. None of these Requested Attachments will count against the 30-page limit for the Project Narrative. If the omission of the attachment will impact scoring, such an impact will be noted in the description of the attachment.

a. **Project/Performance Site Location(s) Form**: You should submit a [Project/Performance Site Location(s) Form](#). This form is in the grants.gov application package. Please note that this is a standard form used for many programs and has a check box for applying as an individual. Disregard this box on the form as individuals are not eligible to apply for this announcement. This attachment does not impact scoring of the application.

b. **Indirect Cost Rate Agreement**: If you are requesting indirect charges, attach the most recent Negotiated Indirect Cost Rate Agreement approved by your Federal Cognizant Agency. (For more information, see Section IV.B.2. and Section IV.E.1.) This attachment does not impact scoring of the application.

c. **Organizational Chart**: Section IV.B.3 of the FOA requires applicants to describe their Administrative, Organizational, and Fiscal Capacity. Applicants must submit an organizational chart describing the composition of the partnership. The applicant must clearly identify all relevant leadership, program, administrative, and advisory roles. For project manager or other key personnel are already on staff, provide his/her resume. These attachments will impact scoring of the application.

d. **Work Plan and Performance Tables**: See Appendices C and E. These attachments will impact scoring of the application.

e. **Partner Commitment Letters**: These attachments will impact scoring of the application. Applicants must provide documentation of the commitments of the required public sector and private sector entities that comprise the primary partnership. If the proposed project is occurring in a State Apprenticeship Agency state, commitment must also be provided by the State Apprenticeship Council. (Please see Section III for required partners.) Agreements may come in many forms such as signed memoranda of agreement/understanding, a partnership agreement, non-form substantive letter of commitment, or other types of signed agreements, which demonstrate the roles and responsibilities of each consortium member. All documentation of the commitments must:
Performance Table: Often an FOA will provide helpful suggested forms and formats. Applicants should take advantage of these and be certain that the forms they use contain all the information requested in the project narrative instructions. In this FOA, the required performance table does not count against the Project Narrative 30 page limit. Also note that it is a requested attachment, and a suggested sample is provided in an attachment to the FOA.

Completing the Site-Location Attachment: While this form is not counted in scoring, it should help the applicant to organize and align the project’s geography. Applicants should take advantage of all aspects of an FOA that will help with the organization and development of the proposal.

Indirect Cost Rate Guidance (1): It is likely that applicants will need an indirect cost rate agreement with their Federal cognizant agency if they have more than one funding source and if indirect costs are to be charged to a Federal program. The Federal cognizant agency is typically that from which they receive the most funding.

Indirect Cost Rate Guidance (2): Applicants should refer to individual Federal Web sites for further information about indirect cost rate proposal requirements. For example, further information from DOL’s Division of Cost Determination can be found at http://www.dol.gov/oasam/programs/boc/costdeterminationguide/main.htm.

Submitting an Organization Chart of the Partnership: Here again, the FOA suggests a mechanism that will help the applicant organize the proposal. While not required, this organization chart of the partnership will impact scoring and should be submitted to support the description of the organization in Section IV.B.3 of the FOA.

Submitting Work Plan and Performance Tables: These attachments should be included not only because they impact scoring but also because completion of them will help the applicant organize and align the project’s components. Appendices C and E provide valuable clues as to what is expected in these attachments.

Submitting Partner Commitment Letters: Often FOAs will require corroborating information to support the narrative. Applicants must secure this information as required and include it in the application. The commitment statements required in this FOA may be in various forms depending on the relationships among partners, but they must contain the information required in this section. These will impact scoring and should be included among the attachments. Pay particular attention to the signature requirements for partner commitment letters.
Provide partner contact information (name, position title, business phone, and business email).

- Be signed by an authorized representative of the organization;
- Describe how the partner is involved in the project and the role that it will play throughout implementation;
- Identify whether this entity will receive grant funds to support their work;
- If the partner is an educational institution, a commitment to join the Registered Apprenticeship College Consortium; and
- Identify resources being provided by the organization to support the project (i.e. financial or in-kind contributions).

**Documentation of Institution of Higher Education (IHE) Accreditation Status:** This attachment will not impact scoring. Applications that include an IHE as a the Public Sector Entity for the Primary Partnership (either as the lead or as a partner) must submit documentation verifying the IHE’s status as an institution of higher education that is accredited by an agency that has been recognized by the U.S. Department of Education. (See Section III.A.2 of the FOA for more information.)

**f. Employer Commitment Letters:** This attachment will impact scoring of the application. Applicants must demonstrate strong employer engagement (a minimum of 3 employers is required). Employer commitment letters must be non-form, substantive letters of commitment that include specific roles and responsibilities of the employer. A regional and/or national industry association may also submit letters of commitment. Employers or regional industry associations must represent the industry(s)/occupation(s) and geographic service areas targeted through the American Apprenticeship grants. Employer commitment letters must:

- Provide employer contact information (name, position title, business phone, and business email).
- Be signed by an authorized representative of the employer or regional industry association;
- Describe how the employer is involved in the project, including their role in providing on-the-job learning via a Registered Apprenticeship program;
- Include any interest or plans to join the Registered Apprenticeship College Consortium;
- Identify resources being provided by the employer to support the project (i.e. mentors, the donation of equipment, or other financial or in-kind contributions).

C. Submission Date, Times, Process and Addresses

The closing date for receipt of applications under this announcement is April 30, 2015. Applications must be submitted either electronically or in hard copy by mail, or in hard copy by hand delivery (including overnight delivery). Hard copy applications must be received at the address below no later than 4:00:00 p.m. Eastern Time on the closing date. Applications submitted on grants.gov must also be successfully submitted (as described below) no later than 4:00:00 p.m. Eastern Time on the closing date. You are cautioned that applications should be submitted before the deadline to ensure that the risk of late receipt of the application is minimized. Applications sent by e-mail, telegram, or facsimile (FAX) will not be accepted.

Applicants submitting applications in hard copy by mail or overnight delivery must submit an original signed application (including the SF-424) and one (1) “copy-ready” version free of bindings, staples or protruding tabs to ease in the reproduction of the application by DOL. Applicants submitting
**Submission of IHE Accreditation Status:** Applicants must read the requirements very carefully to note any possible variations or exceptions. While the IHE accreditation status attachment does not impact scoring for this FOA, it must be submitted if an IHE is the Public Sector Entity for the Primary Partnership.

**Submitting Employer Commitment Letters:** Here is an example of very specific requirements for corroboration documentation. Applicants must watch for and comply with such requirements. Note that these letters will impact scoring, and the application must include at least 3 employers committed to the project. The content of these letters is detailed and specific and geared to each employer. They must be signed by an authorized representative of the employer or business association, and their content should support the employers’ commitment to the project.

**Acceptable Submission Methods (1):** Applicants should be familiar with application submission guidelines, which are outlined in detail in the FOA. They should not submit an application in an incorrect format or through unaccepted communication channels, which will result in the application being deemed non-responsive. Applicants should closely read the acceptable submission methods.

**Acceptable Submission Methods (2):** Missing the deadline is one of the most common and avoidable pitfalls. Be sure to leave extra time (i.e. three days) for registration and submission on Grants.gov – do not wait until the day before. DOL cannot make exceptions to this requirement. Only applications that have been successfully submitted and successfully validated will be considered.
applications in hard copy are also required to include in the hard copy submission an identical electronic copy of the application on compact disc (CD). If discrepancies between the hard copy submission and CD copy are identified, the application on the CD will be considered the official applicant submission for evaluation purposes. Failure to provide identical applications in hardcopy and CD format may have an impact on the overall evaluation.

If an application is physically submitted by both hard copy and electronically, a letter must accompany the hard-copy application stating which application to review. If no letter accompanies the hard copy, we will review the copy submitted electronically.

No exceptions to the mailing and delivery requirements set forth in this notice will be granted. Further, documents submitted separately from the application, before or after the deadline, will not be accepted as part of the application.

Mailed applications must be addressed to the U.S. Department of Labor, Employment and Training Administration, Office of Grants Management, Attention: Sara Gallagher Williams, Grant Officer, Reference FOA-ETA-15-02, 200 Constitution Avenue, NW, Room N4716, Washington, DC 20210. Mail delivery in the Washington DC area may be delayed due to mail decontamination procedures. Hand-delivered applications will be received at the above address. All overnight delivery submissions will be considered to be hand-delivered and must be received at the designated place by the specified closing date and time.

Applications that are submitted through Grants.gov must be successfully submitted online no later than 4:00:00 p.m. Eastern Time on the closing date and then subsequently validated by Grants.gov. The submission and validation process is described in more detail below. The process can be complicated and time-consuming. You are strongly advised to initiate the process as soon as possible and to plan for time to resolve technical problems if necessary. Note that validation does not mean that your application has been accepted as complete or has been accepted for review. Rather, grants.gov only verifies that certain parts of an application have been submitted.

We strongly recommend that before you begin to write the application, you should immediately initiate and complete the “Get Registered” registration steps. You should read through the registration process carefully before registering. These steps may take as much as four weeks to complete, and this time should be factored into plans for timely electronic submission in order to avoid unexpected delays that could result in the rejection of an application. The site also contains registration checklists to help applicants walk through the process. We strongly recommend that you download the “Organization Registration Checklist” and prepare the information requested before beginning the registration process. Reviewing and assembling required information before beginning the registration process will alleviate last minute searches for required information and save time.

As described earlier in Section IV.B.1., you must have a DUNS Number and you must register with SAM before submitting an application.

The next step in the registration process is creating a username and password with Grants.gov to become an Authorized Organizational Representative (AOR). AORs will need to know the DUNS Number of the organization for which they will be submitting applications to complete this process. Read more detailed instructions for creating a profile on Grants.gov.
Submitting an Application: As indicated elsewhere in these annotations, Grants.gov is an essential starting point for any potential grant applicant. This site contains clear, sequential steps for the many actions that are necessary to initiate a grant application. It serves as a convenient backstop to help understand the many submission requirements set forth in this or any FOA. It also contains FAQs, grant application registration information, grant application forms, and many other resources. It is critical for the applicant to be sure to complete every step and requirement in this section. Abundant guidance is provided when used in conjunction with Grants.gov.
After creating a profile on Grants.gov, the E-Biz point of Contact (E-Biz POC) - a representative from your organization who is the contact listed for SAM – will receive an email to grant the AOR permission to submit applications on behalf of their organization. The E-Biz POC will then log in to Grants.gov and approve an individual as the AOR, thereby giving him or her permission to submit applications. Learn more about AOR Authorization, or track AOR status online.

An application submitted through Grants.gov constitutes a submission as an electronically signed application. The registration and account creation with Grants.gov, with E-Biz POC approval, establishes an AOR. When an application is submitted through Grants.gov, the name of the AOR on file will be inserted into the signature line of the application. You must register the individual who is able to make legally binding commitments for your organization as the AOR; this step is often missed and it is crucial for valid submissions.

When a registered applicant submits an application with Grants.gov, an electronic time stamp is generated within the system when the application is successfully received by Grants.gov. Within two business days of application submission, Grants.gov will send the applicant two email messages to provide the status of the application’s progress through the system. The first email, sent almost immediately, will contain a tracking number and will confirm receipt of the application by Grants.gov. The second email will indicate the application has either been successfully validated or has been rejected due to errors. Grants.gov will reject applications if the applicant’s registration in SAM is expired. Only applications that have been successfully submitted by the deadline and later successfully validated will be considered. It is your sole responsibility to ensure a timely submission. While it is not required that an application be successfully validated before the deadline for submission, it is prudent to reserve time before the deadline in case it is necessary to resubmit an application that has not been successfully validated. Therefore, enough time should be allotted for submission (two business days) and, if applicable, additional time to address errors and receive validation upon resubmission (an additional two business days for each ensuing submission). It is important to note that if enough time is not allotted and a rejection notice is received after the due date and time, the application will not be considered.

To ensure consideration, the components of the application must be saved as .doc, .docx, .xls, .xlsx, .rtf or .pdf files. If submitted in any other format, the applicant bears the risk that compatibility or other issues will prevent DOL from considering the application. We will attempt to open the document but will not take any additional measures in the event of problems with opening.

We strongly advise applicants to use the various tools and documents, including FAQs, which are available on the “Applicant Resources” page.

We encourage new prospective applicants to view the online tutorial, “Grant Applications 101: A Plain English Guide to ETA Competitive Grants,” available through Workforce3One.

To receive updated information about critical issues, new tips for users and other time sensitive updates as information is available, you may subscribe to “Grants.gov Updates.”

If you encounter a problem with Grants.gov and do not find an answer in any of the other resources, call 1-800-518-4726 or 606-545-5035 to speak to a Customer Support Representative or email...
Accessing ETA’s Grant Application Tools: ETA has developed and provided for applicant use many grant application tools (of which this Annotated FOA is an example). Tools may include webinars about specific grant opportunities as well as general information about grant application. Applicants should consult these sites for valuable assistance in the grant application process.
support@grants.gov. The Contact Center is open 24 hours a day, seven days a week. It is closed on Federal holidays.

Late Applications: For applications submitted on Grants.gov, only applications that have been successfully submitted no later than 4:00:00 p.m. Eastern Time on the closing date and then successfully validated will be considered. You take a significant risk by waiting to the last day to submit through Grants.gov.

Any hard copy application received after the exact date and time specified for receipt at the office designated in this notice will not be considered, unless it is received before awards are made, it was properly addressed, and it was: (a) sent by U.S. Postal Service mail, postmarked not later than the fifth calendar day before the date specified for receipt of applications (e.g., an application required to be received by the 20th of the month must be postmarked by the 15th of that month), or (b) sent by professional overnight delivery service to the addressee not later than one working day before the date specified for receipt of applications. “Postmarked” means a printed, stamped or otherwise placed impression (exclusive of a postage meter machine impression) that is readily identifiable, without further action, as having been supplied or affixed on the date of mailing by an employee of the U.S. Postal Service. Therefore, you should request the postal clerk to place a legible hand cancellation “bull’s eye” postmark on both the receipt and the package. Failure to adhere to these instructions will be a basis for a determination that the application was not filed timely and will not be considered. Evidence of timely submission by a professional overnight delivery service must be demonstrated by equally reliable evidence created by the delivery service provider indicating the time and place of receipt.

D. Intergovernmental Review
This funding opportunity is not subject to Executive Order 12372, “Intergovernmental Review of Federal Programs.”

E. Funding Restrictions
All proposed project costs must be necessary and reasonable and in accordance with Federal guidelines. Determinations of allowable costs will be made in accordance with the Cost Principles, now found in the Office of Management and Budget’s Uniform Administrative Requirements, Cost Principles, andAudit Requirements for Federal Awards (Uniform Guidance), codified at 2 CFR Part 200. Disallowed costs are those charges to a grant that the grantor agency or its representative determines not to be allowed in accordance with the applicable Federal cost principles or other conditions contained in the grant. Applicants, whether successful or not, will not be entitled to reimbursement of pre-award costs.

1. Indirect Costs
As specified in the Uniform Guidance Cost Principles, indirect costs are those that have been incurred for common or joint objectives and cannot be readily identified with a particular final cost objective. An indirect cost rate is required when an organization operates under more than one grant or other activity, whether Federally-assisted or not. You have two options to claim reimbursement of indirect costs.

Option 1: You may use a NICRA or Cost Allocation Plan (CAP) supplied by the Federal Cognizant Agency. If you do not have a NICRA/CAP or have a pending NICRA/CAP, and in either case choose to include estimated indirect costs in your budget, at the time of award the Grant Officer will release funds in the amount of 10% of salaries and wages to support indirect costs. Within 90 days of award, you are required to submit an acceptable indirect cost proposal or CAP to your Federal Cognizant Agency to
**Determining Allowable Costs:** Applicants should be familiar with the Cost Principles in the cited OMB Uniform Administrative Requirements as well as the Allowable Activities and costs described in Section I.B.
obtain a provisional indirect cost rate. (See Section IV.B.4. **Indirect Cost Rate Agreement** for more information on submission requirements.)

**Option 2:** Any organization that has never received a negotiated indirect cost rate, with the exceptions noted at 2 CFR 200.414(f) in the Cost Principles, may elect to charge a de minimis rate of 10% of modified total direct costs (see 2 CFR 200.68 for definition) which may be used indefinitely.

If you choose this option, this methodology must be used consistently for all Federal awards until such time as you choose to negotiate for an indirect cost rate, which you may apply to do at any time. (See 2 CFR 200.414(f) for more information on use of the de minimis rate.)

2. **Administrative Costs**

Under this FOA, an entity that receives a grant to carry out a project or program may not use more than 10 percent of the amount of the grant to pay administrative costs associated with the program or project. Administrative costs could be direct or indirect costs. Administrative costs do not need to be identified separately from program costs on the SF-424A Budget Information Form. However, they must be tracked through the grantee’s accounting system. To claim any administrative costs that are also indirect costs, the applicant must obtain an Indirect Cost Rate Agreement from its Federal Cognizant Agency, as specified above.

3. **Salary and Bonus Limitations**

None of the funds appropriated under the heading “Employment and Training” in the appropriation statute(s) may be used by a recipient or subrecipient of such funds to pay the salary and bonuses of an individual, either as direct costs or indirect costs, at a rate in excess of Executive Level II. This limitation does not apply to vendors providing goods and services as defined in the Audit Requirements of the OMB Uniform Guidance (see 2 CFR 200 Subpart F). Where States are recipients of such funds, States may establish a lower limit for salaries and bonuses of those receiving salaries and bonuses from subrecipients of such funds, taking into account factors including the relative cost-of-living in the State, the compensation levels for comparable State or local government employees, and the size of the organizations that administer Federal programs involved including Employment and Training Administration programs. See Public Law 113-76, Division H, Title I, section 105, and Training and Employment Guidance Letter number 05-06 for further clarification.

4. **Intellectual Property Rights**

The Federal Government reserves a paid-up, nonexclusive and irrevocable license to reproduce, publish, or otherwise use, and to authorize others to use for Federal purposes: i) the copyright in all products developed under the grant, including a subaward or contract under the grant or subaward; and ii) any rights of copyright to which the recipient, subrecipient or a contractor purchases ownership under an award (including, but not limited to, curricula, training models, technical assistance products, and any related materials). Such uses include, but are not limited to, the right to modify and distribute such products worldwide by any means, electronically or otherwise. The grantee may not use Federal funds to pay any royalty or license fee for use of a copyrighted work, or the cost of acquiring by purchase a copyright in a work, where the department has a license or rights of free use in such work. If revenues are generated through selling products developed with grant funds, including intellectual property, these revenues are program income. Program income is added to the grant and must be expended for allowable grant activities. Additionally, the Federal government has the right to require intellectual property developed under a competitive Federal award process to be licensed under a Creative
Administrative Cost Limits: In this FOA, administrative costs are capped at not more than 10 percent of the grant award amount, a fairly common limit. Applicants should discuss proposed administrative costs in the Budget Narrative.

Intellectual Property Guidance: Generally speaking, if Federal funds are used to develop intellectual property, the Federal government reserves rights to that property. However, this does not usually apply if funds are used to adapt existing property. Execution of these requirements may be complicated. Applicants should review this section carefully to assure proper handling of Intellectual Property Rights.
Commons Attribution license. This license allows subsequent users to copy, distribute, transmit and adapt the copyrighted Work and requires such users to attribute the Work in the manner specified by the recipient.

If applicable, and a Creative Commons Attribution license is not required, the following needs to be on all products developed in whole or in part with grant funds:
“This workforce product was funded by a grant awarded by the U.S. Department of Labor’s Employment and Training Administration. The product was created by the grantee and does not necessarily reflect the official position of the U.S. Department of Labor. The U.S. Department of Labor makes no guarantees, warranties, or assurances of any kind, express or implied, with respect to such information, including any information on linked sites and including, but not limited to, accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability, or ownership. This product is copyrighted by the institution that created it. Internal use by an organization and/or personal use by an individual for non-commercial purposes is permissible. All other uses require the prior authorization of the copyright owner.”

5. Use of Grant Funds for Participant Wages
Grant funds are prohibited from directly paying participant wages. See discussion of allowable costs in Section I.B. Allowable Activities.

6. Fair Labor Standards Act
To the extent the project will enroll individuals under the age of 18, applicants must comply with the child labor provisions of the Fair Labor Standards Act, particularly the hazardous occupation provisions that apply to the employment of 16 and 17-year-olds in nonagricultural occupations. See 29 CFR 570.50-.68.

F. Other Submission Requirements
Withdrawal of Applications: Applications may be withdrawn by written notice to the Grant Officer at any time before an award is made.

V. Application Review Information

A. Criteria
We have instituted procedures for assessing the technical merit of applications to provide for an objective review of applications and to assist you in understanding the standards against which each application will be judged. The evaluation criteria are based on the information required in the application as described in Sections IV.B. Reviewers will award points based on the evaluation criteria described below:
Note 73

*Paying Apprenticeship Wages:* Sometimes a general rule will apply to an FOA that may not be obvious. For example, applicants should note that grant funds may not be used to pay participant wages. Since Apprenticeships include payment of wages, applicants should read carefully the allowable costs discussion in Section I.B., Allowable Activities.

Note 74

*Section V, Application Review Information:* This section of the FOA replicates the outline and headings of the Project Narrative in Section IV. It provides the evaluation criteria that will be used to award points for each criterion and sub-criterion of the section. Applicants should pay close attention to the language of the evaluation criteria that will be used to grade the application. For example, language such as “applicant provides strong evidence” gives a clue as to how this segment will be viewed.

Note 75a

*Evaluation Criteria and Application Guidance (1):* It is critical that the application addresses clearly each specific evaluation criterion. The application may be well written, clear, and tell a compelling story, but if it does not address the components of the evaluation criteria, it is not likely to be funded. It is important to note that each evaluation criterion generally contains multiple “sub-criteria,” all of which the applicant is expected to address. Failure to address all of these sub-requirements puts the application at risk for being less responsive and thus scored lower.

Note 75b

*Evaluation Criteria and Application Guidance (2):* For this FOA, applicants are required to structure their applications according to the order and framework laid out in the Evaluation Criteria Section V. (Note that this is the same as the outline of the Project Narrative in Section IV.B.3.) Members of the technical review panels that evaluate and rate applications are responsible for reviewing multiple applications. By presenting the application within the framework laid out in the FOA, it will be more easily reviewed and evaluated by the review panel.

Note 75c

*Evaluation Criteria and Application Guidance (3):* Even if applicants have little or no experience applying for Federal funding and do not have a professional grant-writer on staff, they should not let these factors dissuade them from applying for a DOL grant. If the application is written clearly, persuasively, responsively, and with evidence of the strength of the applicant’s plan and capacity, it may be considered for funding. A guiding piece of advice here is, “Show, don’t just tell.” Application reviewers want to see the “how,” not just the “what.”
1. Statement of Need (up to 15 points)

   i. American Apprenticeship Need Assessment (7 points)

Points will be awarded based on the extent to which:

   (1) The applicant provides strong evidence of the skill gaps in the workforce in the selected region(s), the gaps in the training available to address these skill gaps, and that American Apprenticeship is a viable solution. (3 points).
   (2) The applicant provides evidence of innovations (see Appendix B) and training needed to develop and bring to scale quality American Apprenticeship programs for selected industry(s) and region(s). (4 points)

   ii. Industry and Labor Market Information (8 points)

Points will be awarded based on:

   (1) The extent to which the applicant can demonstrate through the use of labor market information that its selected industries/occupations are high growth industry(s)/occupation(s) for which employers currently seek H-1B visas. (2 points)
   (2) The extent to which the applicant demonstrates an understanding of H-1B-relevant skills, abilities, and degrees/credentials required in the H-1B industries and occupations targeted in the proposal; and as applicable, how the project can be scaled to support skill needs across multiple employers. (3 points)
   (3) The quality of the evidence provided on average wages offered for the selected high-growth H-1B industry(s) and/or occupation(s), based on national, state, or local data. (1 points)
   (4) The quality of the demographic data provided by the applicant that demonstrates a strong likelihood of potential participation of underrepresented groups - including women, young men
Statement of Need: Applicants will note that the Statement of Need must provide specific evidence that establishes a strong rationale for the work that is being proposed and that the need relates directly to the targeted populations. This criterion accounts for 15% of the total scoring for this FOA. All the pieces must complement each other. In this FOA, skill gaps must be demonstrated in the workforce and these must be related to targeted industries that seek H-1B visas.
and women of color, persons with disabilities, low-skilled populations, veterans, including transitioning service members, among others - in the American Apprenticeship project. (2 points)

2. Expected Outcomes and Outputs (up to 15 points)

i. Project goals, milestones, outputs and outcomes (10 points)

Points will be awarded based on:

(1) The overall reasonableness and feasibility of the goals, milestones, outputs and outcomes. Applicants must demonstrate that goals, milestones, outputs and outcomes are appropriate for the overall project design, and will lead to the successful implementation of the project. Reviewers will consider the extent to which the applicant has proposed appropriate Optional Measures - in addition to the Required Measures - that will allow the applicant to more accurately measure the impact of the project. Reviewers also will consider the extent to which this information is clearly organized in a table and allows for full transparency (e.g., See suggested performance template in Appendix E). (6 points)

(2) Whether the proposed goals, milestones, outputs, and outcomes represent a logical sequence in the short-term, intermediate-term, and long-term. Applicants must demonstrate that the projections for the Required Measures are appropriate and feasible based on the project design, while being sufficiently challenging. Reviewers also will award points based on whether the targets, milestones and outputs fit into the overall timeline of grant implementation. Applicants that propose a goal for the number of apprentices served that is fewer than the goal established at Section II.A. Minimum Goals for Apprentices Served during the Grant Period Based on Funding Request will receive zero (0) points for this section. (4 points)

ii. Capacity to Report and Evaluate Outcomes (5 points)

Points will be awarded based on:

(1) The extent to which the applicant demonstrates its commitment and ability to report data to DOL and that rigorous performance reporting will be taken into account in staffing and budgeting plans. If known, applicant identifies a person/position for data coordination and describes any experience with performance tracking systems. (2 points)

(2) The strength of applicant’s capabilities to work with program partners to effectively collect and report on milestones, outputs, and outcomes described in the application, including procedures for collecting outcomes after participants have completed the program. (2 points)

(3) The strength of the applicant’s performance plan to analyze and assess data to help ensure continuous improvement throughout the grant period project. (1 point)

3. Project Design (up to 56 points)

Reviewers will score based on the extent to which the application (1) reflects a coherent and feasible approach to meet the identified goals, milestones, outputs and outcomes addressed above; (2) proposes innovative strategies to create and/or expand American Apprenticeship in H-1B industries or occupations (see Appendices A and B); and (3) includes a work plan that will reasonably ensure completion of work.
**Expected Outcomes and Outputs:** The Applicant must demonstrate that the proposed goals, milestones, outputs, and outcomes are reasonable and attainable, sufficiently challenging, and support the project. The applicant must demonstrate the ability to report the data to DOL.

**Project Design:** In any FOA, the project design will constitute the heart of the proposal. Its importance to this FOA can be seen in the total of 56 points to be awarded for this element. These points are further allocated to many aspects of this element, each of which contributes to the whole. The applicant should note how the various segments of this element complement and support each other and are summarized in the Work Plan, a key product of this section.
Expand and Innovate 21st Century American Apprenticeships

i. Expanding American Apprenticeships in H-1B industries and occupations (8 points)

Points will be awarded based on:

1. The extent to which the applicant demonstrates strong American Apprenticeship expansion strategies including activities that will allow the applicant to achieve greater scale for existing apprenticeship programs or for new programs to lay the foundations for future scale at a statewide, multi-state, regional, or national level and general timelines. (e.g., signing up additional employers, launching additional sites, etc.). Reviewers will consider the likelihood that strategies will address the workforce skills and training issues identified in the statement of need as well as how well strategies align with the goals, milestones, outputs and outcomes of the project. (4 points)

2. The strength of efforts to promote apprenticeship with employers and increase awareness of the value and benefits of American Apprenticeships as an effective approach to address the skill needs industry. (3 points)

3. The degree to which the applicant has identified strategies to expand American Apprenticeship opportunities in IT occupations in fields such as computer systems and software design; or other occupations applicable across a number of industries that require IT skills in computer programming, informatics, data processing and digital skills (for example health care informatics or computer numerical control (CNC) machining, etc.). (1 point)

ii. Innovations to Increase the Return on Investment in Apprenticeship (8 points)

Points will be awarded based on:

1. The extent to which the project design takes into account all major costs necessary to achieve key outcomes/milestone. Reviewers will consider whether the applicant details the major costs associated with the project and provides a reasonable plan to cover the total costs of the project through grant and leveraged resources. The reasonableness and feasibility of the applicant’s approach to cost savings, and the impact of leveraged resources that will allow grant funds to be utilized strategically. Reviewers will consider whether the applicant’s approach is sufficient to ensure that all costs can be covered to implement a comprehensive project design and to ensure adequate leveraged resources for all apprentices to complete training. (3 points)

2. The extent to which the applicant proposes strategies that (1) reduce the upfront investment to create or scale an apprenticeship program, such as consortia based approaches to developing curriculum, leveraging existing industry standards or curriculum, or creating online and remote platforms for distributing training content; and (2) accelerate the amount of time an employer or apprentice must invest before reaching full proficiency in a skill – such as flexible/accelerated learning models, competency based progression strategies that accelerate the amount of time an employer or apprentice must invest before reaching full proficiency in a skill. (3 points)

3. The extent to which the applicant incorporates mechanisms to quantify benefits of apprenticeship training to employer sponsors and externally to new employer partners interested in scaling the model. These mechanisms can include industry-specific measures of value for employers such as decreased material wastage in manufacturing or improved patient outcomes in healthcare, etc. (2 points)
This page contains no comments
iii. **Innovations to Expand Access to Underrepresented Populations: (8 points)**

Points will be awarded based on:

1. The strength of the applicant’s participant outreach and recruitment plan and the likelihood that it will result in underrepresented populations having access to apprenticeship opportunities (i.e., women, young men and women of color, persons with disabilities, low-skilled populations, veterans, including transitioning service members and others). (3 points)
2. The quality of the innovations and strategies proposed and the likelihood that they will break down barriers and increase opportunities for members of underrepresented populations to use apprenticeship as a pathway into skilled occupations and industries. (3 points)
   - Note: Reviewers will consider whether the applicant will provide access to quality pre-apprenticeships and/or other innovative models that serve as on-ramps to American Apprenticeship opportunities. Please see Appendix B for more models.
3. The level of commitment to and integration of strategies that will ensure underrepresented workers persist in the apprenticeship program, exemplified by: (2 points)
   - The breadth of supportive services to ensure persistence in training for workers served through the project. This includes identifying the specific service providers or specifying a plan to procure specific types of services. Supportive services may include WIA/WIOA supportive services, specialized participant services, case management services, dependent care assistance, transportation assistance, mentoring, and other types of services that might be needed for a participant to succeed in training and employment.
   - The extent to which the applicant includes other innovative retention strategies such as effective mentorship matching, frequent monitoring, pre-testing for required skills, etc.

iii. **Partnership and Policy Innovations that Create a Supportive Ecosystem for Apprenticeship (8 points)**

Points will be awarded based on:

1. The level of engagement and collaboration with a broad range of required and optional partners, (described in Section III Eligibility Information) to create the conditions that support significant expansion of American Apprenticeship opportunities. The extent to which the applicant’s project: (3 points)
   - Aligns apprenticeship with the public workforce (i.e., agency/entity that administers WIA Title I at the State and/or local WIB level);
   - Collaborates with educational institutions and training providers (i.e., community college or university systems, adult education agencies, career and technical education agencies, vocational rehabilitation agencies, state workforce education coordinating boards, and/or other post-secondary education agencies). Reviewers will consider letters of commitment from educational institutions to join the Registered Apprenticeship College Consortium.
   - Collaborates with the State Apprenticeship Agency and State Apprenticeship Councils (in states where they exist).
This page contains no comments
(2) The extent to which partner commitments, contributions, and leveraged resources, as well as the type of role each key partner are sufficient to ensure success of the project. For example: (3 points)

- Developing or scaling an American Apprenticeship program;
- Promotion and outreach;
- Providing assistance with program design, curriculum and/or training;
- Providing facilities and/or personnel to provide related technical instruction and on-the-job learning;
- Identifying, recruiting, and/or serving potential program participants, including participants from underrepresented populations (such as, women, young men and women of color, persons with disabilities, low-skilled populations, veterans, including transition service members, among others);
- Carrying out administrative functions; and
- Other roles, as applicable.

(3) The extent to which the applicant has documented the commitments of the public partner to aid project sustainability. The level of commitment to sustainability is measured by: (2 points)

- Examples of policy driven efforts to sustain apprenticeship, sector-focused training strategies, and system alignment efforts. For example, reviewers may consider plans to establish or modify state, local, or institutional policies and/or other mechanisms to support employer demand for apprenticeship (e.g., tax credits, training vouchers/grants, utilization requirements, leveraging of existing systems or resources, or others).
- Examples of strategies to align long-term funding streams behind the apprenticeship model including federal funds from a diverse array of partners (e.g., Pell/Title IV financial aid, Federal Work-Study, GI Bill benefits, Supplemental Nutrition Assistance Program (SNAP) education & training funds, WIA and WIOA, etc.), state and local funding, (e.g., on-the-job training funds, state workforce dollars, funding for participating community colleges, etc.), and private sector investment funds (e.g., training investment funds, social impact bonds, industry association or labor organization funds, etc.)

v. 21st Century American Apprenticeship Sector Focus and Employer Commitments (8 points)

Points will be awarded based on:

(1) The strength of employer engagement in the project and a discussion of their commitment to work with DOL (or federally-recognized State Apprenticeship Agencies) to register new apprenticeship programs and hire apprentices. Reviewers will consider whether applicants have identified at least 3 employers who are actively engaged in the project and have described the employer role. Reviewers will also consider the strength of the employers’ letters of commitment including any leveraged resource commitments and contributions to the project. (6 points)

(2) The extent to which the applicant identifies regional or national industry representation and coordination through industry associations or through other evidence such as designation as a “Manufacturing Community” through the Investing in Manufacturing Communities Partnership (IMCP). (2 points)

12 Letters of commitment will not count against the 30-page page limit for the project narrative.
This page contains no comments
vi. **Innovations in American Apprenticeship Training (8 points)**

Points will be awarded based on:

1. The quality of the American Apprenticeship programs to be developed. Reviewers will consider the extent to which applicants transform and adapt alternative work-based learning programs or rigorous education-based internship models into American Apprenticeship programs, and significantly expand existing and successful registered programs. The extent to which a clear process has been articulated for how the partnership will develop any new standards of apprenticeship. The strength of program innovations (see examples in Appendix B.) and clear understanding of the key characteristics of the program including the estimated time for apprentices to complete the program. (3 points)

2. The clarity by which the applicant describes the strategies that will be used to employ and train apprentices, including a plan for selecting apprentices in order to meet the service goals established at Section II.A. of the FOA within the 60 month period of performance. For applicants proposing to serve incumbent workers/existing workforce, reviewers will award points based on the extent to which projects will result in significantly upskilling workers (e.g., taking workers with entry/low skills and moving them into middle-skill jobs with higher wages). Proposals that seek to utilize apprenticeship models that make only modest improvements in the skills of current workforce will receive fewer points than those that make significant improvements. (2 points)

3. The strength of the education and training activities that support the apprenticeship including both the on-the-job learning and related technical instruction portions of the American Apprenticeship program(s). (2 points)

4. The extent to which the applicant provides a roadmap for how the American Apprenticeship program will lead to job advancement, college credit, and/or industry-recognized credentials for newly hired (and as applicable, incumbent/existing workers). (1 point)

vii. **Work Plan (8 points)**

Points will be awarded based on:

1. The comprehensiveness and clear organization of the project work plan to account for all functions/activities identified in the application (3 points)

2. Whether the applicant includes feasible and realistic activities (e.g., capacity-building, start-up, and training), timeframes (including the registration of the apprenticeship program(s) and enrollment of apprentices within 12 months of grant award), deliverables, and key partners required to implement the project. (3 points)

3. The extent to which the applicant describes processes that might accelerate the work, and identified how any potential barriers to timely completion of goals would be overcome. (1 point)

4. The strength of the explanation of all how the project milestones, outputs, and outcomes fit into the program design and overall timeline of grant implementation. (1 point)
This page contains no comments
4. Organizational, Administrative, and Fiscal Capacity (11 points)

Points will be awarded based on:

1. The extent to which the organization has a project staffing plan which shows that it has capacity to carry out the proposed project. Reviewers will assess the level of qualifications and experience of executive and administrative staff as well as other personnel such as board members, advisors and consultants to fulfill the needs and requirements of the proposed project, including the ability to manage a strategic partnership, fiscal and administrative management, outreach and promotion, and other key areas of the project management. (3 points)

2. The strength of administrative controls to properly manage, monitor and report Federal funds and performance. The degree to which the applicant explains how the proposed project will use accounting and performance systems and processes that enable timely and accurate financial and performance reporting, and allow for expeditious procurement procedures that comply with Federal, state (if applicable), and other relevant laws and requirements, including across partners, as applicable. (2 points)

3. The extent to which the applicant provides a process and reasonable timeframe for hiring the project manager and key staff (e.g., fiscal, administrative, performance reporting/case management, etc.) to ensure the project can begin immediately. (2 points)

4. The capacity of the lead organization to facilitate communications among all levels of the project and across consortium members. (2 points)

5. The extent to which the applicant provides strong examples of experience working with multi-partner programs, including the management process used that led to measurable results for workers and employers. (2 points)

5. Budget and Budget Justification (3 points)

Points will be awarded based on:

- The extent to which the budget is reasonable based on the activities outlined in the project narrative and that the proposed expenditures will support the expansion of apprenticeship opportunities for both employers and individuals. (2 points)

- The strength and feasibility of the applicant’s plan to leverage external resources to ensure that the applicant meets the goals for the numbers of apprenticeship (see Section II.A.), as well as the other outcomes and outputs proposed in response to Section IV.B.3.a. Reviewers will consider the breadth of cash and/or in-kind support (e.g., Pell/Title IV financial aid, federal work study, GI Bill benefits, Supplemental Nutrition Assistance Program (SNAP) education & training funds, WIA and WIOA, etc.), state and local funding, (e.g., on-the-job training funds, state workforce dollars, funding for participating community colleges, etc.), and private sector investment funds (e.g., training investment funds, social impact bonds, industry association or labor organization funds, etc.). (1 point)

B. Review and Selection Process

1. Merit Review and Selection Process

A technical merit review panel will carefully evaluate applications against the selection criteria to determine the merit of applications. These criteria are based on the policy goals, priorities, and emphases set forth in this FOA. Up to 100 points may be awarded to an applicant, depending on the quality of the responses provided. The final scores (which may include the mathematical normalization
Organization, Administration, and Fiscal Capacity: All FOAs will require a statement of the applicant’s ability to administer the activity proposed by the grant. This element contains 5 sub-elements on which that assessment will be based.

Budget and Budget Justification: Applicants will note that this element has the least number of points; however, its importance should not be underestimated. For example, using leveraged resources is a key component of this FOA that demonstrates the scaling potential of the proposal. All applications must present solid budget data.

Understanding the Review Process (1): A technical review panel will evaluate the application. The panel is composed of staff from the U.S. Department of Labor (DOL) and peer reviewers from outside DOL, and serves as an advisory committee to the Grant Officer in the review and rating process. Panel members have knowledge that helps them effectively evaluate each application. Each member performs an independent evaluation of the application based on the FOA criteria. The panel identifies the significant weaknesses of the application and the cumulative rating.

Understanding the Review Process (2): Panel members reviewing applications are knowledgeable about Federally-funded workforce development and training programs, as well as other issues relevant to specific FOAs. Applicants should be familiar with the review and selection process, as this includes other factors beyond the evaluation criteria. For example, the Grant Officer may take into consideration certain other factors such as geographic distribution of funds, partnership structures, scope of innovation, level of expansion, and other factors, and in rare cases, may interview applicants.
of review panels) will serve as the primary basis for selection of applications for funding. The panel results are advisory in nature and not binding on the Grant Officer. The Grant Officer may make selections based solely on the final scores, but reserves the right to interview applicants to gain further detail on plans described in the application and to clarify information, or to take into consideration other relevant factors when applicable. Such factors may include the geographic distribution of funds, partnership structures, scope of innovation (see Appendix B), level of expansion (i.e., goals for new apprentices), and/or other relevant factors. The Grant Officer may also take into consideration the mix of industries and/or occupations.

Before awards are made, the Grant Officer will review your eligibility against the requirements at Section III Eligibility Information of the FOA. Specifically, the Grant Officer will review your Primary Partnership Composition to ensure compliance with Sections III.A and B. The Grant Officer may consider any information that comes to his/her attention.

The government may elect to award the grant(s) with or without discussions with the applicant. Should a grant be awarded without discussions, the award will be based on the applicant’s signature on the SF-424, including electronic signature via E-Authentication, which constitutes a binding offer by the applicant.

2. Risk Review Process
Every application will be evaluated to determine the risks posed by applicants. Prior to making an award, ETA will review information available through any OMB-designated repository of governmentwide eligibility qualification or financial integrity information, such as Federal Awardee Performance and Integrity Information System (FAPIIS), Dun and Bradstreet, and “Do Not Pay.” Additionally, ETA will comply with the requirements of 2 CFR Part 180 codified by DOL at 29 CFR Part 98 (Governmentwide Debarment and Suspension (Nonprocurement)). This risk evaluation may incorporate results of the evaluation of the applicant’s eligibility (application screening) or the quality of its application (merit review). If ETA determines that an award will be made, special conditions that correspond to the degree of risk assessed may be applied to the award. Criteria to be evaluated include:

(1) Financial stability;
(2) Quality of management systems and ability to meet the management standards prescribed in the Uniform Grant Guidance;
(3) History of performance. The applicant’s record in managing awards, cooperative agreements, or procurement awards, if it is a prior recipient of such Federal awards, including timeliness of compliance with applicable reporting requirements and if applicable, the extent to which any previously awarded amounts will be expended prior to future awards;
(4) Reports and findings from audits performed under Subpart F – Audit Requirements of the Uniform Grant Guidance or the reports and findings of any other available audits and monitoring reports containing findings, issues of non-compliance or questioned costs;
(5) The applicant’s ability to effectively implement statutory, regulatory, or other requirements imposed on recipients.

VI. Award Administration Information
A. Award Notices
All award notifications will be posted on the ETA Homepage. Applicants selected for award will be contacted directly before the grant’s execution. Non-selected applicants will be notified by mail or email and may request a written debriefing on the significant weaknesses of their application.
Understanding DOL’s Risk Review: While DOL will evaluate the risks of every application, additional criteria will be used for those applications for which DOL decides to make an award.

Receiving a Response from DOL: All applicants, both those selected and not selected, will be notified by DOL. However, selection as a grantee is not the end of the process, as the following sections indicate. For example, there may be negotiations for certain items in the application.
Selection of an organization as a grantee does not constitute approval of the grant application as submitted. Before the actual grant is awarded, we may enter into negotiations about such items as program components, staffing and funding levels, and administrative systems in place to support grant implementation. If the negotiations do not result in a mutually acceptable submission, the Grant Officer reserves the right to terminate the negotiations and decline to fund the application. We reserve the right to not fund any application related to this FOA.

B. Administrative and National Policy Requirements

1. Administrative Program Requirements
All grantees will be subject to all applicable Federal laws, regulations—including the OMB Uniform Guidance, and the terms and conditions of the award. The grant(s) awarded under this FOA will be subject to the following administrative standards and provisions:

a. Non-Profit Organizations, Educational Institutions, and State, Local and Indian Tribal Governments
   2 CFR Part 200 (Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards)

b. Profit Making Commercial Firms
   Federal Acquisition Regulation (FAR) – 48 CFR part 31 (Cost Principles), and 2 CFR Part 200 (Administrative Requirements).

c. All entities must comply with 29 CFR Part 93 (New Restrictions on Lobbying), 29 CFR Part 94 (Government wide Requirements for Drug-Free Workplace (Financial Assistance)), 29 CFR Part 98 (Government wide Debarment and Suspension, and drug-free workplace requirements), and, where applicable, 2 CFR Part 200 (Audit Requirements).

d. 29 CFR Part 2, subpart D—Equal Treatment in Department of Labor Programs for Religious Organizations, Protection of Religious Liberty of Department of Labor Social Service Providers and Beneficiaries.

e. 29 CFR Part 31—Nondiscrimination in Federally Assisted Programs of the Department of Labor—Effectuation of Title VI of the Civil Rights Act of 1964.

f. 29 CFR Part 32—Nondiscrimination on the Basis of Handicap in Programs or Activities Receiving Federal Financial Assistance.

g. 29 CFR Part 35—Nondiscrimination on the Basis of Age in Programs or Activities Receiving Federal Financial Assistance from the Department of Labor.

h. 29 CFR Part 36—Nondiscrimination on the Basis of Sex in Education Programs or Activities Receiving Federal Financial Assistance.

i. 29 CFR Parts 29 and 30—Labor Standards for the Registration of Apprenticeship Programs, and Equal Employment Opportunity in Apprenticeship and Training, as applicable.

k. Special Terms and Conditions of Award—See Appendix C.

2. Other Legal Requirements:

a. Religious Activities
   The department notes that the Religious Freedom Restoration Act (RFRA), 42 U.S.C. Section 2000bb, applies to all Federal law and its implementation. If an applicant organization is a faith-based organization that makes hiring decisions on the basis of religious belief, it may be entitled to receive Federal financial assistance under this grant opportunity and maintain that hiring practice. If a faith-based organization is awarded a grant, the organization will be provided with information on how to request such an exemption.
Understanding Administrative Requirements: Grantees are subject to all applicable Federal laws and regulations as well as the terms and conditions of the award. This section lists the administrative standards and provisions to which grants awarded under this FOA are subject. Applicants should be familiar with these requirements. OMB Circulars may be reviewed at http://www.whitehouse.gov/omb/grants_circulars/.

Understanding Other Legal Requirements: In addition to the specific laws and regulations described above, other legal requirements will apply to the grant recipient such as those regarding religious activities, lobbying or fundraising, transparency, data security, and record retention, use of contracts and subawards, and closeout of the grant. Applicants should know that grant recipients must adhere to all applicable requirements.
b. Lobbying or Fundraising the U.S. Government with Federal Funds
In accordance with Section 18 of the Lobbying Disclosure Act of 1995 (Public Law 104-65) (2 U.S.C. 1611), non-profit entities incorporated under Internal Revenue Service Code Section 501(c) (4) that engage in lobbying activities are not eligible to receive Federal funds and grants. No activity, including awareness-raising and advocacy activities, may include fundraising for, or lobbying of, U.S. Federal, State or Local Governments (see OMB Circular A-122).

c. Transparency Act Requirements
You must ensure that you have the necessary processes and systems in place to comply with the reporting requirements of the Federal Funding Accountability and Transparency Act of 2006 (Pub. Law 109-282, as amended by section 6202 of Pub. Law 110-252) (Transparency Act), as follows:
(1) Except for those excepted from the Transparency Act under sub-paragraphs 1, 2, and 3 below, you must ensure that you have the necessary processes and systems in place to comply with the subaward and executive total compensation reporting requirements of the Transparency Act, should they receive funding.
(2) Upon award, you will receive detailed information on the reporting requirements of the Transparency Act, as described in 2 CFR Part 170, Appendix A, which can be found at the following website: http://edocket.access.gpo.gov/2010/pdf/2010-22705.pdf

The following types of awards are not subject to the Federal Funding Accountability and Transparency Act:
(1) Federal awards to individuals who apply for or receive Federal awards as natural persons (i.e., unrelated to any business or non-profit organization he or she may own or operate in his or her name);
(2) Federal awards to entities that had a gross income, from all sources, of less than $300,000 in the entities' previous tax year; and
(3) Federal awards, if the required reporting would disclose classified information.

d. Safeguarding Data Including Personally Identifiable Information (PII)
Applicants submitting applications in response to this FOA must recognize that confidentiality of PII and other sensitive data is of paramount importance to the Department of Labor and must be observed except where disclosure is allowed by the prior written approval of the Grant Officer or by court order. By submitting an application, you are assuring that all data exchanges conducted through or during the course of performance of this grant will be conducted in a manner consistent with applicable Federal law and TEGL NO. 39-11 (issued June 28, 2012). All such activity conducted by ETA and/or Grantee/s will be performed in a manner consistent with applicable state and Federal laws.

By submitting a grant application, you agree to take all necessary steps to protect such confidentiality by complying with the following provisions that are applicable in governing their handling of confidential information:
(1) You must ensure that PII and sensitive data developed, obtained, or otherwise associated with DOL/ETA funded grants is securely transmitted.
(2) To ensure that such PII is not transmitted to unauthorized users, all PII and other sensitive data transmitted via e-mail or stored on CDs, DVDs, thumb drives, etc., must be encrypted using a Federal Information Processing Standards (FIPS) 140-2 compliant and National Institute of Standards and Technology (NIST) validated cryptographic module. You must not e-mail unencrypted sensitive PII to any entity, including ETA or contractors.
Knowing Confidentiality and Disclosure Requirements: This section lists 13 information confidentiality requirements and discusses the few conditions in which data may be disclosed. Applicants must understand that grant recipients will have to adhere to all of these requirements in processing data associated with the grant.
(3) You must take the steps necessary to ensure the privacy of all PII obtained from participants and/or other individuals and to protect such information from unauthorized disclosure. You must maintain such PII in accordance with the ETA standards for information security described in TEGL NO. 39-11 and any updates to such standards we provide to you. If you wish to obtain more information on data security should contact their Federal Project Officer.

(4) You must ensure that any PII used during the performance of your grant has been obtained in conformity with applicable Federal and state laws governing the confidentiality of information.

(5) You further acknowledge that all PII data obtained through your ETA grant must be stored in an area that is physically safe from access by unauthorized persons at all times and the data will be processed using grantee issued equipment, managed information technology (IT) services, and designated locations approved by ETA. Accessing, processing, and storing of ETA grant PII data on personally owned equipment, at off-site locations e.g., employee’s home, and non-grantee managed IT services, e.g., Yahoo mail, is strictly prohibited unless approved by ETA.

(6) Your employees and other personnel who will have access to sensitive/confidential/proprietary/private data must be advised of the confidential nature of the information, the safeguards required to protect the information, and that there are civil and criminal sanctions for noncompliance with such safeguards that are contained in Federal and state laws.

(7) You must have their policies and procedures in place under which your employees and other personnel, before being granted access to PII, acknowledge their understanding of the confidential nature of the data and the safeguards with which they must comply in their handling of such data as well as the fact that they may be liable to civil and criminal sanctions for improper disclosure.

(8) You must not extract information from data supplied by ETA for any purpose not stated in the grant agreement.

(9) Access to any PII created by the ETA grant must be restricted to only those employees of the grant recipient who need it in their official capacity to perform duties in connection with the scope of the work in the grant agreement.

(10) All PII data must be processed in a manner that will protect the confidentiality of the records/documents and is designed to prevent unauthorized persons from retrieving such records by computer, remote terminal or any other means. Data may be downloaded to, or maintained on, mobile or portable devices only if the data are encrypted using NIST validated software products based on FIPS 140-2 encryption. In addition, wage data may only be accessed from secure locations.

(11) PII data obtained by the grantee through a request from ETA must not be disclosed to anyone but the individual requestor except as permitted by the Grant Officer or by court order.

(12) You must permit ETA to make onsite inspections during regular business hours for the purpose of conducting audits and/or conducting other investigations to assure that you are complying with the confidentiality requirements described above. In accordance with this responsibility, you must make records applicable to this Agreement available to authorized persons for the purpose of inspection, review, and/or audit.

(13) You must retain data received from ETA only for the period of time required to use it for assessment and other purposes, or to satisfy applicable Federal records retention requirements, if any. Thereafter, you agree that all data will be destroyed, including the degaussing of magnetic tape files and deletion of electronic data.
This page contains no comments
e. Record Retention
You must be prepared to follow Federal guidelines on record retention, which require you to maintain all records pertaining to grant activities for a period of at least three years from the date of submission of the final expenditure report. See 2 CFR 200.333-.337 for more specific information, including information about the start of the record retention period for awards that are renewed quarterly or annually, and when the records must be retained for more than three years.

f. Use of Contracts and Subawards
You must abide by the following definitions of contract, contractor, subaward, and subrecipient:

**Contract:** Contract means a legal instrument by which a non-Federal entity (defined as a state, local government, Indian tribe, institution of higher education (IHE), nonprofit organization, for-profit entity, foreign public entity, or a foreign organization that carries out a Federal award as a recipient or subrecipient) purchases property or services needed to carry out the project or program under a Federal award. The term as used in this FOA does not include a legal instrument, even if the non-Federal entity considers it a contract, when the substance of the transaction meets the definition of a Federal award or subaward (see definition of Subaward below).

**Contractor:** Contractor means an entity that receives a contract as defined above in Contract.

**Subaward:** Subaward means an award provided by a pass-through entity (defined as a non-Federal entity that provides a subaward to a subrecipient to carry out part of a Federal program) to a subrecipient for the subrecipient to carry out part of a Federal award received by the pass-through entity. It does not include payments to a contractor or payments to an individual that is a beneficiary of a Federal program. A subaward may be provided through any form of legal agreement, including an agreement that the pass-through entity considers a contract.

**Subrecipient:** Subrecipient means a non-Federal entity that receives a subaward from a pass-through entity to carry out part of a Federal program; but does not include an individual that is a beneficiary of such program. A subrecipient may also be a recipient of other Federal awards directly from a Federal awarding agency.

You must follow the provisions at 2 CFR 200.330-.332 regarding subrecipient monitoring and management. Also see 2 CFR 200.308(c)(6) regarding prior approval requirements for subawards. When awarding subawards, you are required to comply with provisions on governmentwide suspension and debarment found at 2 CFR Part 180 and codified by DOL at 29 CFR Part 98.

g. Closeout of Grant Award
Any entity that receives an award under this announcement must close its grant with ETA at the end of the final year of the grant. Information about this process may be found in ETA’s [Grant Closeout FAQ](#).

3. Other Administrative Standards and Provisions
Except as specifically provided in this FOA, our acceptance of an application and an award of Federal funds to sponsor any programs(s) does not provide a waiver of any grant requirements and/or procedures. For example, the OMB Circulars require that an entity’s procurement procedures ensure that all procurement transactions are conducted, as much as practical, to provide open and free competition. If an application identifies a specific entity to provide goods or services, the award does not provide the justification or basis to sole source the procurement, i.e., avoid competition.
Note 87

Knowing Record Retention Rules: All grant recipients must follow required record retention rules. Applicants should be familiar with these and have the capacity to follow them during and after the grant period.

Note 88

Understanding Contracts and Subawards: If the grant recipient will use contracts or subawards, the definitions contained herein must be followed. Further, the grant recipient will have a number of responsibilities regarding this arrangement as set forth in the cited regulations.
4. Special Program Requirements

a. ETA Evaluation

As a condition of grant award, American Apprenticeship grantees are required to participate in a national evaluation. The national evaluation may include an implementation assessment across grantees as well as an impact and/or outcomes analysis of all or selected sites within or across grantees. Conducting an impact analysis could involve random assignment (which involves random assignment of eligible participants into a treatment group that would receive program services or enhanced program services, or into control group(s) that would receive no program services or program services that are not enhanced). The department may require applicants to collect elements to aid the American Apprenticeship evaluation, assess the Return on Investment to employers, and assess the overall project impact. As a part of the national evaluation, grantees must agree to: (1) make records on participants, employers, and funding available; (2) provide access to program operating personnel, participants and operational and financial records and any other pertaining documents to calculate program costs and benefits; and (3) facilitate the assignment by lottery of participants to program services (including the possible increased recruitment of potential participants) and follow evaluation procedures as specified by the national evaluator under the direction of DOL including after the grant period of performance.

Additionally, grantees must ensure compliance with the Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232G; 34 CFR Part 99). The grantees must establish policies for compliance, including policies for accessing student education records when connected with audit or evaluation of Federal or State programs and enforcement of or compliance with Federal legal requirements of those programs, standard practices or agreements for disclosing PII through written agreements, and other PII and records management practices.

In addition to any required national evaluation, a select number of grantees may be asked to volunteer to participate in a demonstration of a particular recruitment and/or retention strategy that could be used with the Apprenticeship program. The demonstration may focus on testing the following non-exhaustive list of topics: improving or refining existing recruitment techniques; expanding recruitment efforts by testing new modes of recruitment; better targeting recruitment for specific populations; and offering new services or enhancing existing services that could improve the retention of targeted populations.

b. Performance Goals

Please note that applicants will be held to outcomes provided and failure to meet those outcomes may result in technical assistance or other intervention by ETA, and may also have a significant impact on decisions about future grants with ETA.

C. Reporting

You must agree to meet DOL reporting requirements. Quarterly financial reports, quarterly progress reports, and MIS data must be submitted by the grantee electronically. Additionally, grantees must submit information on job openings on a national apprenticeship job bank. You must provide the reports and documents listed below:
Demonstrating Evaluation Suitability: ETA routinely conducts rigorous evaluations, including random assignment evaluations, of its programs in order to identify promising models and inform future funding and program development. Applicants should note that a condition of grant award for the American Apprenticeship FOA will be participation in the described national evaluation and possible other evaluations.

Meeting Performance Goals: The Project Narrative establishes project goals, milestones, outputs, and outcomes. These terms are specifically defined in the FOA (Section IV.B.3.b.). The applicant should note that failure to meet goals may result in DOL intervention.

Meeting Reporting Requirements: Grantees must meet DOL reporting requirements. These include quarterly financial and performance reports submitted electronically within 45 days after the end of each calendar quarter. For this FOA, grantees must also participate in the Apprenticeship Job Bank and in national media campaigns initiated by DOL. Applicants should be sure that the partnership has the capacity to make these reports accurately and timely.
1. Quarterly Financial Reports
A Quarterly Financial Status Report (ETA 9130) is required until such time as all funds have been expended or the grant period has expired. Quarterly reports are due 45 days after the end of each calendar year quarter. On the final Financial Status Report, you must include any subaward amounts so we can calculate final indirect costs, if applicable. You must use DOL’s Online Electronic Reporting System and information and instructions will be provided to grantees.

2. Quarterly Performance Reports
You must submit a quarterly progress report, including individual record level data, within 45 days after the end of each calendar year quarter. The report must include quarterly information on grant activities, performance goals, and milestones. The last quarterly progress report will serve as the grant’s Final Performance Report. This report must provide both quarterly and cumulative information on the grant activities. It must summarize project activities, employment outcomes and other deliverables, and related results of the project, and must thoroughly document the apprenticeship training approaches that you used. We will provide you with formal guidance about the data, reporting system, and other information that is required to be collected and reported on either a regular basis or special request basis.

3. Apprenticeship Job Bank
You must participate in DOL’s Apprenticeship job openings database that will be accessible to the public. This will help launch a national campaign to advertise apprenticeship opportunities to a wider audience and help facilitate the matching of willing workers with apprenticeship sponsors.

4. National Media Campaigns
You must participate in National Media Campaigns initiated by the DOL by providing success stories, photos, testimonials, to promote and advance the American Apprenticeship Initiative.

VII. Agency Contacts
For further information about this FOA, please contact Jeannette Flowers, Grants Management Specialist, Office of Grants Management, at (202) 693-3322. Applicants should e-mail all technical questions to Flowers.Jeannette@dol.gov and must specifically reference FOA-ETA-15-02, and along with question(s), include a contact name, fax and phone number. This announcement is being made available on the ETA Web site and at Grants.gov.

VIII. Other Information
A. Transparency
DOL is committed to conducting a transparent grant award process and publicizing information about program outcomes. Posting grant applications on public websites is a means of promoting and sharing innovative ideas. For all applications in this grant competition, we will publish the Abstracts required by Section IV.B.4, and selected information from the SF-424 for all applications on the department’s public website or similar publicly accessible location. Additionally, we will publish a version of the Project Narrative required by Section IV.B.3, for all those applications that are awarded grants, on the department’s website or a similar location. No other attachments to the application will be published. The Project Narratives and Abstracts will not be published until after the grants are announced. In addition, information about grant progress and results may also be made publicly available.
**Note 92**

*FOA Point of Contact:* Each FOA will provide a particular point of contact at DOL for technical questions, and will specify appropriate methods for contacting this individual. Applicants should not contact DOL staff, other than the contact listed in this section, with questions related to the FOA.

**Note 93**

*Publication of Parts of the Grant Application:* For all applications, DOL will publish the Abstract and portions of the SF-424 without redaction, so applicants should avoid placing proprietary information in this summary. The winning Project Narratives will be published also. However, applicants will be notified of this publication in advance and given a chance to redact any proprietary information.
DOL recognizes that grant applications sometimes contain information that an applicant may consider proprietary or business confidential information, or may contain personally identifiable information (PII). Proprietary or business confidential information is information that is not usually disclosed outside your organization and disclosing this information is likely to cause you substantial competitive harm.

PII is any information that can be used to distinguish or trace an individual’s identity, such as name, social security number, date and place of birth, mother’s maiden name, or biometric records, and any other information that is linked or linkable to an individual, such as medical, educational, financial, and employment information.¹³

Abstracts will be published in the form originally submitted, without any redactions. Applicants should not include any proprietary or confidential business information or PII in this summary. In the event that an applicant submits proprietary or confidential business information or PII, DOL is not liable for the posting of this information contained in the Abstract. The submission of the grant application constitutes a waiver of the applicant’s objection to the posting of any proprietary or confidential business information contained in the Abstract. Additionally, the applicant is responsible for obtaining all authorizations from relevant parties for publishing all PII contained within the Abstract. In the event the Abstract contains proprietary or confidential business information or PII, the applicant is presumed to have obtained all necessary authorizations to provide this information and may be liable for any improper release of this information.

By submission of this grant application, the applicant agrees to indemnify and hold harmless the United States, the U.S. Department of Labor, its officers, employees, and agents against any liability or for any loss or damages arising from this application. By such submission of this grant application, the applicant further acknowledges having the authority to execute this release of liability.

In order to ensure that proprietary or confidential business information or PII is properly protected from disclosure when DOL posts the winning Project Narratives, applicants whose Project Narratives will be posted will be asked to submit a second redacted version of their Project Narrative, with any proprietary, confidential commercial/business information, and PII redacted. All non-public information about the applicant’s and consortium members’ staff (if applicable) should be removed as well.

The department will contact the applicants whose Project Narratives will be published by letter or email, and provide further directions about how and when to submit the redacted version of the Project Narrative.

Submission of a redacted version of the Project Narrative will constitute permission by the applicant for DOL to make the redacted version publicly available. We will also assume that by submitting the redacted version of the Project Narrative, the applicant has obtained the agreement to the applicant’s decision about what material to redact of all persons and entities whose proprietary, confidential business information, or PII is contained in the Project Narrative. If an applicant fails to provide a

This page contains no comments
redacted version of the Project Narrative within 45 days of DOL’s request, DOL will publish the original Project Narrative in full, after redacting only PII. (Note that the original, unredacted version of the Project Narrative will remain part of the complete application package, including an applicant’s proprietary and confidential business information and any PII.)

Applicants are encouraged to maximize the grant application information that will be publicly disclosed and to exercise restraint and redact only information that clearly is proprietary, confidential commercial/business information, or PII. The redaction of entire pages or sections of the Project Narrative is not appropriate, and will not be allowed, unless the entire portion merits such protection. Should a dispute arise about whether redactions are appropriate, DOL will follow the procedures outlined in the Department’s Freedom of Information Act (FOIA) regulations (29 CFR Part 70).

Redacted information in grant applications will be protected by DOL from public disclosure in accordance with Federal law, including the Trade Secrets Act (18 U.S.C. § 1905), FOIA, and the Privacy Act (5 U.S.C. § 552a). If DOL receives a FOIA request for your application, the procedures in DOL’s FOIA regulations for responding to requests for commercial/business information submitted to the government will be followed, as well as all FOIA exemptions and procedures. See 29 CFR § 70.26. Consequently, it is possible that application of FOIA rules may result in release of information in response to a FOIA request that an applicant redacted in its “redacted copy.”

B. Apprenticeship Web-Based Resources
DOL maintains a number of web-based resources that may be of assistance to applicants. American Apprenticeship technical assistance resources can be found online. Here you can find our newest technical assistance products including our Quick Start Toolkit which provides helpful steps and resources to start and register an apprenticeship program as well as our Federal Resources Playbook which provides information on using the other Federal funds and resources to support your registered apprenticeship program.

Also we encourage you to visit the 21st Century Registered Apprenticeship Community of Practice (COP), an online resource to share information and learn from peers regarding the innovative apprenticeship strategies and partnerships being used to train U.S. workers. Visit our COP.

A pre-recorded Prospective Applicant webinar will be available for viewing no later than 30 days from the publication of this FOA. For further details, please visit our apprenticeship homepage.

Other web resources include the Career One-Stop portal, which provides national and state career information on occupations; the Occupational Information Network (O*NET) Online which provides occupational competency profiles; America’s Service Locator, which provides a directory of our nation's One-Stop Career Centers; and the Office of Disability Employment Policy resources page, which provides technical assistance, policies and practices for people with disabilities.

C. Industry Competency Models and Career Clusters
ETA supports an Industry Competency Model Initiative to promote an understanding of the skill sets and competencies that are essential to an educated and skilled workforce. A competency model is a collection of competencies that, taken together, define successful performance in a particular work setting. Competency models serve as a starting point for the design and implementation of workforce and talent development programs. To learn about the industry-validated models visit the Competency
**Note 94**

*Reviewing Apprenticeship and Resources:* Applicants should always review all of the available material they can related to the FOA for which they are applying. As in this FOA, DOL has a rich vein of web based resources available. These are typically shown throughout the FOA.

**Note 95**

*Accessing Competency Models and Career Clusters:* This FOA requires aligning industry H-1B needs with workforce skill gaps and system training gaps. This requirement necessitates knowledge of competency models and career clusters. When applicants require similar difficult terminology or relationships, they should seek assistance, normally provided in the FOA. In this case, web sites have been provided for help acquiring the needed information.
Model Clearinghouse (CMC). The CMC site also provides tools to build or customize industry models, as well as tools to build career ladders and career lattices for specific regional economies.

Career Clusters and Industry Competency Models both identify foundational and technical competencies, but their efforts are not duplicative. The Career Clusters link to specific career pathways in sixteen career cluster areas and place greater emphasis on elements needed for curriculum performance objectives; measurement criteria; scope and sequence of courses in a program of study; and development of assessments. Information about the sixteen career cluster areas can be found online.

D. Workforce3One Resources

1. We encourage you to view the information gathered through the conference calls with Federal agency partners, industry stakeholders, educators, and local practitioners. The information on resources identified can be found on Workforce3One.org.
2. We encourage you to view the online tutorial, “Grant Applications 101: A Plain English Guide to ETA Competitive Grants,” available through Workforce3One.
3. We created Workforce System Strategies to make it easier for the public workforce system and its partners to identify effective strategies and support improved customer outcomes. The collection highlights strategies informed by a wide range of evidence such as experimental studies and implementation evaluations, as well as supporting resources such as toolkits. We encourage you to review these resources.
4. We created a technical assistance portal that contains online training and resources for fiscal and administrative issues. Online trainings available include but are not limited to Introduction to Grant Applications and Forms, indirect Costs, Federal Cost Principles, and accrual accounting.

E. Connecting to Other Partners and Resources

Applicants and organizations interested in Registered Apprenticeship that would like to potentially connect with other groups or possible partners, such as nonprofit organizations, foundations, training providers, and employers are encouraged to visit and, if interested, share information on an apprenticeship clearing house web resource created and managed by Skills for America’s Future. Note that the views expressed in the materials or resources prepared by private sector organizations do not necessarily reflect official U.S. Department of Labor positions or policy. Inclusion of these resources here does not represent an official endorsement by the U.S. Department of Labor of the organizations, their programs, products or services.

IX. OMB Information Collection

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 20 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments about the burden estimated or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Labor, to the attention of the Departmental Clearance Officer, 200 Constitution Avenue NW, Room N1301, Washington, DC 20210. Comments may also be emailed to DOL_PRA_PUBLIC@dol.gov.
Note 96

Accessing Workforce3One: Applicants should access this web site, which contains substantial amounts of information about many aspects of ETA activities, but especially for information about grant application.

Note 97

OMB Information Collection: This is a required statement in an FOA about the burden hours to provide the requested information. It should not be addressed in the grant application.
PLEASE DO NOT RETURN THE COMPLETED APPLICATION TO THIS ADDRESS. SEND IT TO THE SPONSORING AGENCY AS SPECIFIED IN THIS ANNOUNCEMENT.

This information is being collected for the purpose of awarding a grant. The information collected through this “Funding Opportunity Announcement” will be used by the U.S. Department of Labor to ensure that grants are awarded to the applicants best suited to perform the functions of the grant. Submission of this information is required in order for the applicant to be considered for award of a grant.

Signed XXXXX, in Washington, D.C. by:

Sara Gallagher Williams
Grant Officer, Employment and Training Administration

APPENDIX B

Elements and Strategies of Innovation to Support Registered Apprenticeship Expansion

Through the American Apprenticeship job training program, the Department seeks to fund Registered Apprenticeship models that incorporate 21st century strategies which include the systems of an industry, state, or region that share a role in collectively developing a workforce, driven by one overarching unified goal: Creating public-private partnerships to broaden the use of American Apprenticeships in developing a highly skilled workforce able to meet industry needs while also offering U.S. workers access to training and career advancement to reach the middle class. A number of elements and strategies of innovation are noted below, divided into three key areas. These ideas can become building blocks of innovation woven into a comprehensive strategy to create an ecosystem of actors, strategies, and resources that support significant growth of American Apprenticeships opportunities. As stated in the FOA, the Grant Officer reserves the right to use the scope of innovations and level of expansion as part of the selection procedures. To the extent that there are a number of equally scored proposals, we would reserve the right to choose the ones that incorporate more elements of innovation. Applicants are encouraged to consider these and other ideas in the development of their overall grant proposal.

Innovations to Increase the Return on Investment in Apprenticeship
- Develop flexible and/or accelerated learning approaches (including adapting time-based models of training to a competency-based evaluation).
- Focus on upskilling incumbent workers from low-skill or entry-level positions to mid-skill and more advanced positions, thereby helping to create new entry level positions for new apprentices.
- Develop data driven approaches for measuring return on investment.
- Reduce startup costs for new employers by building multi-employer platforms (e.g., for recruiting apprentices, developing joint curriculum or marketing, etc.).

Innovations to Expand Access
- Improve access to tuition assistance for both employers and workers to encourage the use of integrated education and training opportunities for under-represented populations.
- Pilot greater use of pre-apprenticeship-to-apprenticeship pathway models that utilize DOL’s definition for pre-apprenticeship.
- Develop programs and strategies that support direct entry opportunities into Registered Apprenticeship for low-skill workers, including those that embed remedial education into the course of the apprenticeship, rather than as a pre-apprenticeship requirement.

Innovations to Create a Supportive Ecosystem
- Use public policy, including tax credits, small business grants, utilization requirements or other mechanisms to incentivize and encourage employers to develop and establish Registered Apprenticeship programs.
- Increase state staffing, investment, and capacity to support the expansion of Registered Apprenticeship programs through additional staff positions, expansion of program offices, or increased state investments in the Registered Apprenticeship System.
This page contains no comments
- Use Workforce Investment Act (WIA) and/or Workforce Innovation and Opportunity Act (WIOA) funds and other state workforce, adult education, and career and technical education dollars to support the integration of Registered Apprenticeship into State and Local Workforce Investment strategies to train workers.
- Create incentives for community colleges to support the development and provision of apprenticeship training by a) articulating apprenticeships to community college credit (visit the RACC website), b) creating financial incentives through FTEs or other mechanisms for community colleges to support apprenticeship, or c) create capacity within the community college system to support employers in setting up or expanding apprenticeship programs.

APPENDIX C

American Apprenticeship Programmatic Requirements

The programmatic requirements below are grant requirements that DOL has determined are necessary to programmatic success. Applicants agree to carry-out activities in their proposal and must agree that the partnership will meet these requirements throughout the period of the grant.

Partnership Agreements (for Publically-led partnerships)
Partnerships must commit to the following:

☐ Work with the Workforce Investment System to incorporate Registered Apprenticeship in the WIA/WIOA state plans.

☐ Apply to the Registered Apprenticeship College Consortium.

☐ (As applicable) Partnerships in State Apprenticeship Agency (SAA) states must cooperate with the SAAs to register new programs proposed by the applicant. SAAs awarded a grant must a) show progress towards full implementation of regulations to ensure good standing with DOL; b) develop a plan for registering competency based apprenticeship programs; and c) provide USDOL with a complete data record of apprenticeship activity in the State.

☐ Align Registered Apprenticeship with post-secondary education through innovative partnerships that leverage high quality training and classroom-education opportunities.

☐ Undertake an inventory of existing apprenticeship programs to ensure funds don’t replicate or harm established apprenticeship programs.

Employer and Registered Apprenticeship Program Sponsors
Grantees must ensure that the employers and program sponsors carry-out the following:

☐ Adopt Registered Apprenticeship in compliance with DOL policy and regulation.

☐ Provide proper support to ensure high completion rates of apprentices.

☐ Implement procedures requiring adequate supervision of participants.

☐ Implement procedures requiring safe and healthy working conditions.

☐ Provide data in accordance with requirements for data collection, reporting and evaluation.
This page contains no comments
Equity and Opportunity

The lead applicant must commit to the following:

☐ Develop and implement methods to recruit and select participants to assure that a maximum number of eligible underrepresented individuals are able to participate in Registered Apprenticeship programs.

☐ To the extent that pre-apprenticeships and on-ramps to apprenticeship are part of the partnership’s strategy to encourage participation from underrepresented groups, apply the definition and framework for quality pre-apprenticeship, as described in Training and Employment Notice (TEN) 13-12 Defining a Quality Pre-Apprenticeship Program and Related Tools and Resources. The TEN informs the public workforce system and stakeholders about the pre-apprenticeship program definition and quality framework, as well as promote tools and materials to improve the consistency and quality of pre-apprenticeship programs.

Apprenticeship Documentation & Maintenance of Files and Privacy Information

The lead must commit to the following:

☐ Maintain documentation for registration of new programs.

☐ Maintain apprenticeship agreement forms.

☐ Maintain records of grievances and outcomes.

Data Collection and Reporting

The lead must commit to the following:

☐ Collect and report all required data according to specified time schedules.

☐ Use the OMB-approved data collection and ensure it is accessible for reporting and evaluation purposes.

☐ Require sub-recipients to demonstrate data files necessary to ensure completeness of reporting.

Program Evaluation and Technical Assistance

The lead must commit to the following:

☐ Assure full participation (by recipient and sub-recipient) in any evaluation initiated by the department.

☐ Participate fully (including attending in person meetings) in technical assistance services provided by the Department (or in collaboration with other partners) such as regular convenings of all grantees around common implementation issues.

APPENDIX F

Suggested Abstract Format

You must submit an up to two-page abstract summarizing the proposed project, including, but not limited to, the scope of the project and proposed outcomes. The proposed project must include the following:

I. Lead Applicant Name:
II. Lead Applicant City/State:
III. Primary Partnership Entities:
   a. Private Sector Entity (see Section III Eligibility Information)
   b. Public Sector Entity (see Section III Eligibility Information)
IV. Additional Key Partner(s):
V. Areas Served by Grant (by city, county, and state):
VI. Total Funding Level Requested:
VII. Project Name:
VIII. Summary of Program Activities:
IX. Total Number of Participants to be Served:
X. Populations to be Served:
XI. Targeted Industry(s)/Occupations:
XII. Public Contact Information: Name, Title, Entity, phone, email
